

DEMONIC POLYMORPHISM AND PARADIGM SHIFTS (EPISODE 22)

Welcome back to Jedi Training. The title of this podcast is Demonic Polymorphism and Paradigm Shifts.

Jedi Training is all about preparing you for spiritual warfare. That term is almost cliché these days. It's used so much, people have no idea what it really means. We get the idea of spiritual warfare from Ephesians chapter 6. We wrestle not against flesh and blood, but against spiritual wickedness from heavenly places. Let me translate what that means for you

using modern vernacular and intelligence from the front lines.

Essentially, we're not just dealing with flesh and blood. We're dealing with ghosts from quote unquote outer space. I'm going to let that sink in for a while because that's a big concept.

So let's think about Ephesians chapter 6. We wrestle not against flesh and blood, but against spiritual wickedness from heavenly places. So the heavens above, what is that?

For most people out there, that's quote unquote outer space. Spiritual wickedness. What is spiritual wickedness?

Unclean spirits, demons, and the like. Essentially, we're talking about ghosts. Disembodied spirits

that no longer have a body. So they're ghosts from outer space. That's what we're dealing with for the most part.

That's the major component of the enemy.

Now, if you were to encounter a ghost in a haunted house, you would assume that it came from planet Earth.

I mean, I'm not sure how many people have encountered a ghost in a haunted house, but if you've ever been on the ride at Disneyland,

you know, it's just basically quote unquote ghosts from planet Earth. You know, they look human.

But essentially, we're not dealing with that at all.

What we're dealing with is something that does not have a human form.

It does not look human. It looks alien in nature.

There are many different enemies that we're up against,

but they all look sinister

and alien in nature.

We're going to describe to you

what we think is going on

in terms of where these things come from.

Essentially, when we look at nature,

there's this process of decomposition,

whether it be through mold or bacteria

or even a virus.

And I know a virus is a very controversial term these days.

You can call it an exosome.

You can call it whatever you want to.

But essentially,

there's this phenomenon

where corruption spreads

and

essentially, it infects

something that's living

and basically turns it into something

that's not living.

And this is, you know,

through a process that we call disease

or something of that nature.

Now, if we look at
what's happening on
an intergalactic scale,
and I know that's a big term
for some people out there,
you know, when we look through a telescope,
we're not really sure what we're looking at.
You know, is it a hologram?
Is it the matrix?
Is it an infinite universe?
So let's keep all options on the table.
Let's not rule anything out just yet.
Essentially,
what's happening in
the universe,
as far as we can tell,
is that
there are some planets that
support life,
like ours,
and there are planets that
are basically dead planets.
And
perhaps at some point in time,
some of these dead planets
were planets that

supported life.

In any case,

what we're looking at

most likely is

some kind of

intergalactic

or interplanetary virus.

Now, if you think about

a virus

in theory,

and we're just going to talk about it

in theory,

because

we know it's controversial.

A virus comes into a cell.

It infects a cell.

It turns the cell into

basically a virus factory.

That cell

then essentially,

or eventually,

will burst

and spread

more viruses

into the surrounding

environment.

Now, if you replace
the concept
of a cell
with a planet,
and instead of a virus,
essentially,
demons,
then you're starting
to get the picture
of what we're looking at.

What we feel
is happening
is that
the planet
has been invaded
by some kind of
intergalactic
spiritual virus
that essentially
infects,
consumes,
and destroys
an entire planet.

And it does
this
through

basically
body snatching.
Corrupting people,
turning them into
monsters,
and these monsters
pollute and destroy
until the entire planet
is infected,
and the entire planet
just basically
self-destructs,
then all of these
people will die,
and their
souls,
if you will,
or their consciousness
will move on
into some kind
of demonic form
instead of
some kind of
angelic form.
And
the collective

of
this process,
imagine if the
entire planet
was infected
like a zombie
apocalypse
by demons,
and the world
just ends
either through
World War III
or some other
kind of means.
All of these
people would
turn into
basically
demonic ghosts.
Now,
each individual
becomes like
a raindrop,
and these
raindrops
condense

or come
together
to form
a type
of
superstorm,
a super
consciousness
in a
spiritual way.
And then
the process
begins to
repeat.
we're going
to have
to
break this
down and
organize this
in a way
that's
a little
more
comprehensive.
But

essentially
what we're
looking at
is
like mold,
it's like
bacteria,
it's like a
virus,
but spiritually
that not
only contaminates
people,
but
entire
planets.
and when
the planet
is consumed,
essentially,
it bursts
spiritually,
and all of
these
individual
demons

or virions
or whatever
you want to
call them,
exosomes,
will spread
to somewhere
else.

Now,
there's a lot
to talk
about
on this
topic,
because
once a
demon
becomes
airborne,
so to
speak,
disembodied,
you know,
like a
free-roaming
phantom,

if you will,

it can

travel at

speeds

faster than

light.

It has

a consciousness

and it is

capable of

telekinetics.

One

individual

demon

has a

certain

skill set,

but when

demons come

together,

they assemble

into

a hydra

or like

a super

demon,

something like
you could
imagine like
Voltron or
some kind of
transformer
coming together
to become a
super transformer.

Essentially,
this is the
intelligence from
the front lines.

This can
spread from
not only a
planet,
the planet,
but it can
consume an
entire
galaxy.

And
essentially,
a galaxy that
was once

flourishing with
living planets
can become a
galaxy full of
dead planets
that have been
consumed by
demonic evil.

