

INTRODUCTION TO JEDI TRAINING - EPISODE 1

Welcome to Jedi Training, the telekinetics podcast. This is the first in a series of long discussions on telekinetics.

It might seem like fringe science to some people out there, but what we can tell you is that it is very real and effective and an important component to spiritual warfare.

Warfare is not homeostasis, which is essentially the maintenance of the living organism.

We're not talking about just surviving. We're not talking about just living life. We're talking about warfare.

And it is a war out there. We talk about that in the broadcast all the time, and it should be pretty obvious that it is a war out there.

And so this is a form of warfare.

What we're going to be discussing are weapons of war meant to disrupt and destroy the enemy.

Of course, we title it Jedi Training because essentially it is based on the right side of the fence.

But there is a dark side to telekinetics.

And so it's important that we discuss this from the Christian perspective and always keep that in mind.

The very first thing that I really want to talk about is my background in telekinetics.

As well as some impact statements on telekinetics.

And then we're going to get into where to start.

Essentially, we've been talking about it in the broadcast, on the show, with the general public, in a way that perhaps will give some people an opportunity to explore this for themselves.

But what we've described is mostly incomplete in terms of how you get there.

Basically, the most important rule as a Christian is you leave doubt behind.

It's okay to be skeptical.

It's okay to ask questions.

But if doubt is your religion, then you're of the dark side.

So you have to let doubt go.

And essentially accept what we're going to tell you as truth.

We have no reason to lie.

We have better things to do.

This isn't based on some type of imagination.

But before we get ahead of ourselves, I just kind of want to go through my background a little bit.

Just to let you know that I'm real serious about what I'm saying here.

And try and overcome your objections before they become an issue for you.

So essentially, I'm just kind of like a regular guy from Fargo.

The upper Midwest.

Nice, wholesome environment.

At least it used to be.

As a youngster, I was an altar boy.

I went to Catholic high school.

And been to the Vatican.

Been to many churches around the world.

And I've been a lifelong practitioner of the Christian faith.

So there's my profession, if you will.

As an undergraduate, I studied biology.

I was heavily into the sciences.

Chemistry, physics, even computer science.

Psychology.

And so...

I feel that that is also an important component to being effective in telekinetics.

Is understanding as much of the world as you can.

Most of the sheeple really don't understand what they're looking at when they're...

Walking around in this world.

And perhaps we'll...

Describe some of...

What that means in a future podcast.

But essentially, you're never...

In contact with anything in this world.

Your clothes are never really touching you.

You're never really touching the floor.

Or the ground.

You're actually hovering microscopically above the matter.

That you appear to be in contact with.

Things that you look at.

Like the trees and the animals are much more complex than...

They appear.

We really look at their skin.

And we don't really think about what's going on under the skin.

But every animal is a complex organism.

Every plant is a complex life form.

And the biochemistry that makes it all possible is governed by a programming language that we call...
DNA.

A very intricate language that...

Essentially...

Governs every little aspect of...

Life.

Too much of this or too much of that.

And...

A mechanism will shut off.

Not enough and a mechanism will turn on.

It's very responsive.

It is an intelligent program.

That does so much more than we can possibly imagine.

Of course, this is just a physical component of what's going on.

But it's important to realize that we are...

Metaphysical creatures.

Biological and spiritual.

In a metaphysical world.

That is both...

Physical...

And spiritual...

In nature.

I also have a background in martial arts...

Which is important because...

It's an important component to telekinetics.

And I'm not talking about karate.

Karate is really kind of like the mainstream version of...

What martial arts is really about.

You really have to think of it more like Bruce Lee.

In a sense.

Be like water.

Essentially.

But...

What you learn in martial arts is that...

There is an internal energy...

That...

That...

Can be harnessed.

You may have heard of this as...

Tai Chi.

Other cultures...

Touch on it.

But it's an important...

Ingredient...

In the mix.

Being of sound...

Body, mind, and soul...

Is an important...

Idea...

When it comes to telekinetics.

Because...

What you're trying to do...

Is...

Focus...

That internal energy...

That you have...

Like...

Sunlight through a magnifying lens.

And so your unharnessed...

Energy...

Is essentially kind of like the sunlight.

Being able to focus it...

Like a magnifying lens...

Like a magnifying glass...

Is really...

At the core of telekinetics.

And so by now...

You should already...

Begin to see...

That it takes quite a bit...

To...

Move forward...

In this training.

This is just a podcast...

We really can't...

Train you...

Or activate you...

In terms of...

What it takes...

To be proficient in telekinetics.

If you were really serious about this...

You basically use this...

Podcast...

As kind of like a cookbook...

To put all of the ingredients together...

But you have to go get those ingredients...

