

BASIC INPUT / OUTPUT SYSTEMS (EPISODE 11)

Welcome back to telekinetics basic input output systems.

In this podcast, we're going to be talking about applying telekinetics in the real world.

Qualitatively speaking.

Qualitative means that we can only really describe it.

Hands-on training essentially is something that you're going to have to practice on your own.

Practice makes perfect, but as soon as you start jumping in the pool, you better learn how to swim.

That's all we're saying.

What are basic input output systems, biologically speaking?

I think just about all of your senses are a type of input system, but some things have a dual purpose.

Some things do more than two things.

For example, with your mouth, you can taste, you can eat, and you can speak.

So the sensory part is obviously input, and speaking obviously is output.

There are other things that come to play with speech, of course, as well as sensing things.

But essentially, the body is built based on input and output.

And it's based on the ideas of cycles.

What goes in comes out.

We wake up, we've got to sleep.

It's much like the world around us.

With the seasons, with the days, day and night, spring, summer, fall and winter, all over again.

Things tend to be cyclical.

Things tend to go in and out.

Things tend to go in and out.

There's all sorts of cycles in nature as well.

The water cycle.

The oxygen cycle.

We breathe in air.

We extract the oxygen.

We're affected by the other chemicals in the air.

And then we exhale carbon dioxide and other toxins.

Basic input and output.

There's all sorts of examples that we could talk about of things going in and out.

But this is one of the fundamentals of the world we live in, in the physical world that we live in.

So, telekinetics is very much the same way.

We can be affected by telekinetics and we can affect other things by telekinetics.

And there are things that can influence our abilities when it comes to telekinetics.

There's even food for telekinetics, if you can imagine that.

And there's things that basically prohibit and inhibit and draw down your abilities as well.

But telekinetics is an input and output system.

You can draw things in through telekinetics.

You can push things out through telekinetics.

What is it really?

It's mind over matter.

We can absorb energy.

We can absorb energy from the environment straight into our brain and into our body.

And essentially, it all works together.

Seamlessly.

Just like consciousness.

Just like driving a car.

Just like taking a test.

Everything just kind of works together.

Every part, every body part, plays its part.

Your eyes do something.

Your brain does something.

Your arm does something.

It all works together.

And so, telekinetics is more or less the same way.

But essentially, the body is the life support system.

And the brain is the central computer that makes it happen.

Your arms, your eyes tend to be like antennas.

And essentially, just about every body part has an additional function in terms of telekinetics.

So, kind of like the mouth, it does a lot of different things.

It can taste.

It can feel.

It can speak.

And so much more.

The idea of telekinetics is essentially an additional function to just about every body part.

The energy that flows through us can be described as electrical, biochemical, or something much more spiritual, depending on your point of view.

But in fact, it seems like all of the above certainly apply.

It's a lot to think about.

Applying telekinetics as an output system requires focus and awareness.

It's kind of like riding a bike.

The first time you tried to ride a bike, it didn't go so well.

Some of us are early bloomers.

Some of us start late.

And telekinetics is probably best described as trying to learn how to ride a bicycle.

As weird as that sounds.

And so at first, you may not get a whole lot of feedback.

You may not get a whole lot of satisfaction.

But eventually you're going to understand that there's something there.

But understanding that there's an energy that flows through you is the first place to start.

You can kind of think of it as electrical current, but it's so much more.

Now, the dark side essentially uses negative energy, negative emotions, drive their capabilities.

But so does the paranormal.

The Bible tells us that people with divining spirits all of a sudden had fortune-telling capabilities.

They could see into the future.

They could make predictions, if you will.

This is just one type of telekinesis.

And of course, the precursor to telekinetics is telepathy.

Now, you have to beware of telepathy.

You have to beware of things intruding into your thought life.

Because essentially the Bible warns us about being double-minded and about an eye that's not single.

If thine eye be single, then thy whole body will be full of light.

But if thine eye is evil, which means it's not single, then thy body is full of darkness.

So if there's something else in the person, and this is what essentially double-mindedness and having something else in the eye is a reference to.

If the person is demonized or if the person possesses demons or devils or something along those lines, their telekinetics will be augmented.

This is something that's important to be aware of because it enters into the dynamics of the battlefield.

You're not necessarily just dealing with people out there.

You're dealing with people that have some kind of spiritual parasite feeding off of them.

Draining their life force in exchange for quote-unquote superpowers.

The magnitude varies.

And the qualities vary.

Some are telepathic.

Some are seeing into the future.

And others are telekinetic, which means that they can have an impact on your body.

This spiritual augmentation is not limited only to people.

But essentially it seems like just about everything is infected with this type of phenomenon.

We'll get more into that in a future podcast.

But we've talked about it in the main show.

Faces from another dimension.

These things can show up just about anywhere.

And how they do it is probably a long discussion in quantum physics.

But essentially we're looking at ghosts with psychic powers and telekinetic abilities.

That's all they have really.

Unless they can embody themselves into someone.

These things come in all shapes and sizes.

From the real big to the real small.

A person can have dozens, hundreds, perhaps even more.

