

FEELINGS AND INSTINCTS (EPISODE 30)

Welcome back to Jedi Training. The title of this podcast is Feelings and Instincts.

Obviously, feelings and instincts are part of your survival skills.

People use that all the time to manage everyday situations.

But this is especially true for telekinetic spiritual warfare.

You really have to sharpen your feelings and your instincts and rely on them

because much of what you do in telekinetics and spiritual warfare is based on instinct and feelings

in a very rapid way.

And so you really have to trust your feelings and you just have to do what's natural for you

and not worry about what other people are thinking or saying

when it comes to what's going on out there.

And many of us have had plenty of experience in that already.

We don't trust what other people are saying.

We use our instincts and our feelings all the time to survive and to make choices in life.

And you really have to expand on that and almost bring it to another level in telekinetics.

You really have to go with your feelings on the situation, especially target selection.

And we'll get more into that in a future podcast.

I was going to say prodcast, but I was thinking production, obviously.

Now, feelings can be location specific.

Like you can walk into a certain location and get good vibes or bad vibes.

But many places these days you'll get bad vibes and worse vibes.

And you really have to pay attention to that because when you walk into a location

and things just start going wrong, don't think of it as coincidence or bad luck.

Think of it as there's cause and effect.

And generally speaking, there is some metaphysical cause to what you're experiencing in the real world.

Sometimes it's a ripple effect.

And we'll get more into that.

It's kind of like quantum entanglement between the physical world and the spiritual world.

Or we should say spiritual worlds.

But feelings can definitely be location specific.

And this can be used for fight or flight.

You know, either run away or think about it later during target selection.

But trusting your feelings and your instincts will help you gain a better topography of not only your local area,

but wherever you might go or experience.

But basically, if it looks bad, it feels bad, it probably is bad,

if you have enough experience in life in general.

You know, some people are just clueless.

And some people make a lot of mistakes.

And mistakes do happen.

And that's why, you know, we'll be talking about how to do your best on the battlefield in a future podcast as well.

But feelings and instincts are super important.

And if you run into places where everything just kind of goes wrong,

then avoid that location.

Move around a lot.

Discover places that feel better.

And definitely trust your feelings.

And not just like emotionally speaking, you know, how you get good feelings and bad feelings about people,

but also trust your feelings when it comes to pain and the like.

Generally, pain is not natural, despite what some people might say.

Pain is generally metaphysical in nature.

There's something usually attacking you that's causing the pain.

That's the best way to look at it.

Now, you can look at it from the biological perspective,

or you can look at it from the spiritual perspective.

But generally speaking, when you feel pain, something is attacking you.

And it's not natural causes.

It's not some kind of syndrome or some kind of disease.

But if the attacks go unchecked, it will definitely cause death.

And sometimes it's sudden death.

And so you really have to trust your feelings,

because if you're starting to feel pain, and it can be any kind of pain,

head pain, eye pain, tooth pain, any kind of pain,

it's generally coming from some kind of weapon.

And it can be metaphysical or it can be physical in nature.

In this day and age, many things have become weaponized.

And we've talked about that in the broadcast and the main show.

But generally speaking, pain comes from a weapon.

And in the city, it's really tough to determine what that weapon might be.

There are so many hidden weapons out there.

And there are many types of technology that we haven't fully discussed or explored yet that can cause pain that you can't really see.

And it basically operates in empty spaces.

And so you have to trust your feelings in that regard as well.

We used to say, you know, listen to your body.

And if your body is experiencing pain, most people just, you know, run to a professional and get some advice.

But essentially pain is related to some kind of weapon.

And again, left unchecked, it can become a serious issue.

And then there's just really nothing anybody can do.

And so what you want to do is experiment with locations and see if your feelings and your pains change.

But be on the lookout for new arrivals.

Because many things have become weaponized, including cars and even people with demonic symbiosis.

And so chances are, if you've been experiencing pain at your location, it's the result of an attack and you need to rule that out.

And you will be able to rule that out by changing locations or by using shielding.