And the
consciousness that
condenses from
something like
that,
you could think
of as
something like
a super
demon,
or like
the equivalent
of the
anti-archangel,
something like
that.

Huge.

Massive.

That doesn't
mean that the
only thing that's
out there in
the universe is
dead planets
and demons,
but that's a
major component
of what we're
up against.

And this is at
the core of
spiritual warfare.

You're not going
to get this
anywhere else.

You will not
find this
anywhere else
on the internet.

This intelligence
is factual.

It's from the
front lines.

It's what's

being encountered

by Jedi

right now.

And training

you up to

fight against

this is not

an easy task.

When we talk

about shielding,

know your

Bible, know

everything that

you can,

you know,

prepare yourselves,

seriously, you

know, we're

not kidding

around.

What we're

dealing with

is just

beyond imagination.

Now, these

demons or this

virus, this
spiritual virus
that's going
around infecting
people, body
snatching people,
corrupting people,
and turning the
planet into a
cesspool, is a
collective
consciousness made
made up of foot
soldiers ranging
in all sizes,
from basically
the microscopic
or the miniature
to the massive
on an intergalactic
scale.

In the thumbnail,
we're giving you
an example of
what can be seen
in the flesh of

a lot of people.

You have these
miniature demons
with a face.

In fact, you
see this just
about everywhere,
if you pay
attention.

Once you
recognize this
concept of a
face, which is
essentially a
disembodied spirit,
it doesn't have a
body, it just
has a head.

That is quite
literally the
definition of
what we're up
against, a
disembodied spirit,
no body, just a
head.

You see these
heads pretty
much everywhere.

It's not just
the face on the
moon, it's not
just the faces
in the clouds.

You're going to
see this in the
trees, in the
bushes, in the
flames, in the
smoke, and you
might think it's
a coincidence, but
it's not.

What we're seeing,
in fact, is the
form of something
that is hiding
in plain sight.

There are many
things that exist
that are invisible
that we can't see

with the naked
eye.

The eye is only
able to see
within the
visible spectrum
of light.

But there are
many things that
exist outside of
the visible
spectrum of
light.

And trying to
talk about
this with some
people is just
going to be a
lost cause.

But essentially
the universe
exists in a
way that we
can only see
part of it,
with our eyes

wide open.

eventually we're

going to

train you and

help you see

things that are

there with

your eyes

closed.

The human

body, the

human mind, has

the ability to

see these

spiritual forces,

this world of

the unseen,

things that

are not

seen in ways

that just

aren't described

in a textbook.

The physiology

is there.

We're adapted to

see these things

and to fight

these things,

but this is a

skill set that

has been lost

for most people.

It's not talked

about in schools,

it's not talked

about in the

textbooks for the

most part,

but it's

something that

has been

known for

thousands of

years.

And we'll be

talking more

about that in

future podcasts.

We're not going

to be talking

about all of

that in this

podcast.

What's important

for you to

understand at this

stage is that

you need to

take it seriously

and you need

to prepare.

Because what

you're up against

is way beyond

anything that

for the most

part you can

imagine.

We're going to

get some

interference from

the Matrix here.

They do not

want us talking

about this,

but we're going

to continue on

the best we can.

So,

demonic

polymorphism.

Again,

demons can

essentially

move around

faster than

the speed of

light.

They're connected

through a

collective

consciousness,

through a

form of

communications,

a communications

network that

just, you

know,

again, isn't

in the textbooks.

They're not

using cell

phones, they're
using telepathy,
and telekinetics
can traverse
time and space
basically
instantaneously.

There is no
concept of
the speed of
light when it
comes to
telekinetics.

For the most
part, the
demons that we
encounter on
planet Earth
in human form
tend to be
microscopic or
super small in
size.

things.

And
sometimes you'll

see them
floating in
the eyes of
people, moving
around in
their eyes.

Sometimes you'll
see them in
their skin.

Sometimes you'll
see them manifest
on people's
foreheads.

You'll see
devil horns,
you'll see
something.

You can see it
in their aura,
that there's
something
definitely wrong.

We'll get more
into that in a
future podcast.

But

essentially,

they can be

just about

anywhere.

And quite

literally, they

float around like

pollen, they

float around like

mold, they

float around like

bacteria, or

like a virus.

So that is

one aspect of

what we're up

against.

Casting them

out from

people that

are basically

like a city

without walls

is, for

the most

part, for the

most part,
for the most
part, it
doesn't resolve
the issue.

you can try
and deliver
people like
you see in
some of the
congregations
online.

You see a lot
of pastors
trying to cast
out demons,
and obviously,
that's a place
to start.

And you can
try and
cast them
out, and
to add in,
don't come
back.

But for the
most part,
these people
are so
corrupt, that
it's just
not going to
end.

Jesus tells
us that
once the
unclean spirit
comes out
of a man,
it seeketh
rest in dry
places,
findeth none,
and then comes
back to that
house, to
that person,
and brings
along more
demons with
it.

And the
last state
of that
man is
worse than
the first.

And so,
focusing on
just casting
out demons
or delivering
people is
really like a
temporary
solution.

Perhaps,
you know,
if people
really change
their ways,
then it
would be a
complete solution.

And Jesus
tells a lot
of the people

that he
delivers in
his ministry,
you know,
don't sin
again,
lest something
worse happen
to you.

So,
you know,
it's a good
place to start
though.

I mean,
that's how
Jesus performed
his ministry,
and so it's
a good place
to start,
to cast out
demons.