For yourself.

Now it's...

Perhaps not possible for everyone to find...

An authentic...

Authentic...

An authentic place to find...

Or to learn martial arts.

But essentially...

You're going to have to learn it from somebody that...

That learned it from the old country.

Again, you know...

Karate at the YMCA...

Isn't going to do it.

And...

You know...

Taking Tai Chi classes from...

You know...

A white person probably isn't going to do it either.

You never know.

But...

We strongly suggest...

Not...

Getting involved with yoga...

And the like...

Because that essentially is bringing you...

To another destination.

But we'll talk about the yogis and the Hindus...

And their third eye...

And their third eye...

They all have that red dot...

On their forehead...

And...

Where they do excel is...

Essentially...

The remote viewing aspect...

The remote viewing aspect...

Or the visionary aspect of...

Telekinetics...

And telekinetics is...

Like we said...

A weapon...

And with any weapon system...

You basically have to acquire the target...

And then hit the target.

And so there's really two components to...

Telekinetics and...

When you start...

You're basically going to practice...

If you will...

On targets that you can see...

That are around you...

And that's...

Pretty easy...

Compared to...

Hitting a target that isn't...

Near you...

And so...

Being able to visualize a target...

That is not near you...

Is...

Eventually where you want to get to...

And again...

We're just kind of...

You know...

Getting ahead of ourselves...

I've been...

Experimenting with telekinetics for...

About 20 years now...

Nobody really taught me the way...

I just kind of discovered it...

On my own by accident...

And it's probably the real reason...

That I find myself...

Where I am today...

More than anything else...

And like we've described...

In previous broadcasts...

Essentially we've encountered...

Everything there is to encounter...

Under the sun...

From demons...

To aliens...

To shadow people...

To life forms...

That we just don't even know what they are...

Plasma-like creatures...

We've been attacked in...

Horrible ways over the years...

Because it's a war...

And that's how you know...

Essentially that...

It works...

This stuff works...

Because...

Right now I find myself in a very intense...

Situation...

But...

Let me get back to...

How this all...

Kind of started...

So I've got this background in biology...

Christianity...

And in martial arts...

And then 9-11 hits me...

And I wake up...

Slowly but surely...

And...

A year or so...

After waking up...

I mean...

I'm just getting kind of angry...

At...

The situation...

We're going to war in Iraq...

It's obviously all...

B.S.

I mean...

This is just a huge change...

From the 90s...

And the like...

It really kind of set a lot of things in motion...

And...

Essentially...

One day I was watching the television...

I had cable back then...

There were no flat screens...

It was just like the big...

Big old televisions...

For the most part...

Way back in the early...

2000s...

Watching...

A live press conference...

From the White House...

Or the Pentagon...

On NBC...

Or something like that...

MSNBC...

And...

You know...

It's the president...

And...

It's the president...

And...

And...

You know...

It's the president...

Bush...

And it's...

Secretary of Defense...

Rumsfeld...

And...

Probably a few others...

And I'm watching this thing...

And I'm just like...

You know...

Blowing my top...

And I'm thinking to myself...

Like...

You know...

Their location needs to explode...

And I'm trying to focus...

Somehow...

I'm just trying to do what...

I guess...

I'm built for...

Kind of like watching a child...

Learning to walk...

You know...

They just...

Somehow they go from the crawl...

To the walk...

To the run...

And what I'm about to tell you...

Is a true story...

But it's...

Weird and...

Totally unbelievable...

Never told this story...

To an audience before...

But...

Essentially as this...

Press conference is unfolding...

And I'm just blowing my stack...

And I'm just trying to...

You know...

Curse these people...

In a sense...

But...

More than just...

Professing something against them...

Really trying to...

Hit them...

With my mind...

I'm imagining...

You know...

Launching missiles...

And hitting their location...

I'm imagining...

Hitting them with...

You know...

Like lasers from my...

Eyes or my hands...

I was just using my imagination...

Had no idea...

You know...

If it was going to work...

Just felt like doing something...

It's almost kind of like...

An incredible Hulk moment...

The rage gets you...

And it's just...

Just happens by itself...

And I'm watching this...

You know...

I'm just tired of hearing...

These people...

With their BS...

And I'm just trying to hit them...

Any which way I can...

And we'll get more into...

What I was doing...

In a future podcast...

But the short of the long of it was...

Eventually...

As they were taking questions...

I was hearing them say...

I was hearing Bush say...

You know...

Basically saying...

We can feel...

What's happening here...

It was like the television was talking to me...

I know that sounds...

What it sounds like...

But it was my first indication that there was...

An effect...

To what I was doing...

Many other things happened after that...

That are stranger than fiction...

And it almost became like...

