

PART 2 - THE SHADOW WORLD, QUANTUM PHYSICS AND SHIELDING STRATEGIES (EPISODE 15)

Welcome back to Jedi Training. We're going to continue on with our conversation on the shadow world and quantum physics and shielding. We didn't have enough time last time.

The rain came in, shadow people started showing up. We'll talk about that. But the idea of the shadow world or shadow people is an important concept to understand because this is part of the enemy that we're fighting against.

And in the last broadcast we were talking about the real simplest form of this phenomenon, which is the shadow in broad daylight.

Now everything that we see in broad daylight is important. Nothing should be overlooked. Nothing should be normalized or ignored.

Every little detail matters because it's part of creation and we're meant to learn something from it.

And some things we just, you know, don't really think about because we feel like it's not important.

Not many people think about shadows, but this phenomenon is telling us something.

And the more you see beyond the veil, the more you're going to encounter the shadow world.

It's not the only thing you're going to encounter. It's just one of the many things in the buffet.

But it will lead us to more interesting conversations.

Now, shadow people basically show up at night or just before nightfall.

Now, nightfall is a very interesting idea.

Again, that's something that we kind of just take for granted.

But when nightfall happens, we're transitioning from daylight into darkness.

And so this is a big deal.

A hundred years ago or 150 years ago before electricity, when night hit, I mean, people were getting ready for it.

They got out the candles and, you know, the nighttime was just a huge deal.

You really couldn't see very far.

Everything was more or less mysterious.

And in the old world, I mean, it was just, you know, accustomed to see people out the door with your little candle.

But you can't imagine the misery of nighttime, at least how it used to be.

If you were cast into the outer darkness, outside of the walls of the city, or if you lived outside of the walls of the city,

the nighttime was just pitch black.

Very scary thing indeed.

But what you can pay attention to once you have eyes to see is that when nightfall begins, when that transition begins, you can actually see things essentially falling into your environment.

Shadow creatures of sorts.

It's like they move from dust to dawn, in a way.

They move out of the way of the light and rotate back into the darkness.

But you'll start seeing shadow people essentially kind of flicker into your reality when night falls.

Of course, you really have to be more or less outside of the city to experience this.

But there are reports of shadow people within the city limits.

But out in the country is a whole different world compared to what you experience in the city.

In the city, you're kind of oblivious to the world.

You don't even really see the stars anymore.

And you're dealing with a whole different sort of problems.

But shadow people are very real.

I've seen them basically just appear, materialize out of thin air,

lunge at you like some kind of...

Spider-Man nemesis kind of looking creature.

Claws.

Jagged teeth.

Very surreal.

But you'll see them also at a distance.

When night begins to fall.

Or at around dusk.

They'll just kind of flicker down the road.

You'll see them and they'll be gone.

And this is usually before nightfall.

They're like the first to arrive.

In a sense.

I've seen other forms of shadow people as well.

Lingering around...

Let's just say people of the dark side.

And they take many different forms.

What I've seen essentially...

Would be something that kind of looks like a devil.

In a shadow form.

And sometimes it just kind of lingers in the shadow.

You'll have to pay attention...

If you video with people.

You may see something like it.

In fact, these things...

Will travel through...

The internet.

They will travel through copper wire.

If you will.

But...

Their mode of transit might be something a little different...

Than just going through copper wire.

They might actually just be coming through the screen.

Because the screen...

Represents a window.

And this is something that we'll get into...

In a future broadcast.

Can't wait for that one.

But essentially pictures, videos...

Screens of all sorts...

Are like a window into a different place.

And...

Essentially they act like...

A type of quantum bridge.

I suppose this is a...

Good way to transition into...

Quantum physics.

At least to talk about...

Some of the things that we didn't get to talk about.

On the basic level...

Quantum physics is really...

The attempt to understand...

The very basic components of matter.

You've probably heard of places like CERN...

Hadron colliders.

How that works.

Essentially...

You know...

The atom smashers...

Trying to figure out...

What makes these things work.

It's kind of like...

Unleashing a bull in a china shop...

And trying to figure out...

What makes the china work.

But...

Along the way...

They seem to have discovered...

