

UNLOCKING THE POWER OF THE MIND (EPISODE 13)

Welcome back to Jedi Training.

Of course, as we do this podcast,
we're training ourselves.

I like to speak in the third person, me, myself, and I.

It sounds more professional, more distinguished.

But essentially, as we do these podcasts, we're doing physical training.

And of course, at times there are some disagreeable distractions that appear in the background.

We're working on that.

We're trying to perfect the technique of podcasts from the wilderness.

And so until we do perfect our technique,
we would recommend that you don't listen to these podcasts on headphones.

Because we're using a studio quality mic that picks up every little sound.

Every breath.

Every footstep.

Everything.

Everything.

And it's as annoying for me as it is for you.

And so I'm trying to find some common ground where we can do these podcasts and not annoy our audience.

And so we're adding some background music to these podcasts.

Hopefully it covers up some of the sounds.

We're going to be doing other things as well to mitigate the distractions.

We want this to be easy for you to absorb.

We want it to be enjoyable.

We want you to love the Jedi training.

But these reports are coming from a battlefield.

I'm forced to basically move around like a tank.

And tanks make noise.

The battlefield is disturbing in just about every respect.

But to do a podcast like this, especially for the length of the podcast,
basically we need to go on a hike.

On a nature walk, if you will.

Kind of a source of inspiration and some tranquility.

And unfortunately right now we just don't have the time in our studio to do this.

The way it really should be done.

But hopefully soon we'll be able to resolve that issue as well.

But the reason I find myself in the situation that I find myself in
is because of the success of these quote-unquote Jedi techniques.

The telekinetics.

Absolutely devastating.

And so we basically have to stay on the move.

Or reinforce our positions to withstand enemy attacks.

It's non-stop.

This of course kind of gives you
some foreshadowing of things to come.

If and when you decide to get involved in telekinetics,
you have to realize that you're stepping onto the battlefield.

And we're kind of warming people up to that.

And it's not easy.

But nothing is easy.

And truly all of you will be victimized by this system one way or another.

People have been killed for less.

Much less.

And so stepping on the battlefield is exactly that.

So it requires a certain level of resourcefulness to survive the attacks.

You think about the invasion of Iraq and Afghanistan.

How did these people survive the most formidable military in the world?

Not only survive, but in fact win.

Well, they didn't just stand around in one place waiting for the smart bombs to arrive.

And essentially that's kind of the mentality that you have to have.

Guerrilla warfare in a sense.

But...

Again, the battlefield isn't strictly physical.

So...

There's a lot on my mind right now.

Obviously I kind of want to redo...

The last few broadcasts that...

Were probably annoying as hell to listen to.

For, you know, obvious reasons.

But then there's the idea, well, you know...

If we start all over again, or if we do those broadcasts over again...

Then you're going to have to sit through all of...

Those discussions...

All over again.

And that kind of pains me as well.

It pains me to redo those podcasts...

But I think eventually I'll have to.

I'm going to try and remix them, remaster them.

But...

You know, if you're listening to them on headphones...

There's no hiding...

The tromping through the forest.

There's no hiding the...

The heavy breathing.

And there's no hiding the...

The strange noises from this...

Battlefield armor...

That we're forced to wear.

And here we are entering...

A hiking trail.

So you may hear...

Even more...

Disagreeable noises.

And we could do a podcast on that.

The noises and the sounds...

Of the secular world.

Or even of the dark side.

But I really want to get into the juicy stuff.

The problem with getting into the juicy stuff is...

Two-fold.

One...

You know, this information may be beneficial to the dark side.

Probably not.

They seem to be...

Understanding these principles quite well.

But secondly...

Secondly...

What we're going to talk about is essentially the product of many years of research.

It's dangerous.

It's very dangerous.

But given that we're all in danger...

It's...

It's...

It seems like a necessary evil.

And...

You know, I constantly...

Think about...

What I'm talking about here.

And what I'm trying to communicate to other people.

And...

Essentially...

You know, scripture has...

Two sides to it, if you will.

The blessings and the cursings.

Now, if you're not...

You know, familiar enough with...

With the Bible to understand...

The idea of blessings and cursings...

Then...

You know, you're probably still 101.

And...

Much of what I say will be offensive.

But...

If you understand that...

There is...

War in the Bible.

There is...

Not only the need, but the demand...

For justice.

For the eradication of evil.

For the mitigation of corruption.

Once you understand...

All of that...

Then you realize that...

You know, sometimes...

You have to kill...

To survive.

In fact...

For you to live...

Something has to die.

Could be a fish.

Could be a chicken.

Could be a cow.

Could be some poor innocent plants.

They're alive.

You might not be able to hear them scream...

When you cut them down, but...

They're definitely alive.

The point is...

Is that...

In this...

Harsh reality that we find ourselves in...

In order to survive...

Something has got to die.

That is the nature of the world.

And...

When the Almighty created this world...

He said...

Everything that's here...

Is good.

It's good for us.

It puts hair on our chest.

It builds character.

It forms us...

In the fiery crucible.

It's refined through fire.

And through tribulation.

None of us...

Really like that.

Many of us...

Go through it...

Kicking and screaming.

Like little...

You know...

Children.

In fact.

I guarantee you that...

None of you...

Are going to want to carry your cross.

None of you are going to want to endure...

Until the end.

But as Jesus famously said...

It's only those that endure...

Until the end...

That will be saved.

And yet...

The expectation here...

Is that...

None of us will survive.

And this is true whether...

You do something...

Or you do nothing.

We all come...

Into this world like...

Death row inmates.

We try to buy time.

Time is precious.

But...

The expectation here is that...

None of us are going to survive...

No matter what.

The big question is...

How do we play the game?

Do we...

Offer ourselves as a sacrifice...

For the slaughter?

Or do we go out...

Like warriors?

This too is a very interesting debate.

And...

It seems like...

The further that we go...

Into the Bible...

The more that we're...

Trained into...

Self-sacrifice.

But...

This was not always...

The case.

The expectation was...

That you were to die...

On the battlefield...

As...

A willing participant...

Like a gladiator.

Does that mean that...

Jesus went out...

Without a fight?

No.

He turned over tables...

He caused...

A major scene...

At the temple...

Which is essentially...

The center of...

Religious life...

For people back then...

For people back then...

He told us...

That he came not to bring peace...

But a sword...

And I think that...

And I think that...

He sacrificed himself...

So that his message...

Would live on...

Like the ultimate...

Martyr...

If you will...

I think there's more to it...

Than that...

I think that...

Something happened...

Something happened...

After he was murdered...

And became something even...

More powerful than...

He was in his earthly form...

I think the discussion...

Of crossing over...

To the other side...

Is...

Probably best left...

For a future podcast...

What is on the other side...

What is behind the veil...

I think it's staring back at us...