And you'd be surprised, you know, what a difference even a little shielding can make in terms of what you're feeling out there.

And so understand that.

Because as you engage this enemy, they will engage you.

And all of a sudden, you know, mysterious things will happen.

Sudden and mysterious.

Headaches, eye pain, heart palpitations, chronic fatigue.

And all of these things are associated with attacks.

And they may be from this world.

Or they may be from another world.

Or from weapons that you can't see.

Or from entities that you can't see.

And of course, this makes things very difficult.

Especially when you're on the front lines.

And it requires a lot of MacGyver skills to survive.

Not sure if everybody understands MacGyver skills these days.

I would assume so.

But do not underestimate what you're up against.

Or underestimate the means that you'll need to survive.

And never worry about what other people have to say.

Especially the demons that are embedded near you.

Why are you doing this?

Why are you doing that?

What's going on?

You're acting strange.

You'll probably get a lot of that already.

But essentially, they're trying to disrobe you.

Unarm you.

Have you run around naked.

So that they can just take you out.

So, trust your feelings.

Trust your instincts.

Trust your instincts.

Trust nobody else.

Period.

Ever.

From here on out.

The Judas in disguise.

Is an example that should be on everybody's mind.

And it's obviously the worst.

Because.

That's the only way they can really stab you in the back.

And that's what they do.

They always choose the weakest moments.

They always.

Do it while your back's turned.

And so.

There's a lot of lessons to learn.

When it comes to.

What's going out there.

In the matrix.

But.

Trust no one.

Trust your feelings.

And your instincts.

If it looks bad.

Feels bad.

Then.

Act appropriately.

And.

Learn to trust your instincts and feelings.

In the future.

On a very rapid.

Kind of scale.

Especially when we get to target selection.

And we get into some more advanced.

Metaphysics.

Like we said.

It's basically like making a list of fig trees.

And expiring the targets.

Over and over again.

Until.

Their bucket.

Overflows.

And.

You know.

Kind of say that.

In a physical way.

But.

It's also applicable.

In metaphysics as well.

They keep attacking you.

They keep trying to.

Tear down your walls.

And.

And.

You know.

Get you depressed.

Or angry.

Or frustrate you.

Or waste your time.

Or.

You know.

All the other things.

And so.

Basically.

You know.

You can't give an inch.

And.

You basically.

Have to.

Make their life as.

Terrible as well.

And.

You know.

We don't just mean that.

In a physical way.

You know.

One of the.

First encounters.

With demons.

In the gospels.

Talks about.

You know.

This guy in a cave.

Coming out.

And the demons were like.

You know.

You're not going to torment us.

Before the time.

Are you?

And this is definitely the time.

So.

We'll.

Talk about.

Applying pressure on.

Demonic forces.

In.

The very near future.

But in the meantime.

Keep doing.

All of your prep work.

Shielding.

Preparing.

Spiritually.

Mentally.

Physically.

Financially.

And.

Knowing the bible.

By heart.

Every bit of it.

And.

Practicing.

Your tai chi.

And.

And.

At least.

You know.

Playing with it.

A little bit.

Of course.

It's not.

Supposed to be the focus.

Of your life.

It's just to get you.

To understand.

That.

There's energy.

Flowing through you.

That will focus.

And apply.

In a much more.

Constructive way.

Are.

Are.

But.

But.

Keep training.

Again.

We can't.

Drill you.

In the background.

But.

Train like.

Armageddon.

Is just around.

The corner.

Train like.

The end times are near.

never let your lamp go out

never be unprepared for what's coming next

and

we'll keep coaching you

the best we can

so that you can become effective on the spiritual battlefield

there's so much more to cover

there's so much to talk about

but right now we just want to focus on

feelings and instincts

get to know places, find new places

explore, people watch

talk to people

try to evangelize, see how far you get

try to overcome the objections

and
get ready for
some real combat
but we want you ready
you're never ready enough
but we want you ready because
it's a war out there
until the next time
if you're listening to this
you are the resistance
you're the resistance