The Matrix in a way...
And it wasn't long after that...
That...
I basically...
Left the country...
Things were getting too surreal...
And then they just got even worse...
When I hit Europe...
Really a crash course in metaphysics...
To say the least...
Now trying to describe this...
Event...
To people...
Is really difficult...
You really can't talk about it...
In any other context...
Other than...
Telekinetics...
And try to...
Make it sound as reasonable as possible...
But as I was watching the television...
On whatever fateful day that was...
As I was attacking these...
Public figures on live television...
It seemed like they were responding...
In the sense that...
Not only could they feel the bombardment...
But they would like it to stop...
Obviously this piqued my interest...
And ever since then...
I've been trying to...
Learn and perfect...
The skill as much as possible...

And many years later...
It really seems like I've...
Gone to a place where...
Nobody has gone before...
And we've talked about...
Some of the latter discoveries...
Which is applying...
The sword of the spirit...
As a weapon...
In telekinetics...
But...
Before you can get there...
You really have to acquire...
Many other skills...
And...
Every person is different...
Every person has a different...
Set of experiences...
Every person has a different...
Set of talents...
For the most part...
And...
I don't fully expect...
People to be able to replicate...
What I've done...
And what I've been doing...
Because...
An education...
And...
Life experiences...
Are only part of...
The equation...
Biochemistry is also another...

Important part of the equation...

And...

You know...

Not everybody...

Is the same...

Not everybody can dunk a basketball...

Basketball...

I mean...

You can try and explain it...

To people...

You know...

But you have to be able to...

Palm the basketball...

You have to be able to...

Dribble the basketball...

You have to be able to...

Above the rim...

You have to be able to...

Do these kind of things...

And...

You know...

Some people are taller than others...

Some people have more muscle mass...

Than others...

And some people are just more gifted...

In basketball than other people...

And so this may not be...

Your main talent...

It's certainly a skill that...

Every soldier should develop...

Thinking about...

Where to take this conversation next...

Is a little...

Tricky...

We do want to prepare...

Future topics...

But there's a lot to...

Talk about...

But I think we'll stay with...

Biochemistry for a little bit...

And of course...

You know...

If you're fluoridated...

If you're...

You know...

Dumbed down...

If you're just thinking about...

Secular things...

Then it's going to be real tough to get...

To where you need to go...

But one of the tricks...

Is opening your third eye...

One of the things...

That you have to be able to do...

Is opening your third eye...

And you know...

If that's your pituitary gland...

Is a real...

You know...

Kind of interesting discussion...

Undoubtedly an important component...

But if you look at a cross section of the brain...

It almost looks like...

An all-seeing eye...

And...

What you're looking at...

Essentially are different layers of the brain...

When you're looking at the cross section...

The cross section is essentially...

If you were to slice it right down the middle...

Open it up...

Like a fruit...

You'd be looking at the seed inside...

Think of a peach or something...

And when you look at the inner layers of the brain...

Essentially you see that there's this cavity...

That kind of runs...

In the middle of it...

And this is...

Supposedly where consciousness happens...

So this is a real interesting and important...

Topic of discussion...

Consciousness...

What is consciousness?

Many people take it for granted...

You know...

You're either awake or you're asleep...

What does it mean to be conscious?

What's actually going on when you're...

Awake...

Talking and thinking and eating and...

And doing whatever else you do...

Throughout your day...

As...

An animal...

Basically...

And of course...

Animal means animated...

We're animated creatures...

Instead of like...

Stationary...

Creatures like plants or something...

But what does it mean to be conscious?

Consciousness is...

Probably best described as the fusion of all...

Perception...

And cognition...

Into one...

Point...

In space and time...

Which would be that inner cavity...

Inside the brain...

That looks like this eye...

Training your brain to do more than just...

Operate in a physical context is...

You know...

Part of where the training needs to go...

But you can enhance the function of your brain...

Through different...

Medicinal supplements...

And we're not going to try and be cute here...

But essentially opening your third eye...

Isn't...

It's...

Always possible for the normie...

That's really just kind of done it...

By the book...

All their lives...

We can't...

We're not going to say that it can't be done...

But...

You know...

Some things basically make you more...

Intelligent...

Some things make you more stupid...

Alcohol tends to make you stupid...

Eating a lot of fish tends to make you a little smarter...

I mean...

That's what they say...

But there are other supplements that you can use...

And...

Things that you can use...

That will open up your third eye...

And...

As a college student...

You know...

Like...

Most college students...

Especially back in the 90s...

I mean...

There was a lot of experimentation going on...

At least for some people...

Not everybody...

I mean...

Some people were just drinking...

You know...

It was the cartoon kegger...

At...

Seven in the morning...

For some people...