Other interesting phenomena...

Such as...

Quantum entanglement.

And...

Teleportation.

And so we could get...

Into...

The nitty gritty of those experiments.

But essentially the idea is that...

Sometimes things pair up.

And...

What affects one...

Can affect the other.

It's almost like a twin...

Kind of syndrome.

And of course...

Of course...

There's been experiments...

Where they...

Suggest that...

Teleportation of photons...

Is possible.

And it feels like...

We're skipping over a lot of...

Things when it comes to...

Quantum physics.

You know...

All these different types of...

Subatomic particles...

And the like.

What is a quark?

What is a photon?

What is an electron?

bardzo...

So...

But a photon is kind of like a mini-electron.

Supposedly it is...

like a wave and a particle. It is photoelectric, that's basically how solar panels work, and so photons can actually generate an electrical current. Enough

photons will energize an electron, will bump it up to a different energy level and can affect the chemistry and physics of molecules and the like. It's an interesting subject, some of you may have already researched this or looked into this, but if we kind of get past all the elementary quantum physics and we think about entanglement, we think about teleportation, and if we think about the effect of the observer, this is another well-known famous experiment where they're shooting photons or electrons through like a steel barrier with little slits to measure what actually comes through in the pattern, etc. to try to determine if it's a particle or a wave and it seems to change if there's somebody actually watching this happen. And so all of this kind of, you know, coalesces and comes together in the field of telekinetics, mind over matter, the observer effect, teleportation, entanglement, essentially having an effect on things that are not right in front of you through the power of your mind.

But essentially, advanced quantum physics, or let's just say technology of an advanced civilization,

teleportation, opens up the possibility to more than just the teleportation of photons. We could be

looking at the teleportation of objects, people, and so much more. And this is something that you

really have to be on the lookout for because we highly suspect this is happening on planet Earth.

We'll get more into that when the occasion arises. But telekinetics is different than, say, transporting

a person from one place to another.

But one of the reasons that we're bringing this up is that the weapons of the enemy can essentially

transport a weapon station into an empty place at night or whenever and transport it out if someone is coming to inspect that location.

And so empty places, dark places, can become weaponized rather quickly.

It's just one of the many things that you basically have to consider in this war, in this conflict.

Incoming fire can come in from basically all directions.

And most of it is invisible in nature.

Very rarely do you actually see a ripple effect or a ripple of energy coming across a field or a plane or a location. But it can happen. I've seen it.

Something like the movie *Minority Report*, where they're using this kind of futuristic shotgun that puts out like a sound wave or something, where you can see the ripples in the air.

I've seen technology like that.

But most of the time, you're not going to see where the attacks are coming from.

With a bit of training and a bit of experience, you can kind of get a general idea of the direction that it's coming from.

But for the most part, you really can't go to that location or into that location to inspect or to burn it down or what have you.

And it would change very little because essentially the weapon systems that we're up against are redundant in nature.

So, for example, you can have one in the apartment next door or the building next door.

And down the street, the cell tower, the plane, the satellites, and other forms of platforms.

Instead of UFOs, we'll just call it hot air balloons.

But, and there's even drones.

So, essentially, taking out one cell tower or shielding a router or shielding whatever you want, for the most part is only going to help a little bit.

And so, shielding becomes important and it has to be robust.

It has to be pretty much complete.

Because this enemy will find the gaps, it will find the weak points.

But before we get into shielding, let's think about what else we might add to quantum physics, especially when it comes to telekinetics.

Eventually, you're going to use these principles of the observer effect, teleportation, and entanglement

as means of attack, especially through various windows or representations of your target.

And so, we might talk about that a little bit.

But, before we do,

it's really important that you really get the basics out of the way.

Because without the basics,

you're really not going to get anywhere.

You're not going to get very far.

And so, you have to think about how you're going to survive if you enter the battlefield.

That is, essentially,

the most important thing to think about before going any further.

Because, if you open this door,

and you go through it,

and you're not ready for what's on the other side,

you're not going to survive.

Nobody's going to hear you scream.

And nobody's going to be able to help you.

Period.

For the most part.

Now, generally speaking,

you're not dealt more than you can handle.

