

FEAR AND WEAKNESS (EPISODE 1X)

Welcome back to Jedi Training. This podcast is going to be on fear and weakness.

Of course, we're painting a real grim picture as far as what we're up against.

It's like David versus Goliath. It's like climbing Mount Everest.

I'm sure if I ask people in the audience who wants to climb Mount Everest with me,

most would probably say no. Those that say yes probably wouldn't show up.

And so it is what it is. But this is essentially the fight that we find ourselves in.

And it's almost like working for the military. Who wants to sign up? Who wants to be all they can be?

And the commercials look glamorous and all of that.

And they don't really talk about what can happen.

We saw what happened in Afghanistan and Iraq.

People coming back maimed and changed forever.

You know, either physically or mentally.

And that's what war is like.

But all of us are facing extermination.

Humanity is facing extermination.

All of us as Christians and conservatives are going to get wiped out by this system.

I mean, that's the big plan of the dark side.

Is to wipe out everybody and assimilate everyone into the Borg.

If you don't see that by now, I mean, you're not paying attention.

So you may want to opt out.

You may want to just kind of like sit on the sidelines and ride this thing out and hope for the best.

But eventually this is coming to your door.

This fight is coming to your door.

And, you know, it may or may not be a physical fight.

They're going to try and avoid that.

They're going to just try and brainwash and just slow kill everyone that stands in their way.

It's a death march.

And it's a cold war.

There's no escaping the reality of the situation.

And so it is what it is.

But getting involved basically puts you on the front lines and you're just going to be, you know, a primary target.

But it's better that we lay it out for what it is than just try to sell it as, you know, something that it's not.

It's going to be a tough fight for each and every one of you that get involved here.

But it's all the more reason to start preparing yourselves physically, mentally, spiritually, and financially for what's coming.

You know, whether you fight or not.

And most of you are.

But some of you can do more.

And it takes a real, you know, specific type of lifestyle to be able to survive this.

And to be able to move forward with this without, you know, too much heartache, if you will.

Because it's an ugly war and they'll come after you and everybody you know.

Just to send a message.

So.

You have to be prepared to be all in.

And no matter if, you know, you're going to get involved or not.

This topic of fear and weakness is really a struggle for us all.

The dark side always chooses your moment of weakness to take advantage of you.

It's going to use desperation against you.

It's going to make you desperate.

And its hope is that you're going to make a mistake in your desperation.

And most people will.

When we're desperate, we will do just about anything.

And the dark side is counting on that.

But knowing that it targets and looks for your moment of weakness can help you work that out.

You have to think about all of the weak points in your personality, in your life, in your shielding.

Think about that as a way that's going to be used against you.

As an exploit.

Whatever you're attached to.

Whatever you love.

Whatever you're fond of.

It's going to be used against you.

They'll poison your food.

They'll poison your water.

They'll poison everything that you basically buy regularly.

Which means that you're going to have to start changing your habits.

You're going to have to buy different things.

You're going to have to go to different stores.

You're going to have to, you know, do things that you normally wouldn't do in order to survive.

And this is, you know, basically a big topic that we're probably going to get into in a future broadcast.

But protecting your food and your water is going to be a major priority.

Don't think that just because, you know, it's at home that it's safe.

Don't think that just because you've got some cameras or an alarm system that, you know, your security is foolproof.

Yesterday we were talking about quantum physics, but we should really be talking about quantum technology.

Essentially, there's technology out there that can switch your possessions in the blink of an eye.

In fact, people can be switched out in a blink of an eye.

Why some people aren't switched out is another question.

Perhaps they just don't know enough information about that person to make it real.

Perhaps you have a hidden scar.

Perhaps you have a hidden tattoo.

Perhaps you have a condition that they can't replicate.

But in any case, technology does exist to basically switch your possessions in the blink of an eye.

You could be in the shower.

You could be, you know, in the living room.

And the contents in your fridge are basically switched out.

We feel that that technology exists.

We feel that that is a real possibility.

While it's very difficult to prove and sounds like speculation,
it's best to take that into account.

And therefore, that means that you basically have to do your shopping every day
and keep an eye on it pretty much the whole time or secure it in a way that makes it more
difficult to switch out.

Again, we'll be talking about that in a future broadcast.

I know that really sounds like, you know, something out of Star Trek,
but it's basically what we're dealing with.

In any case, at least giving you the heads up will allow you to think about it
if you're having to find out the hard way that this is a reality.

If all of a sudden the food or the water that you're eating is just not going down like it should,

and you don't understand why,
think of quantum technology.

Think of teleportation.

And also other things can probably be infused through that technology as well.