Other people were experimenting with other substances...

And...

Very difficult to replicate...

That type of parkour...

Especially if you were...

You know...

Into the party scene back in the 90s...

And this was...

Way before...

All the contaminants that we see in...

The party scenes today...

And I know this kind of sounds...

Like we're going off course a little bit...

You know...

How...

How does a...

Christian or a scientist...

Experiment with...

You know...

Recreational substances...

Or anything like that...

And...

You know...

When you're young...

You're dumb...

What can I tell you?

You know...

Nobody's perfect...

I wasn't a perfect...

Young person...

And...

You know...

I mean...

It's just where...

My interest kind of took me...

For one reason or another...

That was the kind of...

It's kind of the people that I was hanging out with at the time...

You know...

Going to...

Rave parties and clubs...

And...

Stuff like that...

And...

You know...

Trying to...

Get you off the right path...

Essentially...

But...

I did...

Do a lot of experimentation...

Nothing like too...

You know...

Terrible...

But I think that...

Like I said...

Like I said...

Every parkour is unique...

And...

Replicating that type of...

You know...

Biochemistry over the years...

Is...

You know...

Difficult to...

To acquire...

Especially...

You know...

Just in a day or two...

And I think...

You know...

We could talk about...

Some of those adventures...

What it's like...

The pros and the cons...

And...

What you experience...

And what you see...

But what I'm talking about...

What I've been talking about...

Has nothing to do with...

You know...

Psychedelics from the 1990s...

Really...

In the sense...

Mushrooms in the light...

Mushrooms...

Boy...

Not sure how many of you...

Have ever tried mushrooms out there...

But they call it a trip...

Right?

And essentially...

It's like...

If you do it right...

It's like hitting the fast forward button...

In your mind...

And all of a sudden...

You know...

You're just thinking about things...

In ways that you've never thought about things before...

And you know...

People have different experiences on mushrooms...

You know...

Some people have bad trips...

Depending on...

What's happening...

But...

That type of experience is...

Pretty priceless...

In terms of telekinetics...

Because...

It really does open up your consciousness...

In ways that you can't even...

Describe...

And of course...

You know...

It's not a perfect...

Type of thing...

Especially today...

Because everything tends to be laced with something else...

But...

You know...

There are...

Side effects...

There are...

You know...

Drawbacks to...

Experimenting with...

Things like that...

That is not a perfect solution...

And it isn't something that you would recommend to young children...

It certainly isn't something that you would recommend to...

Kids in Sunday school...

You wouldn't talk about this to kids in high school...

But perhaps...

You know...

Some of you have experienced...

You know...

Some of that...

As a college student...

Or after high school...

And you can appreciate what I'm talking about...

And now...

You know...

They're...

They're coming up with like...

Oh...

How beneficial mushrooms are...

And...

For many other things...

And...

All of that...

But...

There are substances like...

Mushrooms and...

Cannabis...

Marijuana...

That really open up your third eye...

In a way that...

Is difficult to describe...

In a normal context...

And I think that...

The main reason that it's been illegal...

For many years...

In many countries...

You know...

It's kind of changed now recently...

But...

Back when I was a youngster...

It was pretty illegal...

Illegal...

But I think that...

The main reason that...

It was illegal...

Illegal...

Isn't because...

You know...

It makes you lazy...

Which it can...

It certainly can make you fat and lazy...

You know...

Especially if you smoke too much...

But...

It opens up your third eye...

In a very weaponized kind of way...

And it's almost like nitrous...

In telekinetics...

That doesn't mean that you can't...

Do telekinetics...

Without...

A little mojo...

But...

From a chemistry point of view...

I mean...

There's definitely some things...

That you can add to the fuel...

That makes it better...

And there are other things too...

That are probably a little less controversial...

Like...

You know...

You can...

Use some NAC...

Or you can use some...

Ginko...

You can use health supplements...

Which are all kind of like...

Plant based...

You know...

What I'm talking about here...

Is really plant based...

It isn't...

I'm not really talking about...

Synthetic chemicals...

For the most part...

It's kind of difficult to escape...

Synthetic chemicals...

And just about everything you buy...

These days...

But...

You know...

We're not talking about LSD...

We're not talking about...

You know...

Heroin...

Or fentanyl...

Or something like that...

Cocaine...

And all of that stuff...

We're talking about...

You know...

Mushrooms...

Other herbs and spices...

And these are the kind of things...

You know...