In many different ways...

And we really have to be careful about...

How we handle that...

But essentially...

It's at the core of...

The famous saying...

We wrestle not against flesh and blood...

But against...

Spiritual wickedness...

There is definitely life...

Beyond the veil...

There is definitely life...

After...

Earthly death...

And crossing over...

Essentially...

It frees you from...

The ball and chain of...

Earthly living...

Having to sleep...

Having to eat...

Getting tired...

Etc...

You're no longer bound to...

Time and space...

Like...

A human...

And chances are...

A second can be like a year...

For some in the afterlife...

But...

What the afterlife is...

What heaven is...

What everlasting life is...

That...

Can take on...

Perhaps...

Numerous forms...

Again...

We'll get all...

We'll get back into all of that...

In a future podcast...

I really want to...

Give you something juicy...

In case we decide to reset...

And...

Redo...

The previous podcast...

Because...

The Jedi Training Academy...

Is essentially going to be...

One of the things that we continue to do...

As we evolve...

Online...

In...

Or with the general public...

We're in the process of...

Refurbishing...

A fake book page...

With a hundred thousand subscribers...

To turn it into a ministry...

And...

I think that...

All of the discussions on ministry work...

And what you should know about...

The Bible...

Will be found there...

And all of the advanced...

Ideas...

Such as telekinetics...

Will be found...

Over here...

Now recently...

We republished...

Or redid a...

A broadcast...

On telekinetics...

From the point of view of...

Government white papers...

And...

It should give you...

An idea of...

How serious this topic is...

Now...

Telekinetics in the hands of...

The dark side...

Essentially is witchcraft...

It is...

Referred to as...

Action at a distance...

What is...

Action at a distance...

It is...

It is the idea that...

Something can have...

An impact...

A physical impact...

On something else...

Without...

Regular kinetics...

Now when we think of...

Kinetic weapons...

We think of...

Bullets or...

Knives...

Blunt objects...

Things of that nature...

And of course...

That has evolved into...

Energy weapons...

And quantum weapons...

And that's something that we'll...

Talk about...

In a future podcast...

But...

The idea of telekinetics...

Is...

Is...

Like...

A magnet...

Two magnets...

That are...

Either attracting each other...

Or opposing each other...

If you've ever played with magnets...

You know that there's this...

Invisible force...

Invisible force...

Now there are other...

Invisible forces...

In physics...

That essentially...

Impact...

The physical world...

In the world...

We dare not speak of gravity...

Because that has become...

A controversial subject...

Like many other things...

These days...

But...

If you think about magnets...

That seems to be...

Something that continues to...

Hold...

Its own...

There is this...

Invisible force...

Now we try to explain it away...

As...

A magnetic field...

And this is why...

Magnets either attract...

Or...

Push each other apart...

But obviously...

There's something to that...

And essentially the mind...

Can reproduce...

Effects that are...

Something like that...

They can create...

An invisible...

Energy field...

That can have an impact...

On the physical environment...

How this works exactly is...

Somewhat mysterious...

But it definitely works...

It's not...

Always...

Enough...

To just kind of...

Think a thing...

But...

The difference between...

What we do...

And what they do...

Is...

That...

What they do...

What they do...

Is...

What they do...

Is...

What they do...

Is...

Well...

Gotta be careful...

When I say this...

Because truth is important...

because truth is important.

Witchcraft revolves around the dark arts,

and the dark arts is essentially the worship of the dark side.

And at times it can be very ritualistic,

like reading something from a spell book or something like that.

But their power is anchored in the dark side,

which means that it can really only affect those that are anchored in the dark side.

But our power and our authority is anchored, centered around our creator.

We're basically in that orbit.

Now witchcraft essentially is the product of rebellion,

which is the product of pride.

And I think this is kind of like an important idea to recognize.

Pride essentially leads these people astray

into a state of rebellion.

And in their state of rebellion,

they turn to

telekinetics,

or magic, if you will,

to supplement their

activities.

We on the other side do not

practice witchcraft.

There are no spell books.

There is no
act of rebellion.

rebellion.

And everything that we do is essentially in the pursuit of
justice,

like being a magistrate.

We recognize that we are not
the ultimate judge.

But essentially we're out there like
a type of law enforcement
handing out
tickets,

or something like that.

But these tickets aren't just like
the condemnations of a secular court in a way.

So,

hopefully that
describes the situation
to kind of help you through
what happens next.

Now,

you're going to be tempted,

just like I'm tempted

all the time,

to essentially take the blue pill

and just

eject
from Wonderland
to escape
the
rabbit hole,
if you will.
Had enough.
Want to go back to
living a normal life.
But
even if you try,
the dark side
isn't going to stop.
corruption
and
injustice
will continue.
It'll just continue
unopposed.
But there are times
when
you may need
to take a break
and
pause
and take care of

yourself
and take care of
what's happening
in the world
instead of
focusing on
attacking the enemy.

But
the smart thing
to do here
is to press on
with the attack.

So we're going to
talk about
attacking.

We're going to
talk about
what you need
to do
to attack
the enemy.

We've talked
about this
in bits and pieces
in previous
broadcasts.

Hopefully
we can try
and
summarize
all of that
here.

But
again,
you know,
this series
right now
is still
in its
experimental
phase.

I have
little doubt
that we'll
be
redoing
this series
over and
over again
until
it looks
like a

polished

stone

and that

it flows

real nice.

But

obviously

I'm not sure

if you can

hear that.

but I

must be

entering

the dark

side

of

the

wilderness.

And that

too is a

topic of

discussion.

Getting a

feel for the

environment.

Have you ever

been to a place

where you felt

like

it's creepy

where the

anxiety

kind of

ramps up

a little

bit?

usually

there's a

type of

synchronicity

that goes

with it.

But

essentially

you get a

good feel

for when

you're over

the target

or when

you're invading

enemy territory.

And that's
essentially
where
the battle
is.

In any
case,
getting back
to
telekinetics.

Look,
we've been
doing this
for so
long.

You know,
we could
totally unload
and all
sorts of
things and
really just
kind of
overwhelm
you with
ideas.

But
that would
be kind
of like
dropping
calculus on
an eighth
grader who
hasn't finished
algebra yet.
And while
some things
may stick,
other things
are just
going to fly
over your
head and
you're going
to forget
about it
and it'll
end up being
kind of
counterproductive.
And so

it's best
to kind of
nudge you
there
the best
way that
we can.

do it.

But what
have we
talked about
in
telekinetics?

We've
talked about
the idea
of focusing
energy
and
internal
energy
and
hitting
a target.

We've
talked about

cursing
the enemy.
We've
talked about
doing it
in a way
that isn't
like drawing
attention to
yourself like
gratuitous
windmilling.
You don't
need to give
a big sermon.
you know
and scare
everybody at
the store
while you
do it.
You know
it's basically
like a
double click
with a mouse

and it's
off to the
next one.