And that kind of reminds me of another phenomenon
that we'll talk about in a future broadcast,
which is quantum rain.

But essentially, raindrops can come through the ceiling
like little streaks of light.

And what these things are,
nothing short of bad news.

Again, you're going to have to see it for yourself to believe it.

But knowing about the idea will help you when you encounter such things.

You're going to encounter things that you've never even imagined before.

And it's going to boost the fear factor.

And it's this fear factor that's going to make you desperate.

And it's going to make you make mistakes.

You're going to run from your residence.

You're going to go out into the wild.

You're going to try and do something to escape.

And that's when they get you.

So they will try to smoke you out
in many different ways.

Whether it be radiation attacks.

Whether it be quantum technology.

Whether it be something even more in your face.

I guarantee you that at one point in time,
when you're facing this enemy,
you're going to be thinking about
going John Connor.

Getting off the grid.

Escaping.

Maybe even surrendering, negotiating,
anything to make it stop.

But what you'll discover is that
there is no surrender.

Nothing will make it stop.

You have to adapt.

And you're capable of adapting.

But the pressure has to be there.

Me talking about it isn't going to
get you really motivated.

It'll give you maybe some idea.

Maybe it'll give you the motivation
to not get involved.

But

hearing about these ideas
aren't going to get you really motivated
to do anything.

Maybe not even to get shielding materials.

But once the pressure is there,
then

then you start thinking about

what do I do?

How do I get out of this?

How do I survive?

What do I do?

It's important to have this discussion

on fear

and weakness

because

they'll exploit your weakness.

Whatever it is.

Your girlfriend,

your children,

anything and everything

you can imagine.

and so you have to be prepared for that

and if you're getting them involved

then you better protect them

the best you can

some people don't want to listen

and some of them are out to get you anyways

so what can you do

let the dead bury their dead

there's not much you can do

but you have to be prepared for

the worst case scenarios

you have to be prepared to be confronted with your worst fears
and you have to ride out the storm
remember what Jesus told his disciples
when they were afraid during the storm
oh ye of little faith
we're called to fear only the almighty
and that's it
have confidence, have faith
and providence will prevail
we'll all reach our destiny
what that is
still remains a mystery to us
but
we're here to fight
and this is where the fight is
I mean if you go out there like Rambo
I mean you're not going to last very long
you know what I mean
a lot of people are real tempted right now
for this, that and the other
and that's what they want
they want to be able to take you out
make you look like
you know some kind of evildoer
and paint you as a
as a criminal

and that's why cold tactics
cold war tactics are being used
and so if it's a cold war
then it's a cold war
and that's where telekinetics comes in
we haven't gotten to all the juicy stuff
a lot of the stuff that we'll talk about
in the future
will have to be in a way that's
kind of leading you to the door
we're not going to be able to explain
absolutely everything
because some things are
supposed to be left to revelation
some things have to be revealed to you
but the road to revelation
is that straight and narrow
path
and so you really have to
give up
the secular world
to a certain extent
deny yourself
and start being
a spiritual person
that journey begins in the bible

that journey begins in nature
if you're just doing
the nine to five in the city
talking about the weather
talking about politics
you're going to be stuck
on the ground floor
and you know
for many people
you might be thinking to yourself
you know
how do I not do that
I mean I got to pay the bills
I don't have much choice
and
you know
you're going to have to
find the time
if you're serious
but you're also going to have to
find a way to go remote
because
chances are
your work will become
an ambush point
and

it'll become unbearable for you

one way or another

they'll weed you out

one way or another

most likely

so

you know

it's tough

it's real tough

but

essentially you have to

disconnect

from the matrix

to a certain extent

and hack it

and

take it seriously

and things will happen

you won't even need to

listen to the Jedi

training anymore

you know

you'll be in better hands

but

we feel like

if we're going to

prepare you for
what's coming
then
we should really
talk about
that road to
revelation
and you really
have to
eat
breathe
and sleep
the Bible
and you basically
have to
unindoctrinate
yourself
from
mainstream
religion
mainstream
religion
doesn't seem
all that
offensive
as a