That have been used...
For thousands of years...
For the exact same purpose...
Today we just kind of call it...
Tripping...
We call it...
You know...
Something else...
Or whatever...
But for thousands of years...
Cultures around the world...
Have been using these types of...
Substances...
To open up their third eye...
And...
To make it easier to...
Essentially...
Traverse the veil...
And that is a destination...
That eventually everybody will have to go to...
To...
Acquire the skills necessary...
To become proficient in...
Spiritual warfare...
It's kind of like...
When you cross to the other side...
Everything is different...
You may think that this sounds...
Pretty unchristian at this...
Point in time...
For obvious reasons...
I don't recall...
You know...

It says...

You know...

Smoke some weed...

Or...

Get high...

Or anything like that...

And for the most part...

It's...

Quite the contrary...

We're called to be sober...

Sober-minded...

And...

Level-headed...

And all of that stuff...

And so...

Like I said...

You know...

When you're young...

You're dumb...

I'm sure...

You know...

Everybody in the Bible...

For the most part...

Got drunk at some point in time...

Hardly anybody lived...

A pure...

Virgin life...

If you will...

Very few did...

You know...

You look at...

You know...

Some of the notable characters...

Like David...

King David...

Back in the day...

I mean...

You know...

He slept with somebody else's wife...

And...

Sent the dude...

Off to war...

To get him killed...

And his kid...

You know...

Ended up being...

You know...

Building the temple...

And the like...

Solomon lived a pretty good life...

With like a thousand wives...

Until the end...

Right...

And so...

None of the people...

In the Bible...

For the most part...

With the exception of...

Jesus...

You could say...

Was perfect...

And...

I think there's a reason for that...

We're called to be perfect...

But none of us are ever going to be perfect...

If it's that struggle that defines us...

But...

If you pay attention to...

A lot of the people...

A lot of the prophets in the Old Testament...

And the like...

And they're having...

You know...

Some pretty...

Intense...

Experiences...

And I don't think anybody...

Would dare call any of...

The visions that Daniel had...

Or that Isaiah had...

Or that Ezekiel had...

As...

Hallucinations...

These people were able to go somewhere...

And describe things...

That nobody had seen before...

It's almost like...

You know...

Recording your dreams...

Where do those come from?

And sometimes...

You just have dreams that are just...

Beyond your imagination...

You'd never think of things that...

You know...

You dream about really...

Sometimes...

You know...

It's things that you've never seen before...

Like...

From a movie or anything...

It's like...

Where do these scenes come from?

Where do these people come from?

And so...

While we don't reason dreams as...

Reality...

In our conscious state of mind...

There's definitely a lot of...

Truth in dreams...

Especially lucid dreams...

I mean...

The places seem real...

I feel kind of like we're...

Segwaying a little bit...

But...

It's that mechanism...

That tends to be a useful component to...

What happens next...

We'll spend more time on dreams and visions...

And...

Remote targeting...

In a future podcast...

And we're going to try and do these podcasts...

You know...

As long as we can...

Until we basically get some kind of interference from the matrix...

We're deep out in the wilderness right now...

But every once in a while...

Something shows up...

So...

That tends to be a good cue to...

End the podcast...

For the time being...

The coast is clear...

For the most part...

But we really kind of want to give you some of the basics...

On what it takes to be...

Proficient...

And...

What are the advantages...

What are the...

Disadvantages...

Maybe it's a good topic of discussion right now...

Now...

Look...

We're in a...

We're in a war...

It's like a cold war...

And...

You know...

It gets hot from time to time...

When there's a genocide...

When it really becomes physical...

And...

And...

We're in a war...

And...

For as long as people have been around...

It's been a war out here...

And...

The enemy is constantly attacking you...

One way or the other...

Trying to pull the rug from underneath you...

Trying to...

Get you to stumble and fall...

Trying to get you to hurt yourself...

Through sin and the like.

And sometimes what appears to be like something good ends up being something nasty.

You know, I think there's a lot of examples that I could come up with.

But, you know, sometimes the person that you meet online or sometimes the person that you meet at the bar, you know, you thought was like, you know, a good person to hook up with.

And ends up being a nightmare, you know, a few months down the road they steal all your money or break your heart or, you know, give you some other undesirable lasting effects.

But the system is always trying to get you.

And the more you wake up to it, the more you realize it.

The more you try to avoid it, the more they basically jump out of the bushes.

But there's always a force of evil trying to get you.

I know how that sounds, but it is what it is.

And the evil that we're fighting against operates like a Cold War.

It uses proxies.

It's kind of like, you know, right now what's going on in Ukraine 2022.

We're not fighting the Russians per se, you know, ourselves.

It's not our troops that are doing it.

It's, you know, other people that are doing it with our weapons, with our money, with our funding.

And Cold War is like that.

You know, Vietnam was like that.

North Korea, the Korean conflict was like that.

And for the most part, you know, a lot of the wars that are fought in the physical world are proxy wars for unseen forces.