But,

many people have been taken out,

and they certainly weren't participating in Jedi training.

So, opening your mouth on the internet is enough to be targeted.

And,

so, if you're basically online,

trying to be a truther,

you're at risk.

And so, you know,

whether or not you decide to go into telekinetics,

give it a try,

if you will,

you probably want to pay attention to

getting the basics right.

And,

first and foremost,

I mean,

know the Bible by heart.

Old Testament over New Testament.

The older is more important.

The first is more important.

By far.

And,

you know,

Jesus came preaching the Gospels of the Kingdom,

which is the Old Testament.

That's what he was preaching.

He wasn't preaching the letters of Paul.

He wasn't preaching

any of the epistles.

He wasn't preaching the Acts of the Apostles.

He wasn't preaching

the Romanized

Catholic doctrine

or

any other,

let's just say,

New Age

Christian doctrine.

The only thing that Jesus was preaching

was the Old Testament.

He was teaching in synagogues

and

nothing that he preached

in Matthew,

Mark,

or Luke

deviated from that.

John is another story.

We'll get into

the enigma of John,

which is tougher to figure out.

You really have to be

a really advanced

religious scholar

to ponder the problems

with the book of John.

Not saying that it's
all problematic,
but essentially
we're given a nice cocktail
and a lot of things
to think about.

But if you think about
Matthew, Mark, and Luke
and what Jesus was preaching there,
it's the Old Testament.

And so we're going to keep
coming back to that.

It's kind of
unpopular for Christians,
but
it shouldn't be.

It shouldn't be
controversial
and

to be honest,
it's a fundamental
requirement.

And so you really have to
understand the lessons
of the Old Testament
and

live by them.

So,

you have to know it by heart,

you have to think about it,

and you have to live it

the best you can.

And I'm not saying

that any of us

are going to be perfect,

but

that's essentially

our roadmap

to success.

Without it,

you're not going to

really get anywhere

whether it be

in this life

or the next.

And so,

Jesus warns us

clearly

that unless you know

the Scripture

better than the scribes

and the Pharisees,

you're not going to
make it into the
kingdom of heaven.

And you're not going to
be a warrior
for the kingdom.

And so,
don't think that
you can get saved
and live like a devil
and it's going to be okay.

There's a lot of people
that,
you know,
preach a doctrine
of being saved
and
that's all that matters.

And all I have to say
is woe to those people.

But,
look,
we're not going to
spend a lot of time
criticizing other
denominations

right now.

But,

if you want to be

a Christian,

then you have to do it

the way Jesus did.

And that should be

real easy

for people to understand.

Without it,

you're not going to

make it.

And you're

definitely going to

need to be

saved by grace.

And that comes

when you reach

your limits of works.

When you can do

no more

humanly possible,

that's when

the miracles come.

But you really

have to be able

to do everything
that's humanly possible.

So,

listen to
the Old Testament
KGV

dramatized version
over and over
again until you
know it like
your favorite song.

Go on nature
walks,
think about it.

We're going to
be covering
the Bible
eventually
in a ministry.

and we'll
try and help
you
the best
we can.

But there's
a lot

to unpack
in essentially
every verse
in every chapter
and you could
spend
literally
an hour
thinking about
every chapter
at least.

What is the
meaning here?

what's really
going on?

And

you know,

we could

spend time

here and

talk about

you know,

some examples

but

I think we'll

save that

for
the Bible
study
when that
comes around.

But you
basically have
to live
a virtuous
life.

I mean,
you know,
we're starting
to sound
like a broken
record
over and
over again
but
you know,
you gotta
ditch a lot
of your
bad habits.

The fornication,
the

idle talk,
the blasphemy.

I mean,
that's a big
one.

If you're
using the
vernacular
of the
heathen out
there doing
the OMGs
and the
like,

I mean,
you're just
not gonna
make it.

You just
do not
understand.

And,
you know,
trying to
justify that
is even

worse.

Oh,

it's not

what you

think it

means.

I,

you know,

I don't

mean it

that way.

You know,

forget about

it.

You're done.

You're done.

It's over

before it

even began.

So,

you have to

discipline

yourself.