But
of course
I mean
when it gets
that easy
mistakes can
happen.

Innocent
people can
be victimized
and that
can blow
back in
your face
and blow
up on you.

So target
selection
tends to
be
an important
discussion.

We've

talked about

it.

You know

it varies

from place

to place.

but we

essentially

live

in an

environment

where most

people are

guilty

enough

of

something

that if

you hit

them

it's going

to stick.

It may not

stick for the

reasons that

you want it

to stick
but chances
are I mean
if you curse
somebody as a
Christian
it's going
to stick
because
people are
walking around
as like a
city without
walls.

The
ramifications of
cursings are
well known
well understood
tested and
tried through
time.

There's no
doubt about
it.

The question

is do you
actually do
that to
somebody?

And

look I'm
on a tour
of duty.

I'm you
know in a
battlefield
deep behind
enemy lines

but it's
not the
same thing

as
you know
living in
small town

America
where everybody
is just more
or less kind
of normal.

Not sure if

that really
still exists
out there
but I'm
just hoping
it does.

In any
case
target
selection
is a
prerequisite
you know
imagine
you've got
some kind
of
high powered
automatic
rifle or
something in
your home
you're not
just going to
bust that out
and start

unloading on
the general
public
but
if you
feel like
this system
is targeting
you for
extermination
and that
they are
in fact
gang
stalking
you
and
harassing
you
and
trying to
kill you
I feel
like you
do have
a right

to defend
yourself
and
so
my
situation
which is
much like
a zombie
apocalypse
situation
opening fire
on the
general public
is relatively
safe
in terms
of
telekinetics
I mean
they're just
pretty much
all zombies
anyways
but
not every

place is as
bad as
this one
so
we've
talked about
the basics
of
energetics
which
essentially
is
trying to
get a
handle on
the energy
that's
flowing
through
you
and
harnessing
that
and
also
exploiting

that
principle
in other
people
we talked
about
spiritual
vampires
doing it
and
you know
how they
basically
feed off
of your
energy
is
well
it can
it can
come through
a variety
of
mechanisms
you know
they may be

using their
mouth
their nose
their eyes
their hand
or their
midsection
it just
kind of
depends on
how developed
their
skills are
we've
talked about
picking up
that weapon
and using
it
as well
this is
guerrilla
warfare
but this
isn't
witchcraft

essentially
you know
it's like
going to
burger king
and having
a whopper
or something
you know
you see
somebody
of the
dark
side
you decide
that
you know
you might
as well
just
take their
resources
and use
it for
yourself
now of

course
this brings
up the
obvious
discussion
about
what happens
on the
battlefield
what happens
in a war
we know
that
we are
called
to not
kill
to not
steal
to not
covet
and
obviously
in the
bible
when

Moses
and the
gang
is
essentially
taking over
the promised
land
I mean
they went
out and
just killed
everyone
including
little
children
they wiped
out the
enemy
so
the idea
of
you will
not kill
obviously
must not

apply to
a time
of war
and you
will not
take
resources
from the
enemy
must not
apply
in a
time
of war
but
you have
to be
careful
about
this
the
wicked
will not
be justified
we're not
talking about

going into
people's
homes and
taking their
belongings
we're not
quite there
yet in
terms of
the war
it's not
a hot
war
it's
a cold
war
and so
basically
cold war
rules apply
but if it
ever does
become a
hot war
we do
know that

Moses and
the gang
not only
wiped out
people
but took
out
you know
took their
belongings
as
as
loot
so
if it
does
become a
hot war
then that's
something that
we can
think about
but in the
meantime
we should
try and

stay as
virtuous as
possible
I mean
it's almost
really kind
of
counter
intuitive
you know
as I'm
talking about
stealing
people's
energy
from them
for later
use
or to
you know
curse
people
and so
much more
in fact
there's so

much more
that
we'll be
talking about
look
warfare is
ugly
it's an
ugly
business
I don't
enjoy it
I do
it because
it's like
a defense
mechanism
it's a
built-in
defense
mechanism
that most
people have
either forgotten
about
or are

just

you know

totally

oblivious to

the fact

that it

exists

so

you have

to be

careful

about

how you

think

about

this

and

you have

to be

careful

about

you know

what you

do

what's

and what

ends up
being more
clear
and hopefully
this is
something that
you will
see in the
relatively
near future
is that
when you're
attacking
what appears
to be demons
and devils
and maybe
even aliens
or something
like that
it tends
to be a
little more
or a little
less
controversial

when you
really see
the enemy
for what
it is
out there
attacking
it seems
to be
less
controversial
is it
the right
thing
to do
that's a
debate
that you
should always
have
it's a
debate
that I
always
have
myself

I
have
mixed
feelings
on
you
know
is this
the right
direction
I really
have to
be honest
and I
hope that
it's something
that
you all
think about
as well
before I
get into
the juicy
stuff
and I
still got

a little
bit of
time on
this
nature
walk
so we'll
get there
I'm not
sure what
it's like
listening to
these things
because right
now I don't
really have a
whole lot of
time to
proof them
or to go
back and
listen to
them like
I used
to
you know

usually they
end up being
pretty you
know interesting
but
before we
get into the
juicy stuff
let me tell
you one of
the things
that I've
experienced
and I've
experienced
many many
you know
different
paranormal
supernatural
things
especially in
the past few
years
I think
we'll talk

about that
too like
you know
penetrating
the veil
but
I'm just
going to
describe it
as this
for the
time being
we'll get
into more
detail about
what this
is
essentially
but early
on in the
campaign
and this
is a war
that's been
that's picked
up in the

last year
and a half
or so
but early
on in this
campaign
where things
really became
like beyond
supernatural
like basically
in your face
laughing at
you
I was
conducting a
session
now a
session
essentially
is
eyes
closed
you're
targeting
the

evil
in
the
invisible
world
essentially
it's a
collection
of
skills
put
together
to make
a
sophisticated
product
it's kind
of like
modern
technology
in a way
if you look
at a car
there's
the engine
there's

the
GPS
there's
the radio
there's
all sorts
of technology
that's kind
of built
in
we just
kind
of call
it a
car
so I'm
just going
to call
this car
a session
but this
session
basically
involves
the application
of a

multitude
of ideas
and skills
into a
focused
attack
on the
dark
side
so
basically
eyes
closed
I'm
having
a session
and that
sounds
you know
it almost
sounds
well
it could
sound
like a
lot of

things

you know

I'm having

a session

but

basically

I'm

out in

the

wilderness

I'm

in

the

car

it's

a

choice

location

behind

me

is a

church

and

in

front

of

me
looks
like
a
village
of
the
dark
side
and
you know
between
the village
and the
church
there's
a river
and a
bridge
and this
is like
European
style
old
medieval
bridge

something
like that
cobblestone
etc
etc
and
there's
some
graffiti
on the
bridge
but it's
like
alien
graffiti
and
in my
experience
and
we could
talk about
this
for quite
a while
but
one of

the things
that you'll
encounter
eventually
is going
to be
an entity
something
like
a
gray
alien
what it
is
is hard
to say
it looks
like
the
stereotypical
gray
alien
but this
thing is
like
on the

telekinetic
battlefield
is it
real in the
flesh
somewhere
projecting
or
is it
you know
just some
kind of
disembodied
spirit
that used
to be
a living
creature
is hard
to say
but
essentially
when you
see alien
graffiti
it's

like gang
symbol
for
telekinetic
activity
like the
people around
there are
heavily
influenced
by
demonic
forces
so
essentially
I was
sitting at a
crossroads
in between
the church
and
this is like
an old
school
you know
church