Sometimes it's more obvious, sometimes it's less obvious.

But that's just kind of like how Cold Wars or Shadow Wars work.

Now, besides temptation and them trying to basically cause you to fall and stumble, these people are also engaging in telekinetics against you.

And they're also using other weapons against you.

Silent weapons like EMF and other things.

So, it is a war.

They've declared war.

It's a war.

This is your enemy.

It's serious.

And in a war, there isn't, you know, always an opportunity to take prisoners.

The objective of a war is to annihilate the enemy.

With whatever means possible.

You know, during World War II, we basically burned entire cities to the ground.

Many cities.

Major cities.

In Germany.

In Japan.

In Japan.

That's war.

Annihilation.

Of the enemy.

Doesn't matter, you know.

What the cost is.

Doesn't matter, you know.

How it's done.

It is what it is.

Of course, when it's a Cold War, in the modern world, it's really kind of difficult to, you know, annihilate the enemy.

With bullets and bombs and things like that.

And what you'll eventually discover is that, you know, shooting the proxies has little impact on what's really going on.

Even if the Russians were able to win in Ukraine, they haven't really changed anything.

They haven't really inflicted any damage to the people that are backing, you know, the Ukrainians.

Europe is still there.

America is still there.

They killed a bunch of proxies and it's changed very little in the situation in terms of their enemy.

But, of course, in their backyard, it makes things a little better.

It's another dynamic of a war that we're just not going to dwell on.

But, in a shadow war, in a proxy war, in a cold war, what can you really do about it?

As soon as you step out of line, you know, here comes the quote-unquote law.

Hits you with disorderly conduct.

Hits you with resisting arrest.

Hits you with, perhaps, you know, even some felonies.

Over something very little.

You could spend ten years in prison for basically spitting on someone.

Soon you could spend ten years in prison just talking about somebody online or something.

It's getting to that point.

And that's why telekinetics will always remain a weapon of choice.

But engaging in the war as a soldier on the battlefield, whether it be through telekinetics or anything else, makes you a target.

And, you know, the bigger the threat, the more they'll come after you.

So, you know, if you're just posting things online every so often, I mean, they're not going to bother too much.

You know, they'll censor you.

They may, you know, activate your cell tower nearby or update your phone to irradiate you.

But you're not going to be, like, a huge high-priority target.

But the more you engage this enemy on all fronts, the more they're going to want to get you.

It's only, you know, natural.

It's like any video game you've ever played, you know.

You tend to shoot at the big, you know, the big targets first.

You'd rather shoot at some tanks rather than shoot at some, you know, pedestrians or something.

And so the more, you know, the more threatening you become, the more they're going to come after you.

But this is why, you know, telekinetics is a weapon of choice on the battlefield.

Because you're not going to get, you know, the big pushback from, you know, law enforcement.

Nobody's going to call 911 because you pointed your finger at someone or because you're laying in your bed.

You're not going to get actioning people at a distance.

But they will come after you in other ways.

The system knows.

The enemy knows.

And the reason that the enemy knows is because

they're surveilling and

attacking very much the same way.

So, it is a weapon of choice.

Especially

given the current situation.

For the most part, you're surrounded.

All these people are just
surrounding you like
piranhas.

Like sharks.

Waiting for the opportunity to get you.

And doing it in a way that makes it
seem like

it's not them, it's something else.

But they're always watching.

They're all participating.

They're all guilty.

They're all guilty.

And while you spend, you know, your energy basically,
you know, talking to people,
complaining about what's going on,
sharing your opinions like,
you know, a normal adult
would.

I mean, these people are just laughing at you
as they irradiate you,
as they fluoridate you,
as they infect you,
as they slow kill you.

All these people are just basically
there to contain you
as you're being exterminated,
as you're being controlled,
as you're being tortured,
as they attempt to make you lose your way
and lose your faith.

They want you to be like them
because they are a virus.

And so, you know,
we're not going to have the debates,
you know, can these people be saved?
Can you turn them?

You can try.

You know, I want you to kind of think about,
you know, one of these scenes from Star Wars,
you know, Luke Skywalker versus Darth Vader
or something.

And, you know, they're not just...
going at it with lightsabers.

You know, they're talking to each other,
too.

Right?

They're like...

you know, trying to get under their skin
as they're fighting them.

Trying to make points, you know,
trying to convert them.

You don't know the power of the dark side.

I can feel the anger, you know,
inside you, you know.

And so, it's okay to talk to these people.

It's okay to try and convert these people.

But it's a war.

You know, imagine being on the front lines
during World War II,
you know, as you're shooting at the Nazis
or something.

You know,
yelling at them, you know,
democracy is better, you know.
Being free is better.