It takes a

disciplined

mind.

And,
you basically
want to
train your
mind,
your body,
and your
soul.

Every day,
the best you
can.

Go out there,
get some
physical activity.

Strengthen
yourself.

And,
grow,
mentally,
physically,
and spiritually.

Be spiritually
clean.

Understand what
makes you
unclean.

Be charitable.

Be nice.

Be all of
those things
when you
can be.

But,
in a war
zone,
you don't
always have
that opportunity.

Hopefully,
you had that
opportunity
as a young
person.

You know,
back in the
90s or early
2000s when we
were still living
in a somewhat
normal world.

Now,

I mean,

it's just,
you know,
it's real
difficult.

And,
you know,
I'll point you
towards the
parable of
the Good
Samaritan.

Somebody asked
Jesus,
you know,
who is your
neighbor?

If I'm supposed
to love my
neighbor like
myself,
who's my
neighbor?

You know,
that was the
question.

And,

you know,
Jesus gives
a real frank
answer.
essentially
says that
your neighbor
is like
the Good
Samaritan.
Be like
that guy.
But the
answer to
the question
was the
Good
Samaritan.
Who is
your neighbor?
The Good
Samaritan.
So,
if the devil
lives next
door,

that's not
your neighbor,
that's the
enemy.

And recognizing
the difference
between your
neighbor and
your enemy,
is a big
step in the
right direction.

Now,
look,
I mean,
you can try
and save
these people,
you can try
and be nice
to these
people,
but from
their point
of view,
you're their

enemy.

It's just

the way

wars work.

Imagine if

we were at

war with the

Japanese again

or something

like that.

You know,

all the

citizens of

Japan are

going to be

at war with

us,

it doesn't

really

matter

if you

like them

or not,

or you

think they're

cool or

not,
or whatever.

At the
end of the
day,
these people
are at
war with
you,
and as
soon as
you have
your back
turned,
that's when
they're going
to turn on
the energy
weapons,
or something
like that.

So,
understanding
that concept
will get you
pretty far as

well.

Know thy
enemy,
know the
difference
between your
enemy and
your neighbor,
but essentially,
once you
step onto
the battlefield,
you really
can't trust
anyone,
and just
about everyone
that's around
you is going
to be your
enemy.

It's not an
absolute,
but generally
speaking,
that's basically

the way it
is,
and many of
you can
already kind
of see that
for yourselves.

So,
you know,
there's a lot
to do before
you really,
you know,
want to know
more about
telekinetics.

I mean,
we can kind
of,
you know,
throw you in
the pool,
like we've
said in
previous podcasts,
and just see

if you sink
or swim.
Once you're
fighting for
your life,
I mean,
you're going
to learn
real quick
what it
takes to
survive,
or you're
not going
to make
it,
but,
you know,
we're going
to offer
you the
benefit of
training wheels,
if you will,
just to be
nice.

Is it
really going
to be
helpful?
Maybe.
So,
know the
Bible,
be a
virtuous
person,
be spiritually
clean as
much as
possible,
and
train
yourself
physically,
mentally,
and spiritually
to go
through tough
times,
because,
you know,

we're already
there.

Many of us
are facing
tribulation in
one form or
another,
and it's only
going to get
worse,
especially if
you decide
to participate
in the
spiritual war,
and we're
given many
tools to
participate,
so,
you know,
these talents
are there for
a reason,
these tools
are there for

a reason,
we're here to
intercede,
like,
you know,
in the days
of Moses,
if you will,
we're here to
fight the
fight,
so you're
going to have
to be ready
physically,
mentally,
spiritually for
that,
and this
essentially
brings us to
shielding,
I think we
better get into
shielding before
time runs out

here,
shielding is
a must,
and what
saved my
life,
when things
really started
getting thick,
was Ephesians
6,
13,
you know,
I've told
this story
many times,
but essentially,
in the winter
of 2020,
basically,
you know,
I really
started to
see beyond
the veil,
and the

boogeyman was
everywhere,
and I mean,
it was,
you know,
it was like
Twilight Zone,
it was like
Poltergeist,
it was like,
you know,
every scary movie
wrapped into
one,
and I was
getting attacked
non-stop,
day and night,
it was relentless,
it was violent,
it was an
obvious,
you know,
assassination
attempt,
and,