European
church
out in the
middle of
nowhere
basically
but
a significant
structure
so in
between
the church
and
you know
this
demonic
village
of the
damned
so I
find this
little
parking
spot
I
basically

put myself
into
sensory
deprivation
mode
which is
basically
you know
reclining
the seat
or going
into the
back seat
you know
laying down
best you
can
cover the
eyes
the best
you can
with a
hat
or something
like that
so that

basically
your
vision
into
the world
of the
unseen
is
undistracted
by
sunlight
and the
light
so we've
talked about
this
in some
of the
broadcasts
on the
main
channel
we'll
talk
about it
you know

more
you know
in the
future
as far as
how sessions
are conducted
and everything
that goes
into it
but
I'm having
a session
and I'm
just
unloading
on the
enemy
and I
know that
sounds
you know
it sounds
like a
science fiction
kind of

thing

but

you'll see

it for

yourself

if you

get there

I'm

unloading

on the

enemy

and

basically

you know

the enemy

appears in

many different

ways

and

you know

sometimes

you're looking

at

individuals

sometimes

you're looking

at
structures
sometimes
you're looking
at
well
let's just
leave it at
individuals and
structures for
the time being
because I
don't want to
spend a whole
lot of time
on specifics
but
there's a
wide variety
of
entities
out there
all sorts
of
forms
and

basically
you know
it ends up
being a
little
repetitive
kind of like
a video game
in a sense
where you're
just
you know
shooting the
enemy
and we'll
talk about
you know
how you
shoot the
enemy
and you
know
what
that is
supposed to
look like

but
you know
we've kind of
given people
previews with
the sword of the
spirit
as a way to
focus your
projections
into
the battlefield
it's almost
like a
cyber war
except that
it's not
cyberspace
that we're
invading
it's some
kind of
fifth dimension
or second
heaven
that's as

you know
detailed
of a
description
as I'm
going to
be able
to give
right now
now
as I'm
conducting
this session
and as
I'm
unloading
on the
enemy
you know
in my
car
now from
the outside
what does
it look
like

it just
looks like
some dude
taking a
nap
more or
less
in his
car
there's
you know
there's
nothing
strange
about it
what's
strange
is
what's
happening
in your
mind
okay
but from
the outside
looking in

it just
looks like
some dude
taking a
nap
but
it didn't
take long
for the
message
to reach
the village
of the
damned
just on
the other
side of
the river
and of
course I
could see
this village
it was
like you
know maybe
you know

a quarter
of a mile
away from
where I was
parked
I mean you
could basically
see the
whole village
well look
it didn't
take very
long for
the village
of the
damned
to get
the message
and all
of a sudden
you know all
of the
proxies
like a
zombie
apocalypse

just started
like emerging
out of their
homes
finding excuses
to come my
way
and this is
like a small
town a
tranquil little
spot
you know
there's not
a there's not
a whole lot
of traffic
going on
but here
comes you
know out
of the many
people that
end up you
know trying
to come in

and disturb
your session
basically
physically
right
they can't
do a whole
lot
metaphysically
in a
situation
like that
especially
if you
change
your
spots
because
for some
reason
basically
they you
know they
can attack
your residence
real well

because it's a
fixed location
but as far
as you
know if you
move around
and you
become mobile
it becomes
more difficult
for them
to target
you with
directed
energy
weapons
it's not
impossible
I mean if
you park
right next
to a cell
tower
you're
definitely
going to

feel it
excuse me
but if
you're
you know if
you go out
in the
wilderness
and do
this
this is a
problem for
them
and so what
they do is
they dispatch
proxies or
drones to
basically
physically tap
on your
window and
be like
what's
going on
and

essentially
that's
what I
got now
what I
what I
where I
parked was
this little
parking lot
next to the
river in
between you
know the
church which
is kind of
like up on a
little hill I
mean I you
know I might
have to do a
future broadcast
so you can see
the location on
it but
you know this

little parking
lot you know
isn't next to
a house or
anything
but it does
have like a
couple garbages
garbage bins
for you know
campers or
you know
something like
that so
let me just
kind of like
you know fast
forward here
because otherwise
I'm just going to
take forever
talking about
this one little
scene so I'm
just sitting there
conducting a

session attacking
the enemy I'm
in a choice
location and
you know all of a
sudden I kind of
like you know open
my eyes just to
kind of see what's
going on you
you have to
you can't forget
about situational
awareness especially
you know after I
tell you what I'm
about to tell you
but
essentially I open
up my eyes just to
make sure like you
know everything's cool
and I see this guy
coming from the
village on his
bicycle

never going to
forget this one
and as he's
coming as he's
crossing over the
bridge you know
there's like this
red flare to him
and you know you've
probably seen people
that you know have
like hypertension or
high blood pressure
and they just look
like you know
they're like red like
a demon or something
like you know and
you just say to
yourself oh this guy
is kind of like you
know he's got he's
got the high blood
pressure or something
well this guy was
actually kind of like

giving me a flash of
red as he's crossing
over the bridge and
so and something told
me like you know
this guy's going to
be trouble and so
you know I basically
you know sit up and
just kind of pretend
like I'm you know
making a phone call or
something like that
and the guy stops you
know at this parking
lot and he's and he
opens up a garbage he
doesn't have any
garbage with him he
just opens up the
garbage bin it's like
you know these bigger
garbage bins it's not
like a little teeny
one and he opens up
the garbage bin he

starts he's looking
inside like you know
like he's gonna start
rummaging in there and
I see him like taking
deep breaths like it's
oxygen for him I'm like
this is you know this
yeah this guy's a you
know a piece of work
you know is what I'm
thinking to myself and
then he moves over to
the next garbage bin and
does the same thing at
least breathing it in
like it's just like a
like it's roses or
something or like you
know brownies or
cookies right out of
the oven you know he's
just like loving it like
fresh air and I'm like
man and then he doesn't
stop there though then