But,
deliverance
tends to be

a real
comprehensive
process where
the target
has to be
aware,
for the most
part,
and they
have to
participate
in the
deliverance.

And this
is something
that we see
in the
Gospels as
well.

Jesus
asks the
people,
do you
believe
that this
can be

done?

And,

you know,

some say

yes,

and some

say,

you know,

help my

disbelief.

But,

in any

case,

for the

most part,

in

deliverance,

it's,

you know,

the victim

has to

participate.

And if you

try to

have that

kind of

conversation

with a lot

of the

people that

you,

you know,

you want

to deliver,

they're just

going to

turn around

and run

away.

They like

the demons

that they

have.

They like

being part

of the

hive mind

or the

legion.

So,

it's a

difficult

thing to

just

cast

them

out.

Essentially,

what you

have to

train to

do is

to

attack

them

and

to

put

them in

a state

of

disarray

and

to

get

them on

the run,

to make

them want

to leave.

And this

is,

you know,

sometimes

easier said

than done.

We'll get

into that

in a future

podcast.

But,

demonic

polymorphism

essentially

means that

these things

are

shapeshifters.

They will

change their

form.

They will

travel from

place to

place.

They can

be

embedded in

not only

people

and

animals

and plants

and clouds

and trees

and all

of that,

but they

can be

embedded in

technology.

They can be

embedded in

the telecommunications

network.

They can be

embedded in

computers.

I mean,

these things

are pretty
much,
they're pretty
much hardwired
now into
the internet.

So,
there's a lot
to
contend with.

But,
these things
will
shapeshift
and they
will embed
themselves in
many different
things and
they'll move
around.

and for
the most
part,
the environment
is saturated

with

this

demonic

virus.

And again,

we feel

like this

virus or

these demons

do not

come from

planet Earth.

They have

come from

quote-unquote

outer space,

from the

heavens above.

Now,

we were

talking a

little bit

about this

process.

basically,

you know,

if you
look at
just about
everything on
planet Earth
that has a
cycle from
spring to
winter,

if you
look at,
you know,
organisms,
they have a
life cycle.

If you look
at fruit,
you know,
it begins
as a little
bud on
a tree
and,
you know,
basically grows
into a

mature fruit.

It falls to

the ground.

you know,

good to

eat or

whatever,

and then

eventually the

corruption comes

in and

turns it

into

basically

nothing.

It just

disappears over

time.

And so,

again,

this is

happening on

an intergalactic

scale.

And

given that,

you know,
what we're
encountering
out there
is not
human-like
in its
form,
in its
morphology,
they
basically
represent
a different
type of
civilization,
a civilization
that has
expired,
or organisms
from a
civilization
that has
expired.
And they've
come here

from a
very distant
place.

again,

that's a

lot to

take in.

What we

can tell you

from the

action on

the front

lines is

that there's

basically an

infinite number

of faces that

you're going to

encounter.

Some of them

look similar.

There are

some that

definitely look

like they come

from more or

less the same

gene pool.

people,

but there

are so

many,

it really

kind of

begs the

question,

you know,

what year

is it?

And this

kind of

brings us

to the

second part

of this

podcast,

which is

the paradigm

shift.

Now,

what is a

paradigm?

Essentially,
it is a
general
consensus,
it's a
worldview,
it's your
understanding
of reality.
And if
something comes
in,
that
basically,
you know,
disrupts
that view,
then essentially
we could call
that a
paradigm shift.
And so,
for the most
part,
if I were to
ask you,

you know,
what time
it is,
what time
is it,
you'd look
at your
clock or
your watch
and you'd
say it's
noon,
it's two
o'clock,
it's four
o'clock.

If I were
to ask you
what's the
date,
you'd look
at your
computer or
your phone
and you'd
say,

today is
September
whatever,
2022.

So that
is the
general
consensus.

That is
basically
everyone's
worldview.

We're like
synchronized
that way,
in a sense.

but there's
not a
whole lot
of basis
for that
date

in reality
as far
as we
can tell

and I
know that
sounds
extravagant.
For
most
Christians
out there,
we feel
like it's
about the
year 5800
after creation.
now we
know that
the Bible
is literally
true,
but if we
add in
some variables,
then we
can see
that perhaps
it's not
the year

2022

or the

year 5800

after creation.

If something

were to have

interrupted

the timeline,

it would

give us

the appearance

that

it's the

year 2022,

but

that may

not necessarily

be the

case.

We're

going to

try and

unpack

that a

little bit

more.

If you
pay attention
to the
Bible,
there's
not a
whole lot
of references
to dates
for the
most part.

There are
some.

There are
some references
to months.

There are
some representations
of days.

There are
some mentions
of, you
know,
specific
monarchies
or emperors

that give
us the
impression
that
you
know,
what was
happening
back then
was
associated
with a
certain
date,
but there
isn't
ever
a
specific
date
entered
into
the
Bible.
And I
think that's

an important
detail
to think
about.
like,
for example,
in the
New Testament,
which wasn't
written that
long ago,
and when it
was written,
you know,
it was during
the Roman
Empire,
and they
had basically
the same
calendar that
we have
today,
you know,
the Greco-Roman
calendar.

There isn't,
you know,
a mention,
today is,
you know,
January 1st,
you know,
50 AD,
or
80 AD,
there isn't
a specific
date
that's mentioned
anywhere
in any of the
Gospels,
or in any of the
letters of Paul,
or the
Epistles,
or,
you know,
anything like that.
And I think that's
an important

observation to make.