at first glance,
I thought it
was just,
you know,
energy weapons,
I thought it
was just
cell towers,
and,
you know,
hidden weapons
in apartments
or buildings,
you know,
nearby,
I really thought
of it more
of like a
secular problem
than anything
else,
and,
you know,
I tried every,
you know,
amateur idea

when it comes
to shielding,
you know,
aluminum foil
everywhere,
try grounding
it,
you know,
basically,
you know,
all directions
except the
ground,
essentially,
and,
just,
you know,
it just didn't
work,
I mean,
I tried so
much stuff,
it was ridiculous,
I tried putting
up shaft,
you know,

aluminum streamers,

you know,

anything to

try and

survive,

and for like

two weeks,

it was basically

impossible to

get any sleep,

as soon as you

laid down,

I mean,

it was just

the onslaught,

and,

I mean,

it was just

really,

really bad,

and at that

time,

I was living

in,

the address

was like

13 Avenue
of such
and such
building 6,
and,
you know,
like most
Christians,
you know,
we're well aware
of Ephesians 6,
13,
and it just
kind of hit me,
you know,
I need to,
I need to wear
the armor,
and so,
I tried my best,
you know,
just to put
something together,
it was basically,
you know,
a tinfoil hat,

wrapped tinfoil
around my midsection,
I put like
tinfoil in the
soles of the
shoes,
I put,
you know,
I basically did
everything,
you know,
got a shield,
helmet,
breastplate,
girdle,
shoes,
and it made
like a huge
difference,
like all of a
sudden,
like I could
stand the
attacks,
I could just
actually just,

you know,
survive,
and that's when
it really hit me,
like,
you know,
this is,
this is more
than just
physical,
and there's
other,
you know,
clues to that,
but,
it really kind
of opened,
it opened a lot
of doors,
it opened up
a lot of
ideas,
and,
again,
if it wasn't
for that

shielding,
if it wasn't
for that
passage in
the Bible,
I wouldn't be
here,
I just wouldn't,
there's no way
I would have
survived,
and not only
survived,
but I mean,
I could counter
attack,
I could,
you know,
move around,
and I could
escape,
because essentially
they pinned me,
you know,
as a honey trap
to go over there,

because there was
nothing to rent,
and I was desperate,
and I wanted to live
in the mountains,
and I was looking
for something,
and,
you know,
there was a few
apartments in this
valley I'd never
been to,
so they drew me
in there,
with,
you know,
places to live,
so I mean,
they try and control
everything,
and make everything,
like,
real difficult,
but they're like,
you know,

they drew me
into this place,
and it's like,
at the very end
of a valley,
in the mountains,
which means,
you know,
it's basically,
the river that runs
through the valley,
all the way up to
the peaks,
and I was like,
all the way at the
peaks,
and trying to get out,
was impossible,
they basically set up,
energy weapon roadblocks,
had I tried to escape
without armor,
I never would have
made it,
I could feel like,
you know,

the pulse rifles,
if you will,
just,
you know,
hitting me,
on my way out,
it was real bad,
we'll have to get more
into that,
apocalypse 2020,
but,
shielding is key,
and,
for starters,
you know,
making armor,
out of aluminum foil,
is the best way to practice,
you know,
before you can start,
with any other material,
you really have to practice,
on aluminum foil,
and what I can tell you,
is that,
you know,

one layer isn't enough,
and,
you know,
ten layers,
all facing the same direction,
won't work either,
because it acts like,
a lens,
it can,
I mean,
it can buy you some time,
but,
at the end of the day,
they'll adjust real quick to it,
kind of like the Borg,
they'll adjust real quick to,
what your strategy is,
and,
eventually,
it'll act like a lens,
like a,
like a magnifying glass,
and so,
you have to alternate,
the patterns,
and,

what we recommend,
is basically,
you know,
flipping it,
every two layers,
so that,
essentially,
you have,
two shiny layers,
on the inside,
and then,
a shiny layer,
on the outside,
and then,
kind of going,
back and forth like that,
the idea is to have,
the shiny layers,
facing each other,
and alternating,
that way,
it kind of acts like a,
like a jammer,
it reflects,
the wavelength,
and,