the guy you know you
might you know obviously
at first glance you're
thinking yourself oh this
guy's you know he's got
some issues and then you
know he starts to loiter and
he starts you know wanting
to talk to me you know but
you know in a way that's
like real intrusive like he
wants to make his
presence felt and you
might be thinking to
yourself like you know
well you know there's
there's a lot of mentally
ill people out there but
you know out here you
don't see that many
mentally ill people I
started talking with them
and the guy had his his you
know his brain together in
fact it seemed like you
know he was somewhat of an

intellectual which is even
you know more disturbing
when you think about it
because he wasn't like you
know displaying the the
symptoms of like you know
the classically mentally ill
people that you would find
like at a bus stop or
something so this guy wasn't
mentally ill but he was you
know kind of like some kind
of psychopath but
basically you know the
message that was
communicated was like you
know get moving and you
know I did my best to be
like you know polite and
like yeah well thanks for
you know stopping you can go
now didn't want to leave
man I mean basically I
really had to insist but it
was a scary situation I
mean I was looking for my

you know for my other
methods of protection
because it felt like this
guy could you know
basically act out it was
that bad and again you
know I was just sitting
there now you know this
isn't like downtown Chicago
or you know San Francisco
or New York or something I
mean this is real small town
no crime no nothing and you
know I'd been living in that
region for quite some time
never experienced anything
like that really atypical
but this is the kind of thing
that shows the relationship
between what's happening in
the spiritual world and the
physical world and we say
that a lot like you know the
spiritual world but it's a
location it's somewhere on the
map what map and where this

location is is kind of a
mystery but we're going to get
into that but attacking the
enemy in the spiritual world
has ramifications in the
physical world it's like you
know they're screaming for
help and and they're they're
asking for reinforcements and
essentially it ends up being
like you know they activate all
of their assets and it's you
know constant cat and mouse kind
of kind of situation you know
with electronic weapons and
military grade weapons and all
sorts of things so it is quite
the experience but the idea is to
get you able to get to that level
and you know I think that's kind
of easier said than done
but you know when you start
encountering the enemy and the
paranormal and seeing beyond the
veil it's all the more reason to
have a strong foundation in the

Bible because otherwise I mean the things that you'll see will just shake you to your core and you know you just won't be back so I'm really trying to prepare you mentally for the battlefield and there's really nothing that you can say that will prepare you for what you'll experience there's nothing I can say that will prepare you for the experience you know either you're you know you're up for it or you're not so now let's kind of get to the juicy stuff so what is the session all about how can we kind of put this all together in kind of like a brief summary obviously we have to follow up with you know coaching if you will but and look I mean we've kind of talked about this in in the bigger scale and previous broadcasts I'm not sure if you caught them or not we'll try to find them or republish them on the telegram in the relatively near future so I think all of those

broadcasts offer some kind of insight
but essentially there's two worlds
and we've you know again we've talked
about this there's the world of
everything is skin deep the physical
world and then there's what's beyond
it

and we're basically adapted to handling
stimulus from the physical world kind
of like how we're adapted to looking
at people on their outer skin but if
we could peel away the skin and all of
a sudden see kind of like you know the
layers like an MRI scan underneath it I
mean you know we'd probably be really
freaked out you know if all of a sudden
you know people were just like you know
with their skin removed and you could
see all the veins and the blood and
everything I mean you would just freak
out I mean it's just you know it's
just too much to handle and you know
the rest of the world is kind of like
that too like everything that we see is
basically the outer skin and there's a
set of enemies that are basically

protecting the outer skin and then
there's a set of enemies that are
behind the skin kind of like an immune
system
now the trick is being able to see
beyond the skin seeing beyond the veil
without like freaking out
now some people will kind of like get
this gift or talent naturally by having
some type of near-death experience and
usually the older you are the closer you
are to graduation i.e. death you know the
the easier it'll be for you to
pierce through the veil I think it's
extremely difficult for young people to
see beyond the veil because you know
they're not anywhere near there yet but
the older you get the easier it becomes
and if you have some kind of near-death
experience then chances are you know it
ends up being pretty easy for you
otherwise you basically have to train
your mind to go there and as Christians
you know we're basically halfway there in
the sense that when we say our prayers
we're connecting to that world we're

connecting you know deep into that world

real deep

now

classically speaking

you know when people you know say

their prayers they usually close their

eyes

and they're projecting their thoughts

into the world of the invisible

now that's from our perspective in the

sense that you know we can't see them

with our naked eyes

we can see them with the hardware that

we have in our brain

you know again with proper training and

this begins by closing your eyes

and so the activity really happens when

you close your eyes now think about this

for a second

you know you think about your dreams

think about lucid dreams it's almost

like you're really there

right now you're not having dreams with

your eyes open

right you have dreams with your eyes

closed and so there's you can you

should know and I mean I think this is
like you know bombshell shaking you to
the core kind of thing you should know
that your brain is capable of all sorts
of things when your eyes are closed and
what you can experience with your with
your eyes closed can be as real if not
more real than this world can can be
it depends on the dream now the
question is what are dreams are dreams
just a figment of your imagination is it
just you know some kind of you know
fantasy that your brain is having is
your brain just like you know in
fantasy mode when you're having a dream
you know some people might say yes and
other people will say no other people
will say you know essentially when you're
dreaming you're really like either
connecting to something else or you are
someplace else like your soul is
someplace else I think that is
an interesting discussion
I'm not sure but I don't think that our
soul leaves the body if it did then you
know we wouldn't be alive I think what

happens is that we're connecting
somehow to another network and again we
don't really have a whole lot of time to
talk about this in this podcast but that'll
definitely hopefully give you something to
think about until we get to that topic
but the idea here is that when you close
your eyes intense things can happen now in
the most intense
way you're going to have a lucid dream and I
mean intense in terms of like what you're
seeing visually what you're experiencing
visually is intense it's not like okay if
you close your eyes right now what do you
see
nothing darkness okay that's the untrained
mind
when you train your mind you basically have
the capacity of a lucid dream in a wakeful
state but instead of dreaming you're
actually seeing something I'm gonna see if I
can be more descriptive but when you say
your prayers you close your eyes and you're
essentially trying to project your ideas to
the almighty like a cell phone call like
some kind of wireless communication so you

could imagine that that is like an audio
call but it is possible to have like a video
call
in a certain sense but for the most part we're
not given access to the almighty that way
however what we can access is locate
intermediate locations that are between us and
the third heaven this intermediary space is
referred to as the second heaven the first
heaven would be what you see in the sky above the
stars etc so behind the veil of the first heaven is
the second heaven and essentially they're kind of
like merged to a certain extent into one reality
you just can't see them but they exist in this
world as they exist in another world and it's
this intermediary world that the action is is
where the action is so look I've never tried to
really describe these experiences before I've
never tried to give a lecture on them for the
most part you know in a real meaningful way
we've done some broadcasts we've tried to you
know go there but it's difficult presenting this
this type of information in a way that that is
meaningful you know you know when Paul
writes about this you know he knew a man
whether in the body or out of the body he