There isn't a
specific date
mentioned
anywhere,
and when we say
date,
we mean
day,
month,
and year.

There are a few
mentions in
Scripture of
day and month,
but there really
isn't a mention
of year
anywhere.

And I mean,
these people were
using calendars,
I mean,
they had,
even 5,000 years
ago,

when you look at
the earliest books
in Scripture,
they had frying
pans,
they had roads,
they had,
you know,
malls,
they had taxes,
they had basically
a lot of the same
concepts that we
have today.

They had the
concept of time
in the sense that
they were numbering
the hours of the
day,
you know,
the first hour,
the third hour,
the fifth hour,
after the sun rose,
basically.

But,
there isn't ever
this mention of
today is,
you know,
January 1st,
you know,
250 BC,
or anything like
that,
or even,
you know,
anything that's
equivalent to that.

There isn't date,
there isn't a date,
year,
and month
cited in the Bible.

There's a day
and a month,
but it doesn't get
more specific than that.

So we have no idea
what year it is
in the Bible.

And the reason
that I mention that
is because
we have intelligence
that would suggest,
and again,
this isn't anything
that
is more than
a suggestion
at this stage,
that there's been
some type of
interruption
in the timeline.
We're not entirely
sure what that
was,
or what that is,
or what that means,
but there's
a high probability
that
it's not really
the year 2022.
And we mention that,

you know,
as often as we can
in the broadcast
and the like.
And the reason
that this is
important
is because
the feeling
that we have
is that
the universe
is essentially,
you know,
many billions
of years old,
if not,
you know,
trillions of years old.
We don't even know,
really.
How do we put that
in the context
with
the Bible
is the big question.

Again,
for most Christians
and religious scholars,
we feel like
it's the year
approximately
5800
after creation
based on
what we can
stitch together
from
periods
in the Bible
like
the Babylonian
exile.
we feel like,
you know,
the Babylonian
empire
was,
you know,
approximately
2800 years ago
or something like that.

And so,
you know,
we try to,
you know,
stitch a timeline
together
based on what
we think we know
as long as
there haven't been
any interruptions
and as long as,
you know,
we're still on
the original planet Earth
and there's really
no guarantee of that.
but basically
we feel like,
you know,
it isn't the year
5800
after creation.
It might have been
the year 5800
at some point in time,

but we're not
there right now.
what year it is
exactly
on planet Earth
and what year
is it exactly
in the universe
is a whole
other question.
And the reason that
this is important
to focus on
is because,
again,
these ghosts,
disembodied spirits
from,
quote unquote,
outer space,
there's so many of them.
there's so many
different civilizations
that appear
to have been
wiped out

or there's so many,
let's just say,
demons or ghosts
from different places
that you just
couldn't imagine
this all happening
in the last,
you know,
5,000 years.
Maybe it did.
But,
in any case,
whatever we're
dealing with
out there
is much older
than,
you know,
5,000 years old
as far as we can tell.
And it's important
to think about that
because
if we think about
the universe

as 5,000 years old
then we basically
think of
everybody being
more or less
on the same page
technologically speaking.
like,
you know,
how far could you
evolve in
5,000 years
as a civilization?
You know,
in terms of
human perception,
you know,
we think of
you know,
what we've seen
in the history books
and the
archaeological records
and the like
and,
you know,

we think of
the ancient world
you know,
basically evolving
all the way up
until the 1900s
at a very slow rate
and then all of a sudden
you know,
electricity enters
the scene
and now all of a sudden
we have
cars and planes
and computers
and an internet
and,
you know,
all of that stuff.

And so,
you know,
it took us
basically
quote unquote
5,000 years
to get from

more or less
you know,
the Bronze Age
or the Stone Age
to the Information Age
and so we would assume
that,
you know,
the entire universe
is more or less
you know,
on that same timeline
and that
technology,
whatever technology
is out there
in the universe
can only be
at around,
you know,
5,000 years old
but
as far as we can tell
you know,
all of
all of those

concepts,
you know,
are just
are just basically
thrown out the window.

We
are more than likely
dealing with
all sorts of
possibilities
and civilizations
that could be
millions
if not billions
if not trillions
of years
into the future
technologically speaking.

And so
if we look at
the way technology
has evolved
over the last
hundred years
imagine where
it'll be

a hundred years
from now
or a thousand
years from now
imagine a civilization
that is a million
years old
or a billion
years old
what kind of
technology
they would have
you know,
we're definitely
just like
ants in the ant
farm
over here
on planet earth
in terms of
technology
but not in terms
of
what we're
capable of
and so

again
we're very
unique
in the
universe
because
it looks
like
we're the
last of
creation
we're like
the cherry
on top
and
after
the almighty
created all
of these
different species
and all
these different
worlds
and all
of these
perhaps

different
universes
finally
I suppose
this is just
my opinion
they feel like
they perfected
the process
so that they
could
create something
that looked
more like
them
and of course
you know
the book
of Genesis
uses the
term
us
you know
after we
after we
ate the

you know
the forbidden
fruit
you know
the mention
is
now they're
like us
lest they eat
also from the
tree of life
and live forever
you know
let's
let's boot
them out of
the garden
of Eden
so
the implication
is that
given that
we're created
in the image
of our
creator

and that
we are the
image bearer
of our
creator
we have
gifts
and talents
that
perhaps
supersede
what is
out there
and that
that is
the impression
that I have
is that
we are so
dangerous
as a
species
because of
how we're
made
that