cancels the incoming,
energy,
of course,
you know,
that only works so well,
against military grade weapons,
and that's what we're dealing with,
advanced,
military grade weapons,
very advanced,
and so,
you know,
ten layers of foil,
alternating,
patterns,
will,
you know,
buy you some time,
it'll offer you,
some sort of protection,
and you can make a breastplate,
you can make a flak jacket,
you can make a belt,
you can make a girdle,
or shorts,
or pants,

out of that material,
or other materials,
and you'll want to practice,
I mean,
you can,
try and find,
you know,
some EMF fabrics,
online,
and the like,
cut it out,
sew it together,
but,
that will only get you so far,
it might be okay for,
you know,
going shopping,
because they will hit you at the mall,
they will hit you at the store,
they'll try and deprive you of everything,
they'll try to make everything,
a nightmare,
going to work,
going to your friend's house,
sitting at home,
going to bed,

everything will become a nightmare,
and you really have to experience it,
to believe it,
I mean,
hearing about it,
you know,
obviously kind of gives you cold feet,
and,
maybe even scares you a little bit,
but,
going through it,
is even worse,
and so,
like I said,
the,
you know,
the light shielding,
like aluminum foil,
like EMF fabrics,
you know,
might be okay for,
you know,
going from place to place,
in the city,
but it's not going to withstand,
you know,

an onslaught of attacks,
at your home,
while you sleep,
and the like,
but you're going to want to practice,
and,
you know,
we recommend making a flak jacket,
and so,
you basically do that,
using a tile system,
basically,
you know,
go find some cardboard,
that's about,
a foot wide,
and,
two feet long,
or so,
depending on your body size,
and,
cut it out,
so it's,
so it's a rectangle,
and then,
start wrapping aluminum foil,

and alternating patterns,
around that,
to make yourself,
like a nice little,
aluminum pillow,
if you will,
and you're going to want to use,
thick,
boxing tape,
so,
you know,
not just like,
you know,
normal tape,
but like,
the thicker,
the stronger,
the better,
and you can,
you know,
tape every layer,
or you can tape,
just the outside,
of the whole package,
it's really up to you,
but,

the more tape you use,
the longer it'll last,
you know,
aluminum foil tends to,
basically give way,
after a couple weeks,
you know,
of using it,
so you're going to want to practice,
making a jacket,
boots,
pants,
shorts,
a hat,
try to make it discreet,
so that you can wear it,
so that you can use it,
and then,
you're going to have to focus,
on shielding,
which is going to be,
a little more difficult,
and so,
the idea of shielding,
is going to be like,
a tile system,

as well,
but with heavier materials,
and we recommend,
sheet metal,
I mean,
you can find planks,
of sheet metal,
at Home Depot,
it's not,
too expensive,
but,
it isn't,
dirt cheap either,
like aluminum foil,
it's heavy,
it's dangerous,
got to be real careful,
with shielding,
you can cut yourself,
in a jiffy,
and,
we also recommend,
steel mesh,
wire mesh,
is,
you know,

in theory,
okay,
but steel mesh,
is even better,
finding it,
is difficult,
working with it,
is,
easy,
yet dangerous,
you're,
you're,
going to have to get,
some kind of,
metal shears,
and,
you can tailor,
armor that way,
and shielding that way,
and,
you can try,
other Faraday materials,
but basically,
you know,
we're dealing with,
weapons that,

utilize,
the EMF spectrum,
and,
that's,
you know,
extremely low frequencies,
all the way to,
microwaves and the like,
but this is the kind of,
incoming fire,
that you're going to get,
on top of other,
you know,
miscellaneous things,
in the matrix,
and,
you're going to have,
all sorts of proxies,
jumping out of the bushes,
trying to get you,
and if you're living,
in a big city,
I mean,
you know,
they may,
have it look like,