And these things tend to consolidate like...

Like a storm.

Starts off with a few clouds.

Gets bigger.

More intense.

Turns into something like a supercell.

Because these ghosts, if you will, or unclean spirits...

Are nebulous and gas-like in nature.

But not...

Entirely physical.

But gas probably best represents their...

Form in a physical way.

Energetic, conscious gas that can take the form of just about anything.

Some of these things seem to have a distinct form.

Again, we'll get into all of that in a future podcast.

But...

For the most part, they're nebulous.

And...

For the most part, they're embedded just about everywhere.

Watching you like a hive.

Insects, trees, people...

And the like.

Totally invisible to the naked eye.

But...

All connected.

All connected.

Nonetheless.

Getting back to basic input and output systems...

The dark side is augmented by...

Unclean spirits.

And...

We, of course, are augmented by...

The Holy Spirit.

As Christians, we have the Spirit of Jesus...

Running through all of us.

Hopefully.

And...

This is basically where our...

Talents come from.

So...

Connecting...

To that network...

Is...

Your primary concern.

If you can't connect in a genuine way...

You're basically going to be a...

A flat...

Telekinetic.

Or a flat psychic.

Basically trying to harness your own...

Bioelectricity.

Which, you know, has...

You know, some impact...

On the environment.

But...

It's not at all the same thing.

Usually when you become telekinetic...

Somebody tries to pick you up...

And it's usually the dark side.

And so...

Given that this is...

A basic...

Input-output system...

As basic as...

Speaking and sensing and seeing...

And the like...

You have to learn how to use it.

And so the best way...

To learn how to use...

Telekinetics as...

A Jedi...

Or...

A priestly...

Warrior class...

Is to...

Input and output...

The Bible.

I know that's probably...

Not what most people want to hear.

And they want to hear something...

You know...

Better than that.

But there's really nothing better than that.

And it's a challenge.

It's probably the toughest thing...

That you can do right now...

Is to...

Input or output...

Scripture.

And...

You know...

We generally call this...

Evangelism.

Or...

You know...

Listening to...

Scripture.

But...

That's the best place to start.

When you can train your body to...

Accept...

The word...

And to...

Explain the word to people around you.

That becomes very powerful indeed.

Not only for what...

Happens next...

But...

Essentially...

It's one of the most powerful actions...

That...

A human can...

Perform.

Now you can probably do this in many different ways.

Reading...

Reading...

The Bible...

Out loud...

Is...

A perfect...

Harmonization...

Of input and output.

The word is coming in...

And...

The word is...

Being professed...

Coming out.

Now it's hard to describe...

What happens next...

But...

Every skill...

Requires a lot of practice.

I mean...

Beethoven and Mozart...

Didn't become...

Who they became...

Overnight.

On average...

It takes about...

10,000 hours...

To get good at something.

That's a lot of time.

If you were to break that down...

For the most part...

It's about 10 years of...

On the job experience.

That...

You know...

That sounds...

Pretty reasonable...

Right?

And so...

You know...

The more you...

Practice...

The more your words...

Are going to carry...

In this...

Constructed reality.

Speech...

In itself...

Especially...

Idol speech...

Doesn't seem like it does a whole lot...

For the most part.

You know...

When you talk to people about...

How they're feeling...

Or what's going on...

There really isn't a whole lot of...

Action there.

But think about...

The scene when...

Jesus was speaking...

Into the fig tree.

The power of his words...

Carried so much weight...

That that fig tree...

Withered and died.

And so...

What do we know about...

Everything up to that moment?

Well...

Jesus spent a lot of time...

Preaching the gospels...

Of the time...

In synagogues...

In the streets...

Going from town to town...

And it's obviously...

One of the ingredients...

In the miracles...

That he performed...

Of course...

It's not the only ingredient...

But...

Essentially...

The power of your words...

Can be...

Just as powerful...

If not more powerful...

Than...

Your thoughts...

And essentially...

Telekinetics is...

About...

Transporting an idea...

To a target...

And so...

If we're an audio range...

Of someone...

Your voice...

Your voice...

Can be like...

A carrier wave...

And so...

Speech can be...

Very powerful...

Very powerful...

Indeed...

Much more powerful...

Than people think...

When it's applied...

In the right way...

When it's applied...

In the right way...

Again...

If it's idle talk...

Then...

You're just sitting there...

Idling in your car...

You're not going anywhere...

You're not doing anything...

It's just regular...

Vocabulary...

Vocabulary...

If you will...

But...

Done the right way...

You're not going anywhere...

You're not doing anything...

It's just regular...

Vocabulary...

If you will...

But...

Done the right way...

Your speech...

Can have a tremendous effect...

And of course...

There's...

You know...

Varying degrees of...

Of what I mean by that...

But...

Your words are very powerful...

If...

You're trained...

The right way...

And so...

You shouldn't neglect...

What I'm telling you...

What I'm telling you here...

In terms of...

Inputting...

Scripture...

Now...

Reading out loud...

By yourself...

Is certainly...

You know...

One of the things...

That you can do...

It's a good place to start...

But...

Evangelizing to other people...