You're not going to be able to
convert these people on the front lines.

You're not going to be able to convert
these people that have already
sold out or have been assimilated.

No matter how much you try.

I mean, the battle is
with the minds of the young.

It's really difficult to change, you know,
an old fish out there,
to say the least.

And so, the action

in terms of

raising awareness

and all of that

is with young people.

But you see how the indoctrination is.

They make it nearly impossible
to talk to young people
about important issues.

And so,

you can try.

You can try and win them over.

There's nothing wrong with that.

There's nothing wrong with
evangelizing.

There's nothing wrong with
preaching to people.

But you've probably already tried
and you've probably seen
the response that you get.

There's a certain recipe
that's required to make

good people.

It's like a certain recipe
that's required to make
pancakes or
brownies or something.

And
it all has to be there
basically in the beginning.
People have to be brought up
a certain way
in a certain environment,
in a certain type of home
for the most part.

And while there's, you know,
some degree of variation
approximately,
you know,
these ingredients are required.

And so,
converting people is
not as easy as it sounds.
the best that you can
probably hope for
is finding some lost
sheep out there.

Somebody that's lost
their way.

Reminding them of the
right way.

Bringing them back
to the straight path.

And letting, you know,
the other ingredients

do the work.

But, you know,

taking some lost soul

and

turning their life around

is really difficult.

Supposedly,

it happens in prison.

You hear a lot of people

converting in prison.

Usually people with, like,

you know,

a long sentence.

And maybe, you know,

that's basically

what's required

these days

to convert

the average person

or the heathen

that's out there.

You basically have to

institutionalize them,

take away everything,

break them down,

and build them up again.

Kind of like boot camp.

So,

it's probably not fair

to say that it's

impossible to convert

people,

but it's very difficult.

And in this war,
there really isn't time
to institutionalize
every player
on the battlefield.

And again,
the people that you
encounter
are just
proxies.

As Ephesians 6.12
tells us,
we're not wrestling
against flesh and blood.

We're wrestling
against
spiritual wickedness.

Life forms that
you don't encounter
in the textbooks.

Life forms that
are out there,
but
are poorly understood
by humanity.

But it is
these life forms
that are the real enemy.

Paul had it right.

But if,
you know,
we were going to add
a footnote,

it would be,
we don't just
wrestle against
flesh and blood.
We wrestle against
persons without bodies,
spiritual wickedness
from heavenly places.
Legions,
authorities,
rulerships,
dominions
of evil.
Vast quantities
of unseen forces
that are as conscious
as you and I,
but are invisible
to the naked eye.
And primarily
only visible
with a trained
third eye.
And so for all
of that,
you really have to
think outside of the box.
You have to broaden
your horizons.
and you basically
need to experience,
you know,
some of the things

that are out there
to be able to see
these monsters
for what they are.
But in particular,
it's these monsters,
it's these,
it's this enemy
that is only accessible
through telekinetics.
There is no bullet
that will reach them.
There is no missile
that will reach them
for the most part.
Unless one day
somebody invents
some kind of
quantum missile
or some kind
of quantum laser
that can hit
these targets
wherever they may be.
And I don't fully
understand where
these things are.
The general description
is the second heaven.
What does that mean?
We'll have to leave that
for a future broadcast.
But it's like a parallel universe,

a parallel dimension
where these things exist
in a spiritual state.
Kind of like a dream world
kind of state.

And that's what,
you know,
dreaming is kind of like.
Being a consciousness
without a body.

And so,
for the most part
in our dreams
we don't
perceive our
bodies entirely.
for the dream
like when we are
conscious.

Although,
the perception
is very similar.

But if I were to
describe what
these demons
and
the like
are experiencing,
it would be
a dreamlike state.
they're like
in a
dreamlike state.

Able to go
places
and see things
and interact
and experience
and talk
without a body.

but it is
this enemy
that has to be
hit.

And
it's this
enemy that can
be hit
with telekinetics.

The sword
of the spirit
is meant
for spiritual
warfare.

It's meant
to attack
the spiritual
enemy.

I mean,
you can wield
it to attack
people
because they're
metaphysical.

But essentially
the sword

of the spirit
is the idea
of focusing
telekinetics
through
a conductor.

to attack
spiritual
enemies.

That's my
point of view.

And
what I can
say is that
the effects
are devastating.

The sword
of the spirit
is like
kryptonite
for this
enemy.

And
this enemy
takes many
forms.

It's not
just a
singular
individual
that's been
disembodied.

We're talking

about a
collective
of
individuals
that turn
into
superstructures
or
super
storms.

And
this is
kind of
like where
having a
background in
science is
useful.

Imagine
a hurricane.
hurricane.

Okay.