some kind of,
you know,
robbery or something,
so,
you have to be,
extremely,
careful,
like a,
you know,
it's like being,
a secret agent,
in a way,
kind of like,
Jason Bourne,
in the matrix,
is basically,
where you have to be at,
mentally and physically,
and,
you know,
your resources as well,
I mean,
you got to have a way to,
survive,
because chances are,
you know,

work is going to,
dry up real quick,
as soon as you,
enter the battlefield,
they're going to try,
and starve you,
and,
and torture you,
and kill you,
so it's,
it's not fun,
why do it,
why do it,
because it makes a difference,
makes a huge difference,
this is where the real fight is,
everything else is kind of just,
you know,
blowing hot air,
you can reach a million people,
but at the end of the day,
you know,
it won't have,
nearly the same impact,
as,
as hitting some of these,

dark entities,
in their home world,
or,
you know,
some of these people,
on television,
and the like,
so,
you have to prepare,
you know,
that's,
that's something,
that we should have added in,
to mentally,
physically,
spiritually,
and financially,
you're going to have to prepare,
for,
this adventure,
if you can't prepare,
if you got little kids,
and all that stuff,
don't,
don't go there,
because they will come,

after your kids,
they'll come after everybody,
you know,
so,
this is the dirtiest,
most evil enemy,
in the world,
they'll throw sand,
in your face,
they'll kick you in the balls,
pardon the expression,
they'll do anything,
and everything,
they'll scratch you,
whatever,
they will do anything,
and everything,
in fact,
I mean,
it's basically,
Murphy's law,
what can go wrong,
will go wrong,
and they'll make it happen,
so,
you're going to have to,

prepare for that,
sounds inviting,
doesn't it,
huh,
come carry your cross,
look,
I mean,
people are going to get,
slaughtered anyways,
you might as well,
be part of the resistance,
you know,
it's kind of like,
any other occupation,
you know,
the risks,
the risks are real,
and,
you know,
if they catch you,
they'll line you up,
and they'll kill you,
you know,
in the movie,
The Matrix,
you know,

when the agents came,
they didn't just sit around,
and,
you know,
and be like,
hey,
I want to talk to my lawyer,
you know,
for the most part,
I mean,
they just ran,
there's no point,
and,
and,
trying to do this,
the legal way,
there's no 911 to call,
nobody's coming to help you,
now,
now,
in theory,
you're never given more than you can handle,
but you're going to be,
you know,
you're going to be served,
so,

you know,
don't expect that,
you know,
it's going to be,
execution day one,
but,
the better you get,
the worse things become,
the more proficient you are,
the more dangerous you are,
the bigger priority you become,
getting back to shielding,
it's never enough,
for the most part,
I mean,
unless you,
you know,
you're going to spend like 10 grand,
but,
if you're doing this kind of like a hobby,
and you're just,
trying to keep up with what's happening,
you know,
it's basically never enough,
and,
you know,

protecting your bed is,
basically,
primordial,
and,
you know,
if you can't get a good night's sleep,
you're not going to be much good,
after a day or two,
or maybe a week,
you know,
but,
protecting your bed is primordial,
all directions,
especially from underground,
and,
you know,
having some kind of like,
EMF blanket,
heavy duty style,
is highly recommended,
you know,
just trying to breathe,
and all that,
is,
is another,
obstacle,

another challenge,
you're going to want to seal,
you know,
you know,
everything that you can,
with,
you know,
type of plastic,
that's non-toxic,
or,
some kind of,
you know,
saran wrap,
or something,
tape it up,
because a lot of times,
there's,
you know,
chemicals on all of these,
you know,
shielding materials,
so you're going to have to think about every little thing,
every ramification,
every side effect,
and,
you know,

we,
we strongly recommend,
you know,
reinforcing,
your bed frame,
with,
you know,
sheet metal,
wire mesh,
or steel mesh,
as well,
multiple layers,
sometimes it takes two,
or three layers,
and sometimes,
you know,
even that's not enough,
and,
you know,
you're going to,
you're going to have to sleep,
with some armor on,
it also takes about,
three or four millimeters,
minimum of,
you know,