did not know that went to the third heaven you
know when you start talking about that
you know it gets complicated
but essentially the Bible is sprinkled with these
types of events visions night visions and going
to places basically going to remote locations in
their minds and the best way I can liken this is
using the function of what happens in a lucid
dream in the wakeful mind and being able to go
there requires practice and training
now it's kind of like going to Disneyland in a sense or
Wonderland or you know hacking the matrix or something like
that you can do a lot of things while you're there while
you're in Disneyland I mean you can just go on the rides like
everybody else but our purpose for visiting Disneyland if you
will is is to catch the groomers that way you know Disneyland is a safe
place for everyone so that's kind of like the trick I mean and that's why
again having a strong background and faith is important because otherwise you
you know you might you know use these skills and want to commiserate or
communicate with the enemy and that is strictly forbidden and that's why
look you know talking about all of this is above top secret and beyond
dangerous because as soon as you start confronting the enemy on their own turf
and essentially what happens is that you're showing up as some kind of spiritual
projection that's probably the best way that I can describe it and what you're
seeing is a spiritual projection it's kind of like the matrix how they're
describing while you're seeing the projection of your mental self

you're seeing the enemy as they want to be projected and the enemy is seeing you as you're being projected not necessarily how you want to be projected because you may not have acquired that skill but essentially when you when you first start practicing you're gonna show up basically like a naked dude you know asking for trouble and the dark side is going to recognize what's going on they're like oh we've got a newcomer that's trying to you know either escape break free communicate or something I mean they're going to know and so if you show up you know naked looking for trouble I mean they're going to try and stop you out before you become a threat so that's why it's basically important that we really have a thorough discussion on all of this before you get ahead of yourself you know if we really start telling you okay this is what you do go out there and be a superhero I mean you're basically going to show up with a squirt gun trying to figure out how to get the safety off and these people you know are these things basically have you know all of the armaments excuse me all of the armaments that they've acquired over perhaps millions of years ready to steamroll over you and swarm you and swamp you and essentially eat you alive and so that's why it's really important that we go slow and talk about this because telekinetic warfare

is beyond anything you'll ever experience
and the pushback from the dark side
is on all fronts
and so you really have to mentally prepare for this like
jumping out of an airplane
you better learn how to pack your own chute
you better know the pilot real well
in fact
you know
you might as well fly the plane yourself and
and just have it land on autopilot or something
because
in this game you can't trust anyone
as soon as you go live
as
a Christian warrior
on the battlefield
you know
everything's going to start getting
real bad real quick
so I think that
essentially
we have a lot of groundwork
to cover
before people are ready
for sessions

I know I wasn't ready
I wasn't ready for what I was getting myself into
and
in hindsight
you know
I wish I could have gone
you know
to a Jedi Academy
Academy
so that
you know
the basics could be explained
before I open fire
because
like I said
I basically showed up on the scene
you know
like
Billy the Kid or something
you know
just you know
opening fire
on everything I could
and
and didn't realize
what I was in for

and in hindsight
it would have been nice
real nice
to get kind of like
A. a warning
and B. you know
have time to acquire
like shielding
and
other resources
to handle
or survive
the counter attacks
because I mean
you think you're just
going to go in there
you know
like a bank robber
or something
and just kind of like
you know
take the loot
and run
but essentially
I mean
these people will follow you

like agents in the matrix
and so
it's
it's a real bad situation
that's why
look
I mean
you know
this
training
is going to be
is going to take time
because there's a lot to cover
there's a lot of different angles
it's not just like
okay
you know
it's not like a tutorial
on how to put a video together
or how to make a phone call
or how to download an app
this is much more complicated
this is basically like
you know
getting you to a level
of being a brain surgeon

you know
through a podcast
that's basically like
the challenge here
I think I'm up for the challenge
but
all I can say is that
nothing is going to prepare you
for
what happens
as soon as you jump into the pool
and you know
I shouldn't be saying that
because you know
inevitably
I'm going to scare people away
people are going to be like
oh man
no
I'm taking the blue pill
yeah
I'm just going to quit
posting stuff online
I'm going to be like
all the other sheeple
people are going to tell me

to wake up
and I'm not going to want to
look
you know
there's a risk
associated with
you know
telling people
what I'm telling people
but essentially
to really
to really excel
to really thrive
as
a warrior
on the battlefield
you have to know
what you're getting yourself into
because otherwise
you're just not going to
you're not going to survive
it would be absolutely
horrible of me
to
you know
give you

tools

under

false pretenses

like

oh you do

you know

I could just be like

you know

you know

and maybe I should

maybe I should

just be like

okay you do this

this this

and this

and

you know

you're going to be

you're going to be a Jedi

and then just wait for

and then you know

either you're going to

sink or swim

but

I mean

that's basically

how I did it
you know
and
you know
with that pressure
of trying to survive
basically trying to
stay afloat
you basically
level up quicker
you know
if I tell you
okay
you know
if I really make
if I
if I soften the landing
for you
in a sense
you're going to
you're going to
stagnate somewhere
more than likely
or
you'll be
you'll be able to

prosper
long enough
see enough
action
to really excel
and
have
you know
at least some kind
of protection
that allows you
to have
somewhat of a
normal life
while you conduct
operations as
you know
members of the
resistance
in this
matrix
so
it's tough
this is the
toughest thing
you know

this is the
toughest vocation
out there
it's already
tough
being a
Christian
being a
regular
Christian
sitting in
the back
of the
church
trying not
to make
waves
because
the system
is going to
come after
you anyways
the system
is going to
kill you
just for

that
that's a
guarantee
but it's
it's basically
a part of
the test
you know
this is a
proving ground
and
you know
if you're
going to
get offended
and basically
surrender
at the first
sign of
trouble
then
you know
it speaks
volumes for
your character
you know