the forces
of evil
have chosen
to basically
dumb us
down
and turn
us into
you know
animals
basically
running around
you know
trying to
you know
do primitive
things
they're keeping
us in this
state of
you know
this primitive
mindset
so that
we can't
reach our

full potential
so
we aim to
basically
break free
from that
bondage
that's what
this Jedi
training is all
about
that's what
this
adventure is
all about
is basically
you know
reaching our
full potential
and essentially
showing the
universe that
we are
who we are
and I think
that's at the

core of this
conflict
to a certain
extent
we'll have to
get more into
that in a
future podcast
but at this
stage what I
can tell you
is that
what we're
up against
essentially
is
demonic
forces or
ghosts of
other civilizations
that are
demonic and
sinister in
nature
and they've
basically

have come to
planet earth
to invade
and to
enslave
and to
destroy
and so
you know
demon
you know
there's a lot
of kind of
debate about
demons
you know
are they
aliens
are they
you know
something else
but
essentially
we're dealing
with ghosts
from other

worlds
that have
come here
for the most
part
to destroy
humanity
there's also
the possibility
that we're
also dealing
with
you know
alien
civilizations
that are
flesh and
blood
other forms
of creation
that are
like us
but
but look
different
like they

would have
you know
two arms
and two legs
and a head
and all of
that
but are just
you know
a completely
different race
we feel like
that's a
possibility
as well
and I think
we'll wrap
this up
with the
idea
of
telekinetics
from the
point of
view of
demons

and alien
species
humans
are beginning
to discover
or rediscover
their
natural
ability
of
telekinetics
and you know
some people
have
discovered
more than
others
governments
have been
doing a lot
of research
on this
we covered
this in a
previous
broadcast

but there's
definitely
something
there
and
and we're
not the
only ones
that have
that ability
and telekinetics
in its most
advanced forms
can essentially
produce
weapons
that
are
essentially
ghostly
in nature
this is
going to
take a lot
of
describing

and this is
probably best
for a future
podcast
but essentially
everything
is
a form
of energy
you know
this is
really
going to
sound
spectacular
and this
is definitely
more advanced
than
where we
need to
be right
now
but
more or
less

everything

is a

state

of

energy

and

you know

it's kind

of like

the different

forms of

matter

at a

certain

temperature

you know

water is

liquid

at a

cold

temperature

it's

solid

at a

hot

temperature

it's

a

gas

and

the

amount

of

energy

that

is

in that

state

of matter

defines

its

physical

properties

you can

take

something

that's

physical

and solid

and

torch

it

and

it

basically

you know

it'll

turn into

you know

a giant

flame

and

you know

more or

less

everything

will be

consumed

and

you know

that process

is described

as

combustion

but

essentially

what's

happening

is that
you know
when we
apply
a match
to paper
that whole
piece of
paper turns
into a
giant
ball of
energy
it starts
with a
little flame
but
that
that little
flame
essentially
is kind
of like
the drop
that makes
the bucket

overflow
and all
of a sudden
that energy
that was
just in a
stable
solid state
now
becomes
you know
basically
all energy
again
and so
it's kind
of like
going from
different
states of
matter
and so
we basically
have
solid
liquid

gas
energy
and so
everything
at its
core
is energy
is
energetics
and
the mind
or consciousness
has an
ability to
manifest
energy
in a
form that
is not
physical
in the
sense like
solid
liquid
or gas
but

is
tangible
in a
form
nonetheless
and so
to give you
like
a real
simple
example
with a
in the
right
with the
right mind
through a
lot of
training and
you know
other
processes
a mind
would be
able to
reproduce

a form
energetically
like if
you were
to look
at a
tree
and then
imagine
another
tree
right next
to it
even though
there's not
a tree
there
if you
were to
imagine
that
there is
a tree
with the
right amount
of training

you would
basically
be able
to make
an
energetic
form
of a
tree
that was
not
either
physical
liquid
or gas
but
energetically
it would
be
there
this is
probably
the best
way I
can simply
describe it

at this
stage
but
essentially
the idea
is that
through the
process of
telekinetics
whether it
be alien
you know
demonic
or human
the right
mind
can produce
a form
that is
energetic
in nature
now a
tree
you know
isn't
much

of a
of a
weapon
for the
most part
but it's
an example
now if a
mind were
to make
like a
missile
and then
launch it
somewhere
that would
be a
telekinetic
weapon
now
what the
mind
produces
is
again
is neither

physical
it's
it's
neither
solid
liquid
or gas
but energetic
it's an
energy form
that has
properties
and
characteristics
it can't
be
necessarily
seen by
the naked
eye but
sometimes it
can
and
essentially
what we're
dealing with

on a
bigger scale
is
a
telekinetic
war
where
weapons
are
produced
energetically
and can
be launched
like a
weapon
at an
enemy
or at a
target
and have
an impact
now
the impact
may not
be like
a physical

nuclear
explosion
but
spiritually
it could
be something
equivalent
and
the ripple
effects
will have
an impact
on the
physical
world
now for
the most
part
and we're
going to
have to
wrap this
up here
pretty quick
for the
most part

telekinetic

attacks

are

perhaps

something

like

you know

a mosquito

bite

or

something

you know

rather minor

in nature

but

over time

and

you know

over time

they can

have a

big impact

attack

and

these

attacks

can be
amplified
by
the
sheer
numbers
of
individuals
that are
participating
in these
attacks
and so
for the
most part
if you were
to encounter
a telekinetic
attack
for the
most part
it wouldn't
kill you
right away
but over
time