raw steel,
stainless steel,
sheet metal steel,
under the bed,
to survive,
so,
it takes quite a bit,
of material,
I mean,
you can,
you know,
set it up,
so there's like,
there's like a sliding door,
it's got to be,
at a level that's,
you know,
basically,
high enough,
to protect you,
doesn't have to go,
all the way to the ceiling,
but,
at least like,
you know,
two or three feet,

above the mattress,
you're going to have to,
protect from all directions,
you're going to have to,
protect,
especially your head,
but,
you're going to deal with,
you know,
weapons that you can't,
even imagine,
and so,
before you get all like,
you know,
antsy,
like,
you know,
where's the good stuff,
you know,
think about,
that stuff,
because there's no point,
going beyond,
learning the Bible,
and shielding,
because if you don't have that,

you're not even close,
to being ready,
for what comes next,
not even close,
it's not even worth,
like,
you know,
telling you things,
because you're just going to,
get yourself killed,
so we're going to harp on that,
for a little bit,
that should be your,
your big homework,
right now,
go through the Bible,
audio wise,
at least once entirely,
from A to Z,
and,
keep going over it,
in your spare time,
start getting shielding,
you know,
little by little,
it takes,

it takes time,
to acquire all the shielding,
that you need,
even if you have a big budget,
even if you have like,
two or three grand,
you know,
finding it,
I mean,
sometimes you can't even buy it,
you can't buy that quantity,
you know,
at Home Depot,
you can't buy it,
in one shot,
basically,
you know,
you're,
you're going to have to accumulate,
this over months,
you know,
maybe you know a contractor,
maybe you know,
you know,
a wholesaler,
you know,

not sure how serious people are,
but,
you know,
to be,
a real effective,
operator,
I mean,
basically,
you have to understand that,
as soon as you enter the battlefield,
anything goes,
and,
you know,
like the Bible says,
you know,
let the dead bury their dead,
I mean,
there's not much you can do,
for these people,
anyways,
and,
you know,
if you think about it,
they're just waiting to betray you,
it's not a nice thought,
but,

I mean,
you basically have to,
you have to put your work in,
and,
so,
yeah,
acquire shielding materials,
that's the next step,
practice making armor,
that's the next step,
you know,
start living a virtuous life,
you know,
give up the,
you know,
the fornication,
the,
you know,
the weekends of just getting wasted,
never lose control,
it's okay to have a drink,
you know,
it's okay to get a little,
you know,
something,
something,

but it's another thing just to be,
like,
completely wasted,
and,
you know,
to be out of your,
you know,
mind,
if you will,
so,
work on all that,
you know,
refine yourself,
start working physically,
start,
you know,
pushing yourself to survive,
extreme conditions,
and another big rule,
from here on out,
I mean,
especially if you are,
dedicated here,
never,
ever,
sleep outside in the country,

no matter how bad things get,
I mean,
you're going to get your ass,
teleported,
pardon the language,
but you're going to,
you know,
you're going to find out how real UFOs are,
if you try something like that,
so,
that's,
you know,
a huge,
kind of like,
you know,
nightmare on Elm Street kind of rule,
you know,
do not sleep outside,
don't think you're going to be able to camp your way out of the,
out of the situation,
because that's,
that's the trap,
they're trying to smoke you out,
so that you do something reckless,
and,
so,

you have to prepare,
you know,
I found all this out the hard way,
trust me,
it's not good,
got a few gray hairs on all that,
so,
you know,
so,
you know,
if you're serious,
prepare yourselves,
physically,
mentally,
spiritually,
financially,
start getting the shielding,
start listening to the Bible,
start,
you know,
cleaning up your act,
if you will,
get ready for,
some action,
some serious action,
like you've never experienced before,

and be prepared for everyone to turn on you,

and,

you know,

all of a sudden,

it's like you're in the Matrix,

or you're in Wonderland,

or something,

understand,

I mean,

you know,

this is,

this is the,

the real,

S-H-I-T,

this is the core,

of what's going on here,

this is beyond,

like,

you know,

some kind of show,

or your imagination,

or science fiction,

whatever's going on here,

I mean,

it's,

you know,

it's all of the above,
and worse,
so,
we're gonna have to leave it there,
for this podcast,
appreciate everybody tuning in,
until the next time,
if you're listening to this,
you are,
the resistance.