We're going
to close
with this
and continue
on in a
future podcast.

Hope this is
interesting for
people.

But imagine
a hurricane.

Now you can
look at the
hurricane from
a quote unquote
satellite
perspective.

Do they
dream that
up through
CGI?

Do they
take the
picture from
a plane?

You know,
whatever.

But just imagine
for a second
that you could
see a top
down view
of a hurricane.

We know
that hurricanes
do exist.

They do
hit, you know,
from time to
time.

And, you know,
they're like a
massive storm.

But when you

think about
what makes
up a
hurricane,
really,
from a
physics or
chemistry point
of view,
you're talking
about a lot
of water
vapor,
you're talking
about a lot
of energy,
you're talking
about heat.

And when
these ingredients
come together,
they, you know,
eventually make
like a super
storm.

But break
it down even
further when
you think
about, okay,
it takes
water to
make a

hurricane.

It takes

water vapor.

Now think

about all

of these

different

molecules.

H₂O

coming together.

How many

water molecules

are in a

super storm?

Or any

thunderstorm?

We're talking

about a lot.

And,

essentially,

what we're

experiencing

is something

similar from

a metaphysical

perspective.

We're looking

at super

storms,

combinations

of disembodied

individuals,

and the

side effects

of sin,

the negative

energy that's

related to

sin in

general.

coming

together,

causing

super

storms.

We feel

like, you

know, the

recent

pandemic was

some kind

of manifestation

of a

super storm.

Wars in

the physical

world tend

to be a

manifestation of

a type of

super storm

that's happening

in the

metaphysical

world.

and,

usually, it
happens there
first, and
then it
happens here
afterwards.

And so, the
strategy is
essentially to
intervene.

The strategy is
of intervention
and to
attack this
evil

on its
home territory
before it
can become
a super
storm.

And the
only way
that I
know of
right now
to attack
the real
evil that's
out there
is through
telekinetics
and spiritual

warfare.

I kind of

wanted to

add something

else.

Thinking about

sin.

sin is

kind of

like

lighting a

fire.

So, what

is sin

really?

It's a

wrongful

act, like

lying to

somebody or

cheating

somebody or

killing somebody

or something

like that.

Whatever this

might be,

it's kind of

like lighting

a fire.

Now, it's

easy to

visualize the

fire.

But a

fire has

other effects

other than

just, you

know, you

can see it.

A fire

gives off

heat, a

fire gives

off smoke,

and a

fire spreads.

And that's

basically how

sin and

corruption

works.

And so, you

can make a

little mistake,

you know, it's

kind of like a

little fire,

you know,

starts, and

you can put

it out.

You know, you

can try and

contain it.

Sometimes there's,
you know, some
damage there, but
it's usually not
the end of the
world, right?

Imagine you're
cooking and, you
know, a towel
catches on fire
or something, you
know, you put it
out, you got a
little grease fire,
you know, you
put a cover on
it.

But, you know, if
a lot of people are
doing that, or if
the sin, you know, is
big enough or
allowed to spread
uncontained, you
know, it can burn
the whole house
down.

It could burn down
a city.

I mean, you
know, cities in
the old world
were burned down

to the ground, you
know, over and
over again, like
Rome and the
like.

It started with
one little fire,
spread to the
house, spread to
the street, down
the street, you
know, took out
neighborhoods, and
so on and so
forth.

So sin is like
that.

And, you know, it's
the heat and the
smoke and all of
it that makes, you
know, fighting the
fire unbearable.

You know, when a
fire gets big
enough, you can't
really just, you
know, approach it
and snuff it out.

Sometimes, you know,
you can't even see,
you know, anymore
because of the

smoke and the

like.

So you have to use

a hose or you have

to use, you know,

some other kind of

way of, you know,

putting it out.

And essentially,

you know, telekinetics

is a little bit like

that.

It's like using a

hose when the fire is

big enough.

And so, you know,

telekinetics isn't

always, you know,

appropriate for, you

know, the little

fires, right?

Somebody cuts you

off and you're

basically like, oh,

you know, F it and,

you know, you just

start attacking them.

Look, I've actually

done that only

because, you know,

I'm deep behind

enemy lines and

essentially just

about everything
around me is the
enemy as far as I
can tell.
it's kind of like
I'm in Nazi
Germany right now.
Nothing but Nazis
around.
So, you know,
what's the
difference really?
And, you know,
during World War
II, look, I mean,
you know,
unfortunately,
there are innocents
that burned in
those cities too,
you know.
It's just war.
Feels like we're
getting some
interference in the
matrix.
We're definitely
going to have to
leave it there for
this broadcast.
Appreciate everybody
tuning in.
Until the next

time.

If you're

listening to this,

you are the

resistance.