it very

well

could

and

it's

like

I suppose

another way

that you

could represent

this would

be like

a type

of

you know

impact

on your

windshield

you know

if it

leaves

like a

little

you know

like a

little

crack
at first
it's not
a big
deal
but over
time
you know
that thing
can you know
spiderweb and
spread out
and basically
take out
your entire
windshield
now there are
many forms of
telekinetic
attacks
not all of
them are
energetic
in a sense
some of
them are

basically
like
tripwires
and
you can
encounter
somebody
that's
essentially
like a
black hole
or like
you know
a dark
cloud
and
everything
they say
or do
around you
will have
a negative
impact
on what
you're trying
to do

and this
is a
different
type of
ripple
effect
a different
type of
telekinetics
that's
again
not
energetics
but
it's
something
along
those
lines
I'm
not sure
if you've
ever
encountered
somebody
that's

so
entrenched
in the
dark
side
but
there's
such
a
dark
cloud
that
you know
as soon
as they
open
their
mouth
you're
basically
running
into
things
or
stubbing
your

foot

or

things

are

falling

off

the

table

and

it's

just

like

you can

tell

there's

some

kind

of

cause

and

effect

and

so

some

people

are

just
you know
wired
a certain
way
and
you know
these people
tend to
put out
negative
vibrations
and
these
negative
vibrations
will have
small
impacts
on
small impacts
on
what you're
trying to
do
like a tripwire

like an
obstacle
in your
way
but
you know
this is a
different type
of phenomenon
for the
most part
but what
we're going
to be
aiming for
is
telekinetics
that are
energetics
in nature
where
you're able
to project
a weapon
that can
be used

against
an enemy
and
you know
this is going
to be the
basis of
future podcasts
right now
you know
we're just
basically
not doing
the
the podcast
like we usually
do in the
wilderness
we're basically
just kind
of like
in a real
compromised
position
and so
it's really

difficult
putting things
together here
right now
but
we'll talk
about that
in the next
podcast
ambushes
and honey
pots
but basically
we're not
in our
normal
tranquil
safe place
if you will
and so
there's a lot
of interference
in the matrix
right now
so this
podcast is a

little difficult
to put out
this is like
the third
rendition
of it
and
you know
I kind
of feel
like the
previous one
was a little
bit better
in terms
of its
delivery
but I
think this
one is more
comprehensive
in terms of
the information
and so I
think we're
going to go

with this
one we
could release
the other
one which
is pretty
good too
but I
feel like
there was
a few
things that
I could
improve on
so hopefully
you found
this podcast
somewhat
interesting
mind-blowing
perhaps
but
essentially
what we're
dealing with
is

for the
most part
is
disembodied
spirits
ghosts
from
alien
worlds
and
they
appear
for the
most part
in the
form of
a head
they're
not all
heads
there's
the phenomenon
of shadow
people that
we'll have
to talk

about
in more
detail
and they
tend to
be
have a
body
but
for the
most part
what you're
going to
be dealing
with
is
heads
and that's
kind of
like a
big
theme
in terms
of what
we're up
against

and
it's a
network
or a
hive
of
heads
a hive
mind
so
that's
basically
what you're
going to
encounter
for the
most part
and you
can see
that
pretty much
everywhere
you look
again
in the
clouds

in the
smoke
in the
fire
in the
trees
the
face
on the
moon
is
basically
a prime
example
of
what we're
dealing
with
we're
dealing
with
heads
we're
dealing
with
faces

we're
dealing
with
disembodied
spirits
they have
no body
it's just
basically
a consciousness
encapsulated
in the form
of what looks
like a head
and for the
most part
these heads
do not have
a human
form
at all
and so
you know
Paul knew
this
2000 years

ago

at least

2000 years

ago

whenever the

original Bible

was written

not sure

what else

we can add

here

but

you know

these heads

basically

are all

connected

to one

another

and

some of

these heads

are

a

consciousness

and some

of these
heads
are a
projection
coming from
something else
and so
they show
up
in our
world
as a
face
but it's
not the
face that
you see
that's
the real
consciousness
it's in
fact
a weapon
and that's
I think
that's

another big
concept
that we
that we
should have
talked about
but essentially
a lot of
what you'll
encounter
in spiritual
warfare
are weapons
and they
may or
may not
they may
or may
not be
the source
of
the
attack
and so
like we
were saying

you know
if you
were to
and this
is something
that we'll
you know
we'll
refine
and talk
about more
in the
future
but
essentially
with the
idea of
tele-energetics
is that
you're
projecting
a type
of weapon
that is
being used
to attack

an enemy
and you
know for
the most
part from
the human
perspective
you know
we think
of weapons
we think
of you
know like
planes and
missiles and
lasers and
things like
that but
from the
perspective of
an alien
species
you know
their perception
of a weapon
might be

something much
different
and the
feeling is
is that
some of
what we're
encountering
are
weapons
instead of
consciousness
they're a
projection that
is basically
like an
automated
weapon
that is
going around
attacking
people
but it
may not
be the
consciousness

that itself
that
that is
causing
that projection
so that's
going to be
a topic
for a
future
podcast
it gets
kind of
difficult
to explain
it's
essentially
like the
idea of
an emulation
and so
you know
this is
going to
kind of
sound

a little
techy
but
in the
world of
information
systems
there's
such a
thing
called
emulation
which is
a virtual
machine
inside a
machine
and so
you know
this is
this isn't
something that
most you
know
computer users
have