And actually making a difference...

Is where you can score some points...

And scoring points...

Basically will help you...

Get to the next level...

If you can really change...

Or save someone...

That has a huge impact...

In what's going on...

And it's not easy...

Especially today...

I mean...

You try to bring up...

The Bible to people today...

And they're just gonna...

You know...

Run away...

Basically...

Right?

They're gonna...

Apply to you...

Based on...

What they've learned...

In public schools...

Devolution...

You know...

Big Bang...

And all that...

Right?

And so...

That's a real...

Awesome way...

Start the conversation...

With people...

On the road to the Bible...

Because if you go in...

Too deep...

Too fast...

I mean...

People are just gonna...

Run away...

And it's just not gonna work...

So there's like a...

You know...

There's...

A strategy...

To the sales pitch...

I'm not sure how many of you...

Have ever had a sales job before...

But sometimes...

When you close in...

Too quickly for the sale...

I mean...

Right?

And...

Essentially...

Evangelism is like that...

And I know a lot of people...

Just kind of like...

You know...

Jump in...

You know...

Have you been saved by Jesus today?

And you know...

People have already...

Kind of made up their mind...

When it comes to all of that...

But...

If you overcome their objections...

Then all of a sudden...

Things kind of change...

To...

Become a role model...

In a sense...

Where people want to know more...

About what makes you tick...

You know...

That kind of draws them in...

And so...

You know...

Saving people isn't always...

Isn't always...

Easy...

Like it used to be...

Like it used to be a lot easier...

Saving people...

But today...

You basically have to...

You know...

Try harder...

But not too hard...

So there's a...

There's a skill to acquire there...

But practicing that skill...

Like some of these...

You know...

Door-to-door knockers...

Is...

Something that everyone should try...

And at first...

It's...

You know...

It's tough...

It's...

It's kind of like...

Asking somebody out on a date...

Or something...

I mean...

You're feeling kind of...

You know...

Weird...

It's difficult...

And you have all of these doubts...

And you know...

You lack confidence...

And...

It crumbles...

Right...

And that's why...

Experience...

Makes a difference...

And nobody really...

You know...

Is successful...

On their first few attempts...

Especially if you're going after a big fish...

Right...

And look...

Today...

Given where we are...

You know...

On the big scale of things...

It's...

Just about impossible...

To get a big fish...

You know...

Somebody that's been a non-believer...

All their lives...

Trying to convert them...

Or one of these people that have...

Sold their souls to the dark side...

I mean...

You know...

You're not really going to be able to convert them...

But...

There's no harm in practicing...

And sometimes...

You know...

Casting doubt on their belief system...

Is...

A slick way to go...

So again...

You know...

We're talking about this because...

This is a skill that you need to practice...

It's the basics that you really need to practice...

Before you can get to the more advanced stuff...

The more advanced stuff is just going to be like...

Doors opening all by themselves...

To be quite honest...

Once you get the basics...

Once you get on that road...

Then all of a sudden doors open...

Things become revealed...

It's like...

Whoa...

You know...

It's a little too much...

But...

It is what it is...

Getting on that road...

And staying on it...

And...

Enduring what...

You know...

That road has to offer...

Is really where you...

Pick up all of your skills...

And...

Where you start building your intuition...

And...

So on and so forth...

But it all really starts with...

Input and output...

And telekinetics is...

You know...

Pretty much the same way...

It's input and output...

But I mean...

If you're going to try and fly...

Before you can run...

Then...

You know...

You're probably just going to crash and burn...

It's probably just going to fizzle...

For you...

Because there's nothing really backing up...

What you're trying to do...

And this is another real important point...

In what...

You know...

Jesus was trying to teach us...

Which...

Is that if you believe...

You can do anything...

It's that doubt...

And disbelief that holds us back...

And so...

When you really get into...

Advanced fire telekinetics...

I mean...

It's just...

You're going with what you're seeing...

And believing...

And there really isn't a whole lot of time to...

Think about how surreal everything is...

It's almost...

Like you get...

You go on autopilot...

In a way...

It becomes pretty automatic...

You don't know how...

But it...

It's happening...

And...

That's why...

Having faith is really important...

Because...

When you think about it...

We know the why and the how...

Isn't really us...

We're just like an instrument...

Like a hammer...

We're just like an instrument...

Like a hammer...

But faith is a primary ingredient...

And so talking to people will help you overcome your own objections...

You'll help other people overcome their objections...

You may win...

You may win...

A soul...

Which will wipe out a lot of sin in your life...

And...

You know...

Getting to that state of...

Virtue...

Virtue...

Is where the action is at...

You know...

A lot of people want to subscribe to...

Easy beliefism...

And they just want to be saved...

But they don't want to be saved from their sin...

And...

You know...

They want to...

A saint...

As they run around...

Like devils...

And all that stuff...

I mean...

It's just totally incompatible...

I'm not saying it's easy...

And I'm not saying that...

You know...

Any of us are perfect...

But the closer...

You know...

You get there...

You get to being perfect...

The more effective you're going to be...

And I suppose...

And I know...

That the...