I feel bad
saying that
because I
think of
you know
the disciples
you know
I mean
they basically
all like
you know
made a run
for it
as soon
as you
know
as soon
as the
Romans
arrived
and
you know
and I
don't want
to say
that they

didn't make
it because
I mean
they were
all killed
and martyred
and
and you
know
they went
through a
lot
and of
course
their work
you know
was
you know
necessary
for the
church to
get going
and so
I don't
want to
take anything

away from
them
I mean
they paid
an ultimate
price
and they
had a
tough
time
and they
did their
job
you know
but I
think that
as things
have evolved
now we
have a
better
understanding
of what
we're up
against
and I

think that
we're called
to do
more than
just
you know
walk the
plank
I think
if we're
going to
walk the
plank
I think
if we're
going to
be killed
for being
Christians
then
let's do
some damage
maybe that's
counterproductive
maybe that
just adds

fuel to
the fire
I don't
I can't
say for
sure
what I
can say
for sure
is that
it really
seems to
piss them
off
and it
feels pretty
genuine
you know
maybe they're
just you
know
making me
feel that
so that I
keep going
you know

but

I feel

like I'm

on to

something

I feel

like there's

something

there

I

again

I think

that the

debate should

never end

whether this

is the right

course of

action

or not

is this the

right thing

to do

can we

really improve

on what

Jesus did
and
you know
when you
think about
what Jesus
did in terms
of casting
out demons
it was to
free people
so that they
could be
saved
you know
and he
told them
you know
now
basically
don't sin
anymore
right
otherwise
this is
probably

going to
happen to
you again
and so
the idea
of the
ministry
was to
save
people
and I
think that
you know
we should
never lose
that
focus
I think
that should
always be
a part
of you
know
what
we're
doing

and
taking
the fight
to the
enemy
you know
may or
may not
be a good
idea
you know
I've
like I
said
I've
experienced
some real
pushback
on this
and
you know
in hindsight
you don't
know
it probably
isn't a

really good

idea

but in a

war

I mean

how do you

win a war

I mean

you've got to

annihilate the

enemy somehow

and so

I'm not sure

if we're going

to get there

just through

evangelism

I'm not sure

if we're going

to get there

just by

casting out

devils

it's really

hard to say

at this

stage
of the
game
so
I think
that
this
conflict
will always
be with
you
it's never
left me
I always
think about
you know
maybe
not doing
anything
or not
doing this
is better
than doing
this
and I've
tried

you know

like

I haven't

tried real

hard

but I've

tried

basically

not engaging

the enemy

this way

for periods

of time

just to see

what happens

but

it's kind

of inconclusive

I really

haven't

you know

I really

haven't been

able to

tell

if it

makes it
better or
worse
it's hard
to say
so
you know
I'm pretty
much going
to have
to leave
it there
you know
I'm not
making the
best sales
pitch on
this
because
look
I kind
of feel
like
Captain
Kirk
on the

Starship
Enterprise
going
where no
man has
really gone
before
I know
what I've
experienced
is real
I know
I've
basically
made
contact
with things
that are
just
you know
not in
the textbook
and I've
engaged
an enemy
like

you know
like the
Borg
or something
and
from the
looks of
it
this looks
like
the biggest
threat
that humanity
has ever
faced
and it
looks like
it does
look like
some kind
of science
fiction movie
like an
alien invasion
or something
it looks

that
serious
and
my feeling
here is
that
things are
going to
get much
much worse
for humanity
and
it seems
only logical
that we
fight
to try and
to
live on
the
alien acontece
them
and the
population
eventually
they regrouped and they fought back.

And that's basically like, you know,
the plot to every alien movie.

So I feel like it's kind of natural,
it's only natural that we fight back
to try and survive.

I feel like, you know, this option cannot be
dismissed or neglected.

No matter how conflictual it is with,
you know, our Christian ideology.

And that's why I think I go back to the Old Testament a lot
because there's precedent there
for destroying the enemy.

So much more than in the New Testament.

The New Testament isn't really about,
you know, let's destroy the enemy,
but there's definitely hints of it there.

And in closing, I mean, it seems like a lot of
the New Testament Gospels were written
under the influence of the Roman Empire,
which means that, you know, perhaps they weren't able
to tell us everything that they wanted to tell us.

You know, and chances are,
many things were probably censored
because they were too controversial.

I don't want to say that as a fact,
but I mean, you look at the current environment today,

you see the censorship out there.

And it's, you know, it's only logical that,

you know, censorship was happening back then too.

You know, we're basically still fighting the same enemy
that they were fighting 2,000 years ago.

There's nothing new under the sun.

So I feel like, you know,

what was able to come out in the New Testament
was probably censored to a certain extent.

And they knew the censorship was there.

And so the authors basically had to word it really carefully.

They had to choose their words really carefully.

And that's why, you know,

I think there's the big focus on the Beatitudes

and not the big focus on, you know,

the other things that are in the Gospels.

Like a man's foes will be, you know,

from his household or like, you know,

everybody is going to be, you know,

essentially betraying one another.

And it's going to be terrible times in the end.

And, you know, there really isn't a whole lot
of focus on all of that.

I came not to bring peace, but a sword.

I mean, you can look that quote up.

I mean, how many sermons have you seen

that talk about that?

I know I never got a sermon on that in Catholic Church.

Certainly not in private school,

Catholic school and all of that.

There was never a discussion on that.

Never.

But it's in the Gospel.

But it's chosen, the words are chosen in such a way.

You know, he says,

I came not to bring peace, but a sword.

Now, I mean, that's a real kind of like poetic way of saying,

I came not to bring peace, but war.

But you see how they choose their words.

And so I think a lot of the information that we find

in the New Testament is coded in such a way

that, you know, it would get through the censorship.

But I feel like this is the path that they want us to be on.

I feel that as much as I feel like, you know,

we should be helping the poor and preaching to, you know,

sinners and all of that.

I think we can't forget the original works.

I think we have to focus on ministry work.

That's why we're going to focus a lot of our time on ministry work.

As well as Stranger Than Fiction News,

as well as Jedi Training,

because, you know, it's necessary.

But I also feel like what I've experienced behind the scenes
is kind of like a natural defense mechanism
is necessary as well.

And I think, you know, when they talk about the sword of the spirit,
I think what they're really talking about is telekinetics.

You know, in Ephesians chapter 6.

And the sword of the spirit is essentially the projection,
the power of your mind to project weapons
into the spiritual battlefield
and even into the physical world.

I think that this is the big secret weapon.

One of the big secret weapons.

And, you know, we'll talk a lot more
about it because, you know,

the sword of the spirit is kind of like a double-edged sword.

And, you know, wielded the wrong way,

I mean, you know, you can victimize a lot of, you know, people.

But, you know, it takes a certain character
to be able to wield the sword of the spirit in any case.

But I think it's,

I think it's,
it becomes more clear once you see what it does.

And once you see what you can do
in that way.

And you'll realize that, you know,
what they're trying to tell you there

is more than just preaching.

But it's, you know,

it's a very dynamic idea.

There's a lot packed into

the sword of the spirit.

We'll get into that in a future podcast.

Again, you know,

we do appreciate everybody tuning in.

We're going to do a lot of,

you know, editing

and hopefully improvements

on this in the future.

Like I said,

I think that,

you know,

as tempting as it is

to fast forward

and just, you know,

push everybody into the pool

and say,

and, you know,

and really kind of get you there.