experienced
but essentially
you know
maybe if you
use Linux
or something
like that
and you're
trying to run
Windows
in Linux
or you say
you have a
Mac
and you
want to
run
Windows
while you're
on your
Mac
desktop
essentially
what you're
going to
be doing

is you're
going to
be opening
up a
virtual
machine
and so
this
virtual
machine
isn't
the actual
operating
system
that's
running
your
computer
it's
an
operating
system
within
an
operating
system

and so
you know
this is
again
this is a
concept
that we're
going to
have to
refine
when we're
you know
back out
in the
wilderness
doing
you know
a nature
hike
because
where we're
at right
now
I mean
there's
just like

cars
driving
by
and there's
all sorts
of
distractions
and it's
just
not the
most ideal
kind of
situation
but it's
been a
long day
but
the idea
of emulation
or machines
in a machine
or virtual
machines
or virtual
projections
or drones

or you
know
artificial
intelligence
you know
basically means
that
you could be
looking at
multiple layers
of
problems
before you
get to the
real problem
and so
some of
some of the
things that we're
fighting against
are you know
real demons
that are
basically
like ghosts
that are just

like a self
contained unit
I think that's
probably the best
way to put it
some of the
things that you're
going to encounter
are a self
contained unit
some of the
things that you're
going to
encounter are
a projection
from a
consciousness
and this
projection
is a
weapon
you know
when you talk
about projection
I mean
we're going to

have to really
define that
because
essentially
when you're
looking at
you know
the classic
definition
of a
projector
right
like the
old school
film projectors
that we would
you know
kind of like
watch in
class or
something
you basically
have you
know light
going through
an image

and that
image is being
projected onto
a screen
and so the
image that
you're seeing
is a copy
of the original
image
and
and you
know the
whole
you know the
whole thing
together
we call a
projection
in telekinetics
the weapon
that you're
using
is essentially
a projection
of your

mind
now
I think
as humans
we're probably
using a real
simple form
of
projection
and it's
something that
you'll encounter
eventually
but a more
sophisticated
form of
projection
would be
basically
a weapon
that
is somewhat
automated
in nature
and this
weapon that

is automated
in nature
could appear
like
a face
it could
appear like
something else
and we'll get
into more
specifics in a
future podcast
but essentially
some of the
things that you're
going to be
dealing with
just to keep
it simple
and
short
some of the
things that
you're going
to encounter
will be

like we
said
a self
enclosed
consciousness
in the form
of a head
and some
of the things
that you're
going to
encounter
are going
to be a
projection
from another
consciousness
and this
projection
will look
like a
head
it will
attack
through its
eyes like

a regular
demon
and this
is again
something that
you'll
encounter in
the future
but what
you're actually
fighting
isn't the
actual
entity itself
but a
projection
or a
facade
or a
weapon
of the
consciousness
that's
responsible
for that
projection

and so
it's again
kind of like
going back to
the old school
projector
sometimes
you're
fighting
the image
on the
screen
and sometimes
you're
fighting
but okay
sometimes
you're
fighting
the image
that you
see on
the screen
but what
you really
want to

fight
is
the source
of that
projection
which is
the movie
projector
but of course
the movie
projector
is
a consciousness
that could
be on the
other side
of the
universe
and trying
to find
it
is
basically
where the
spiritual war
is really

at
there's
something
that's
attacking
this planet
there's
something
that's
trying to
have an
influence
on this
planet
some of
the stuff
is really
here
but some
of the
stuff
is actually
a telekinetic
attack
that is
originating

perhaps on
the other
side of
the universe
and
tracing
the source
of that
attack
is basically
like climbing
into a
wormhole
I mean
you've heard
of the
idea of
going down
a rabbit
trail
that's
nothing like
climbing into
a wormhole
and trying
to figure

out
what the
source
of the
projection
is
but this
is something
that actually
happens
more naturally
than you
might suspect
like you
might be
thinking
oh I
can't
even
find
you know
the stuff
that I'm
looking for
in my
home

let alone
some kind
of alien
consciousness
through a
wormhole
on the
other side
of the
universe
but in
fact
we're
naturally
wired
to do
that
it's kind
of like
when you
hear a
sound
and this
is where
we're
going to

leave it
when you
hear a
sound
you
basically
automatically
know
where it's
coming from
more or
less
I mean
if you
hear just
like one
sound
once
you know
it might
be a bit
of a
mystery
like
you know
where

you know
where did
it come
from
but if
you hear
like a
repetitive
sound
like a
knocking
or you
know
several
gunshots
or something
like that
then you
have a good
idea of
where it's
coming from
just natural
instinct
you know
if you see

like an
animal running
across the
field you
have an
idea of
where it's
coming from
naturally
and so
we're
naturally
wired
to
figure
this out
what I'm
describing
sounds really
complicated
and it
sounds almost
you know
extravagant
but once you
start to

experience
telekinetics
and spiritual
warfare for
yourself
you'll see
that essentially
you're built
for this
it's like
you know
being a
hunter
or something
you're built
for this
it'll come
naturally to
you
but the
bigger concepts
and the
like
are just
something
that have

you know
have been
hidden from
you
so that
you don't
rediscover
what your
true purpose
is
especially
as Christians
and so
this is the
journey that
we're on
and again
this podcast
is kind of
a catastrophe
compared to
the other
ones in
terms of
the flow
but again

we're just
not in a
real good
environment
to do
a podcast
right now
so we do
apologize
for that
we'll try
and
we're trying
to set up
a mobile
studio
and we're
trying to
you know
get into
an environment
that's more
conducive to
doing
productions
again

