

TELEKINETIC WEAPONS AND PROJECTION (EPISODE 28)

Welcome back to Jedi Training. The title of this podcast is Telekinetic Weapons.

Telekinetics is essentially the mental projection of your spiritual self. I want you to let that sink in. Telekinetics is the mental projection of your spiritual self. You are mind, body, and soul. You are a metaphysical creature in a metaphysical world. Everything around us essentially is energy. Everything around us has a spiritual component embedded into it. It's not just people, but literally everything has a spiritual component embedded into it, and everything is basically a form of energy. And the projection of the energy that comes from us

isn't entirely just us. It is what we are connected to. And so as Christians, we have the spirit of Christ flowing through us. But the soul, the body, the person is capable of generating a ton of energy,

like a nuclear reactor. And we're not going to debate if nuclear reactors are real at this stage. But

in theory, you could take a little bit of material and produce a lot of energy. And essentially, the body is like a bioreactor. You are like a bioreactor. And the nervous system is like the electronics.

The brain is like the super AI. And the body is like a life support system that is held together by

metal, calcium. Essentially, we're like biorebots. We are the top of the line of nanotechnology.

Nanotechnology is so advanced that it's lifelike, quite literally. And when we go down to the DNA,

to the level of the DNA, it's a programming language. It's a triplet code. I mean,

we're basically biorebots in a metaphysical world infused with spiritual energy. And the focusing of

that energy, the projection of that energy, think of like a projector, you know, old school movie projector or like the old school movie theaters, the projector that's projecting onto the screen,

we can project energy into the environment, we can project things into the world around us. And the

more experience you have, the stronger your projection will be. You're not necessarily going to be a top of the line Dolby IMAX projector day one. But you'll get there as soon as you gather all of the required components. It's just like a projector or any other kind of machine.

It requires a lot of different components to function. And for telekinetics to work for you in this spiritual war against the enemy, you basically have to have faith. You have to have virtue. You have

to be experienced in terms of, let's say, martial arts, to a certain extent, experienced in as many

domains as you possibly can be to focus all of that knowledge into a point. And it's kind of like the

way consciousness works. Consciousness is the flowing of all of your sensory perceptions and your

cognition into a point in your brain. And it flows in real time. And all of a sudden, you know, you

experience this as consciousness. And so you have all of these things coming together, fusing together

into a point. And that is the miracle of life. And there's tons of examples of this, of this fusing together in the world around us that makes incredible things. But essentially, all of the components

that we've talked about are required to focus your energy into a telekinetic weapon that can be used

against the dark side. And that's exactly what we're looking to accomplish. This is a war. And obviously, we can't go around burning witches like, you know, in the good old days during the Spanish

Inquisition. So we have to do this in a way that's not going to get people arrested, for the most part.

So essentially, or eventually, this war will probably go hot in many places. But for the time being,

it's a cold war. And so telekinetics is the best way to basically fight. But it is a real fight. It is a real war. And as soon as you get into it, here comes the enemy in ways that you can't even imagine.

And so we're going to talk about all of that in future podcasts. There's still a lot to unpack and a lot to prepare you for like target selection, visualizing the targets, not only the ones that we see in this world, but the ones that come from the spiritual world. In fact, there are planets or

planet like objects out there that are totally spiritual in nature. And there's ghosts and demons coming from these places. Essentially, this seems to be one of the sources of the problems. But

the current environment is like a Fukushima meltdown at CERN and some kind of portal is just open and

it's just flooding the planet with dark energy. And these things come here to feed off of people, to

feed off of sin, to feed off of human activity. They're like parasites. And during that process, they're

killing their victims. Slowly but surely, torturing them, tormenting them. And it's basically like a plague that affects everyone. And Christians are some of the most sensitive to all of this.

And they have the tools to fight back. Whatever it is, it's an invasion. It's an onslaught.

And so people basically have to defend themselves every which way possible. And we'll get more into

target selection and what we're actually dealing with in more specifics in a future podcast. But at this

stage, you really have to keep doing everything that we've been talking about. Read the Gospels

every day. Go out into nature. Train your body. Train your mind. Start building armor. Start preparing

shielding materials. Start getting yourself a fortress, if you can. A bunker where you can survive

just about anything that comes at you.

But essentially, telekinetics is the mental projection of your spiritual self, of your spiritual powers, if you will. And this can be projected in many different ways. Now, this isn't the main focus of being a Christian, but this is the main focus of being a Christian on the battlefield when we're fighting against demonic forces. So this, you know, in no way supersedes what we should be doing every day. Being nice people, being charitable, helping people out, evangelizing, healing the sick, cleansing the lepers, raising the dead, bring out your

dead, as they used to say. And of course, casting out demons or unclean spirits.