I think that

it's important

that we really kind of focus on

all of the little ideas.

All of the things that will help you
before you get into
you know,
full-blown spiritual warfare.
So you're going to want to build armor.
You're going to want to
get shielding materials.
You're basically going to want to
develop
a type of remote,
you know,
work environment
because, you know,
doing this
and going to work nine to five
is probably not going to,
you know,
end well.
They'll come to your work.
They'll come after your kids.
They'll come after everybody you know.
And, you know,
chances are
everybody you know
is already pretty much compromised
just waiting to doom you.

Chances are
they've been watching you
because you have that potential.

And as soon as you activate,
then they're really going to be
well-placed to attack you.

So, you know,
you definitely have moles
planted all around you.

It's almost kind of like
the movie Total Recall
in a way, you know.

All these people,
all your friends,
everyone around you
is basically just waiting
for you to go telekinetic.
and so they're already
positioned to strike.

And you basically have
and I have a responsibility
to prepare you
for the counterattacks
because,
you know,
getting you on the battlefield,

you know,

is easy.

Having you survive

is more difficult.

And it's kind of like

the idea of basic training.

Basic training,

you know,

in theory,

is at least nine weeks.

And so,

you know,

I should have all of you

basically marching,

you know,

every day,

training yourself physically,

forcing yourself

to go through,

you know,

kind of like

tough living conditions.

You know,

go sleep on the floor

for a week.

I mean,

I should be drilling you
kind of like fight club,
you know,
sleep on the floor
for a week
and then make yourself
get better.

You know,
try sleeping with,
you know,
minimum blankets
in the winter
at night.

I want you to suffer
a little bit
through the night.

I want you to
kind of do a Daniel fast.

You know,
I want you to do
camping for a month.
you basically have to eat,
you know,
stuff,
meals ready to eat.
No gourmet cooking,

no restaurants,
no fast food.
I want you to,
you know,
give up
pampering
and self-pleasure.
we really got to talk
about,
you know,
fornication
and pornography
and all that.

But,

I want you to give up,
you know,
all of that.

I want you to
really kind of
discipline yourself
for war.

Because that's basically
what this is about.

So,

you know,
a lot of people think,

oh,
telekinetics,
Jedi training,
you know,
ooh,
you know,
easy,
I can do this
and all of that.
But look,
I mean,
it's,
you know,
without the right
preparation,
it's like jumping out
of an airplane
without a parachute.
Yeah,
you can do it.
But,
you know,
the fun is only
going to last so long
before you hit the ground.
so,

it's really kind of

our job

to get you ready.

And so,

you know,

you need to be

thinking about

physical training.

If you're overweight,

you need to work on that.

If

you need to think

about mental training,

you need to think

about self-defense

a little bit

because

and you're,

you know,

physical safety

because

as soon as you

step on the battlefield,

I mean,

you're going to have

agents,

you know,
from the Matrix
jumping out of the bushes
trying to get you.

And if you're an easy mark,
you know,
they'll definitely get you.

You got to think about,
you know,
all sorts of things.

And so,
like I said,
we've got a lot
to talk about.

You know,
I like,
we could just jump
right into the juicy stuff
and just,
you know,
have you like figure out
the rest
for yourself.

Oh,
now they're poisoning
your food.

Oh,
now they're poisoning
the stuff that you get
at the store.

Oh,
now they're poisoning
the stuff,
you know,
that you like the most.

Oh,
now,
you know,
so look,
you know,
we could have you
figure that out
the hard way
or we could have you
prepare for that
mentally
and just basically
kind of get a shopping
list together
of things that you
need to
do.

so,

I'm being nice

and I'm going to let,

and I'm going to try

and prepare you

but,

you know,

I didn't get it so easy.

I had to learn

the hard way.

So,

most people don't

pick up on it,

they just think

it's them.

They go to the doctor,

the doctor's in on it,

they're like,

oh yeah,

take this,

you'll be fine

or whatever,

it gets worse,

oh,

it looks like we have

an issue,

you know,

blah,

blah,

blah.

So,

you have to remember

that we're dealing

with a hive mind.

They are legion

and just about

everybody,

and I'm not saying

that everybody is

but just about

everybody

that you'll encounter

as a Jedi

is

some kind of

proxy for the

dark side

and

essentially

you basically

have to force

your way

through

all the little

things.

Everything

becomes a challenge.

That's why,

you know,

we just don't have

the time

like we used to.

Everything

becomes a challenge.

Going to the store

is like raiding

the store.

And

once you're

on the battlefield,

going to the store

without armor

is basically suicide.

going to the store

without at least

a Faraday belt

is just

asking to get

taken out.

So,

they'll try and

deprive you

of everything.

They'll deprive you

of a job,

they'll deprive you

of family,

they'll deprive you

of a place to stay,

they'll deprive you

of your freedom,

they'll deprive you

of your ability

to go to the store

even if you're

somewhat,

you know,

financially independent.

they will make

everything difficult

for you.

You think you're

having it tough now?

I mean,

just wait until
you become a priority.
And so,
that's how you know
that,
you know,
whatever
I'm into
or whatever,
you know,
the good guys
here are into
is worth it.
Because when you
see the reaction
from the matrix,
you realize that
you're on to something.
and,
you know,
what it is,
we don't fully understand.
And hopefully,
look,
you know,
in a certain sense,

hopefully,
me and others
like me
are,
you know,
keeping this matrix
busy enough
so that
it'll give
you an opportunity
to grow and thrive.
but I would like,
you know,
I would certainly
like more people
involved.
So,
hopefully,
we'll get you there.
We're going to keep
trying to get
new recruits.
That'll be part of
the focus of the
new ministry.
You know,

we're going to be
doing a lot of
Bible study,
but we're going to be,
you know,
looking for new recruits
for the Jedi Academy.

And hopefully,
you know,
by the end of it,
the idea is to
graduate people
so that they can
perform.

And I think
the more people
that we have
attacking the enemy,
the better it is.

My feeling is
that it weakens them.

My feeling is
that it helps us out
as a species.

And so,
this is,

chances are,

I mean,

this was,

you know,

mainstream thinking

not that long ago.

But people have

just kind of

lost that connection.

They've lost touch

with that.

And instead,

you know,

instead of metaphysics,

it's just,

you know,

physics and chemistry

and the like.

So,

we'll leave it there

for this podcast.

Appreciate everybody

tuning in.

I hope it was,

you know,

more enjoyable

than the last ones.

I'm not sure

if I'm going to do

music on this one

because it's rather long.

And so,

you know,

my advice here

is for the time being

while listening

to these podcasts,

I mean,

don't listen to them

on headphones

because,

you know,

with this microphone,

you're just going to

pick up every little thing.

So,

there we go.

I'm not going to age long,

but I think it will turn