podcasts

broadcasts

and the

like

but

the past

you know

couple days

and weeks

have been

really

difficult

I mean

the past

couple years

have been

difficult

but

we've

you know

reentered

the theater

of war

pretty hardcore

the past

couple weeks

so we've
been
focusing a lot
on that
you know
some people
might be
wondering
what are
we doing
where are
you
where are
the broadcast
and the
like
but we've
been
focusing
our time
on
spiritual
warfare
more than
just
you know

entertainment

and

yesterday

basically

I mean

the spookiest

thing in the

world

basically

happened

and we

were

you know

deep in the

wilderness

making armor

and

you know

had a nice

little spot

like you know

way in the

woods

you know

kind of like

a park

but it's
you know
more rustic
than a park
I mean
this is like
basically
you know
a timberland
where they
basically
you know
cut down
trees
and the
like
and there's
like forest
trails
and they
you know
it's kind
of like a
real unique
kind of
place

and
and
last night
at around
like 8pm
or so
you know
we're
packing our
things up
putting
you know
getting ready
to hit the
road
and this
is you know
way out in
the middle
of nowhere
you know
there's a few
people that
come by
a few hikers
or a few

people that
know of the
of the trails
that come by
but not a whole
lot of activity
but last night
at around like
8 or so
you know
basically all of a sudden
like a huge
caravan of
of cars
comes
down the
forest trail
and I'm looking
at this
because I'm about
to head on this
trail to go out
back to the main
roads
and all of a
sudden

there's like
you know
about 20
cars
all with their
headlights
it looks like
a parade
like a convoy
coming
and I'm like
oh man
you know
this is gonna
take forever
and
you know
I'm basically
in this
roundabout
and
it's basically
like just
a round
clearing
where people

can you know
park
and there's
like trails
that basically
shoot out
in every direction
and then there's
like another
roundabout
like it
about a
a click
down the
road
and most
people go
to that
roundabout
there's like
you know
buildings
and picnic
tables
couple picnic
tables

but you know
the first car
you know
comes in
it's a red
car
and it's
basically
got like
double or
triple six
on the
license plate
it parks
right next
to the exit
of this
roundabout
which is
you know
the only way
out as all
of these other
cars are coming
in
and

this guy
gets out
of his car
and he tries
to shut
the gate
and I'm
like
you know
this looks
like an
ambush
and so
basically
you know
it's like
eight at
night
and it
almost looks
like you
know
this is a
hunting party
or a
dinner party

you know
and I'm
for dinner
and so
I'm like
you know
I basically
like pull
out
you know
zip by
this guy
as he's
trying to
close the
gate
but I mean
this guy
doesn't stop
you know
to park
and just
like wait
for the
you know
wait for his

friends or
anything
this guy
stops
because at
each of
these roundabouts
there's like
there's like
one way in
and another
way out
and so
this guy
comes in
from one
way
like say
he's coming
in from
the west
and he
goes to
the east
side of
this roundabout

clearing
where there's
a gate
and this guy
is trying
to close
the gate
as all
these cars
are coming
in west
so I can't
escape going
east
you know
I see
this guy
park
and then
start messing
with the
gate
you know
I mean
I'm like
I'm out

of here
and as
I'm blowing
by this
guy
I mean
he's like
basically
like freaking
out
but it
just looked
like they
they were
trying to
close me
in
and it
was an
ambush
and so
yeah
I right
now I'm
just kind
of avoiding

the deep
forest trails
for the time
being until
I reevaluate
that scenario
but yeah
I mean
they basically
I think
they tried
to pin
me in
last night
and do
me that
way
would have
been pretty
bad
so I think
it was a
lucky escape
last night
personally
from my

opinion
and so
yeah
I'm thinking
about
where I can
set up
shop
and do
more of
these
Jedi
training
podcasts
without
a whole
lot of
interruption
from
the Matrix
cell towers
and the
like
but
it is
what it

is
but just
thinking about
last night
man
I was
you know
I was
like that
was a
close call
one of
many but
that was
that was
definitely
a close
call
you know
I'll
probably
I'll probably
do a podcast
or a video
cast on that
with Google

Maps so I
can show you
the layout
of the terrain
I don't want
to necessarily
do that
because it
kind of
gives you
more of
a
of a
location
than I want
to give
but
I don't
want to
give too
many
specifics
in terms
of like
you know
where I'm

actually
operating
from right
now
but
I'll see
if I can
put something
together
so that I
can actually
like you
know
show you
like what
the honey
trap
was like
in any
case
we'll leave
it there
for this
podcast
hopefully
that was

a lot
of info
we'll come
back
tomorrow
we tend
to put
these
together
Sunday
through
Thursday
or Friday
depending
on
the
schedule
but
we try
not to
put them
together
Friday
or Saturday
because
of the

Sabbath
and
that's
something
that
we're
going to
have to
have a
discussion
on
obviously
hopefully
most
people
understand
what
the
Sabbath
is
you know
Jesus
certainly
celebrated
the
Sabbath

and
so I
think we
should
too
you know
a lot
of us
you know
just kind
of
celebrated
on Sunday
a ceremonial
observance
if you will
but
so yeah
we will
we will
generally
do
new
podcasts
Sunday
through

Thursday

and then

Friday

Saturday

is just

you know

basically

our

our day

off

until

until the

next time

if you're

listening to

this

you are

the

resistance

you