But all of this is what we should be doing. But we should not neglect the spiritual warfare aspect to what's going on. And that's why telekinetics is really important. And that's why, you know, just being introduced to these ideas will essentially bring you to places that you've never been before. And in yesterday's podcast, we were talking about the sword of the spirit. The sword of the spirit is a projection of your spiritual energy.

To be used as a weapon in this war.

And a sword is just one of the weapons that you can manifest, like a lightsaber, if you will, not only in your local environment, but also into the enemy's environment. And that's where we really need to go. We need more people basically shelling the enemy from the world of the living,

to say the least. And so that's essentially the concept. Now the limits of what you can project is based on your imagination. So hopefully you have some experience in science fiction movies,

you can copy and paste some of those ideas and bring them into this war. And that might sound a

little cheesy, but essentially, you know, whatever works. Now some things work better than others.

Of course, all of us would want to imagine all sorts of things. And you can get there, but of course,

you have to be careful because the wicked will not be justified.

So we'll get more into that in target selection in an upcoming podcast. You know, what's fair game? What do you want to think about when you're projecting weapons into the battlefield, whether it be in this world or in other worlds? And we'll get into that.

But for the time being, you have to work with your local environment. And perhaps there are some notable evildoers in your local environment that you know are witches, that you know are of the dark side, beyond a doubt.

And so you can practice on these people. But essentially, once you start engaging the enemy, you're going to find yourself swarmed and attacked by a hive of enemies in your local area. And you're just going to have to trust your feelings. You're going to feel it when something happens to you. You're not going to know exactly what it was or where it came from.

It's going to be mysterious, nebulous, invisible to a certain extent. And then you're going to have to practice fighting back, dodging bullets, if you will, telekinetic bullets that can come from all directions and from other dimensions, other universes.

And this is another problem with what we're dealing with. And we'll get more into that in a future podcast. Don't have a whole lot of time today to get into everything that I want to get into.

But I want to, you know, stay on the idea of focusing your energy. Now, you have to practice with that energy, first and foremost. And that's why doing things like Tai Chi, be sure to check out that Tai Chi podcast.

And spend a little time there trying to feel the energy flowing through your hands. And then, you know, one of the easiest ways to basically project weapons is through your hands.

Imagine, you know, imagine, imagine, you know, imagine, you know, a laser basically coming out of your pointer finger and imagine penetrating an enemy like it's a giant needle or something or a giant sword or of some sort.

But essentially, that is how it begins. And then your projections can get bigger. But of course, practice makes perfect and leaving doubt behind and not being the perpetual skeptic will help you evolve quickly.

Otherwise, you're always just going to be like doing it halfway, not sure, you know, etc, etc. You have to really want to engage this enemy, make a difference.

And it starts in your local area. You find the bad guys, start with people that you know are, you know, bad news. And you can basically, for the most part, tell them by, you know, a few different obvious factors.

You know, they're wearing shades on a shady day, they're afraid of the light, they're constantly blaspheming, constantly gaslighting you constantly causing trouble, etc, etc. The

troublemakers, basically.

So these are the people that you want to practice on their obvious targets. And, you know, you have to also look at people's auras. We were talking about that in a previous podcast, basically looking at people's auras is kind of like looking at people sideways a little bit, or looking just outside of them, focusing just outside of them and waiting for a type of hazy aura to appear around them.

to these people's auras sucking off of them. Sometimes they're following them, sometimes they're in them. These things can come in all shapes and sizes from the size of a microbe to something that's, you know, absolutely huge.

And you'll see them more once you cross into the twilight zone. And that's something that we'll talk about, again, in an upcoming podcast. But basically, you know, you have to go there to be able to see them here. But once you see them there, then, you know, they can see you and chances are they've already been watching you.

So we'll leave it there for this podcast. Appreciate everybody tuning in. We'll talk more about casting out demons, focusing, projecting weapons, what kind of weapons, where, how, who, when, why, etc. in a future podcast.

But just stay with the idea of telekinetics is the mental projection of your spiritual self. Keep feeding your spiritual energy through virtue and charitable acts and by listening to the word and immerse yourself in it to make your spiritual energy grow.

And that way you'll have more potential to project weapons into the environment. Until the next time, if you're listening to this, you are the resistance.