Catholic
growing up
as a
Catholic
I certainly
wasn't offended
by
Sunday
Mass
I wasn't
offended by
what I saw
in the church
I wasn't
offended by
the people
that were there
but
I wasn't
getting a
whole lot
of scripture
either
you know
it was
basically

a little
snippet
a 30
minute
homily
and it
was really
kind of
controlled
and then
you know
you're just
kind of sent
on your way
thinking that
you'd fulfilled
your
you know
your requirements
but
once you read
the entire
Bible
and then
you start
thinking about

what's going

on

and you

know

you do a

little more

research

as far as

what's

happening

you realize

that

you're

basically

being

massaged

into

a type

of

paganism

a friendly

acceptable

perhaps

form of

paganism

we could

do a whole
series on
you know
Rome
all roads
lead to
Rome
they used
to say
but
Rome
during the
time of
Jesus
was
essentially
an empire
of the
dark side
and what
they were
worshipping
in Rome
was essentially
the fallen
angels

under a
different
name
and
during the
first 300
years of
Christianity
it was a
big threat
to
the Roman
Empire
they were
like the
Jedi of
their
time
if you
will
and so
the dark
side
needed to
take
control

and they
did
and
essentially
they turned
it into
sun
worship
and while
everybody
loves
Jesus
that isn't
the question
you know
Jesus
didn't
you know
preach
worshipping
himself
that wasn't
the message
at all
certainly
not in

Matthew
Mark
or Luke
and John
there's
you know
a few
little hints
of it
plus
you know
some
cannibalism
you know
and it's
it's
it's going
to be a
topic
for another
conversation
you know
it's done
in such
a way
that

you know

you kind

of

jump

into

it

but

based

on what

we see

in Matthew

Mark

and Luke

it's

it seems

it seems

it seems

like we

should be

objecting

a little

bit

in any

case

you know

you're really

going to
have to go
back to
the old
school
if you
want to
excel as a
Jedi
if you want
to excel
in telekinetics
if you want
to be able
to do
some of
the things
that Jesus
did
and some
of the
things
that
Jesus
promised
that we

could do
like move
mountains
cast out
demons
and so
much more
but you
know
Jesus
didn't
grow up
Catholic
or Protestant
or
Presbyterian
or you
know
Baptist
or any
of that
he grew
up in
the old
school
faith

and that's
the message
that he
was preaching
and if
you think
about that
I mean
it almost
sounds
offensive
what
doesn't
it
it
should
but that's
where the
truth is
and that's
the road
to revelation
there is
no other
way
so

you know
as
much as
we love
you know
our fellow
Christians
essentially
they're
they've been
led astray
in a way
that you
know
they're just
not ready
to wake up
from it
and trying
to have
this conversation
with a lot
of people
out there
you know
isn't going

to go
anywhere
because
deep down
they know
what they're
doing is
wrong
deep down
they know
that they're
perverting
the Bible
and so
they're a
different
type of
demon
the apostate
and they're
the most
difficult
and the
most dangerous
like the
Judas in

disguise
basically
nobody will
warn you
of this
but
the demons
that are in
you know
some of
these people
is beyond
beyond scary
nothing is
going to
prepare you
for the
paranormal
that you're
going to
encounter
you're going
to see
things
feel things
hear things

think things
that you've
never thought
before
your mind
is going
to become
a battlefield
everything
around you
is going
to become
a battlefield
and it's
all going
to be
happening
under the
veil of
you know
like a
normal
world
and so
if you
act out

you act
strange
you start
losing it
you know
that's going
to be
all the
opportunity
they need
to come
after you
so no
matter what
you encounter
no matter
what you
face
no matter
what you
see
you just
basically
have to
stay cool
you know

it's just
another day
and hopefully
you know
preparing you
coaching you
on this
will help you
through that
if you ever
get there
getting there
is half the
battle
but
you can
take off
quickly
if you
start
you know
learning
scripture
by heart
and you
start thinking

about it
and it
you know
it basically
resonates with
you
either it
will or it
won't
you know
I can't
force you
to resonate
on the
frequency of
the bible
it's either
going to be
like that
for some
people
or it's
not
and if it
is it is
and if it

isn't it
isn't
and that's
all that can
be really
said about
it
you know
not everybody
will make it
as a Jedi
not everybody
will make it
as a spiritual
warrior
not everybody
will make it
as
this priestly
warrior
class
but if
you do
you basically
become the
most dangerous

thing on the
battlefield
the potential
that you have
is
beyond
enormous
tapping
into it
is kind
of like
discovering
nuclear
power
wow we
can do
all of
that
out of
this
little
rock
you know
think
about
you know

this is the
big F
here
you know
but think
about
the potential
of the
first
atomic
bomb
it was
basically
like
you know
just a few
pounds
of
uranium
right
you could
hold it
in your
fist
basically
in your

hand
and it
basically
leveled
an entire
town
so the
power
that's
within
you
is
basically
disproportionate
to your
body
weight
tapping
into it
is like
discovering
nuclear
power
all over
again
and that's

why they're
going to do
everything they
can to keep
you in the
dark
we'll have to
leave it there
for this podcast
appreciate everybody
tuning in
until the next
time
if you're
listening to
this
you are
the resistance
you
you
you
you
