

JEDI TRAINING - THE DEATH WHISTLE (EPISODE 40)

Welcome back to Jedi Training. The title of this podcast is The Death Whistle.

Wonton Ton, if you take Kung Fu, if you take Kung Fu, you may learn the Death Touch, La Touche Mortelle.

You like that? Speaking in new tongues?

You learn a lot by speaking other languages, but of course, nobody's got time for that.

So, in any case, we're going to talk about the Death Whistle.

And we're going to be talking about a lot of concepts that, if you think about them, you can expand them and scale them up.

So, the Death Whistle, the Death Touch.

Okay, Death Touch is physical combat.

And that's something that you should be doing.

That's something that you should be training for, not doing, unless you really have to.

But this is war, and this is a metaphysical war, part in the physical world and part in the spiritual world.

And essentially, they merge, they coexist, they intermingle, they're quantumly entangled.

We don't see it with our naked eye because we see the veil, the skin, because we couldn't handle the spiritual side of things.

Trust me, you can't handle it.

I can't handle it.

Every day, I'm like, this is the most disturbing thing ever.

This reality is beyond disturbing.

Anyways, Death Touch, physical combat, you know, knowing anatomy and physiology will help you with the Death Touch, as far as where to strike.

Good to know because, essentially, these concepts also apply in the spiritual world.

In fact, just about every concept, strategy, logic of combat, warfare, etc.,

that applies in the physical world applies in spiritual combat.

So, this is a concept that's still really novel to most of you.

But we're hardwired to be able to fight in the spiritual battlefield.

But it's a battlefield that you can only see basically with your eyes closed.

You can see the shimmer of it to a certain extent with your eyes open.

And once you become aware of it, you can feel when the other side is attacking you.

And then it's basically you have to put on your 5D third eye goggles, close your eyes, look to see what's out there.

But you can feel the direction.

You can see in all directions.

It's a very disturbing reality.

Crossing over into the twilight zone allows you to gain this or regain this ability.

But essentially, with your eyes closed, you're somewhere.

Not just where you're at physically, but you're somewhere in the spiritual world.

And all of that we'll get into more in a future podcast.

We're not going to get ahead of ourselves, but it's important to understand the scale of things.

So basically, here we're focusing on spiritual attacks in the physical world.

Your spiritual self is attacking the physical world.

And components, spiritual components that may be attached to it.

Because everything is attached to a spiritual component.

Everything is both physical and spiritual and probably shadow as well.

Any case.

So yesterday we were talking about push and pull.

So push and pull is basic concepts.

You pull from a person.

And basically, you breathe in.

And you're breathing in not only through your nose, but basically through your eyes.

And essentially, you can kind of feel it like in your brain.

So it takes a little practice.

But you're hardwired to do this.

All of a sudden, it's like feeling the nitrous kick in or the clutch go or something.

Just you do that.

You focus on breathing in.

You're looking at the target.

And you're trying to essentially pull the energy with the help of your eyes.

Your brain will kick in and you'll feel it a little bit.

And then we were talking about the push, which is basically a laser pointer at somebody, through somebody.

And imagination, again, is key because it's mind over matter.

So we're using our imagination to essentially manifest telekinetic abilities that are hardwired into your physiology, into your DNA.

So we're rediscovering this ability.

But it's important.

And I want people, some people to know.

Because war is a risky business.

So the time it would take for, you know, many people to put all of this together confidently and all of that could take another hundred years or so.

Never know.

So, okay, push and pull.

Now, what is, and now we also talked about speaking the fig tree.

We really got to do a podcast just, you know, all on the scripture aspect of the fig tree.

Because it's a huge lesson and it's basically the basis of these telekinetics seminars.

So, when you speak and believe as a Christian into this constructed reality, given that you're the image bearer of our creator, we're more than just flesh and bone.

And so when we speak and believe, Jesus says it'll happen.

And the more we believe, the more it'll happen.

Now, you have to think about this in terms of the disciples.

They saw a lot of things.

And yet, they still had trouble believing certain things.

Like when Peter was on the water and all of a sudden, you know, he gets scared and begins to sink.

So, even, you know, seeing and experiencing these things, you'll want to disbelieve.

You know, you could be walking on the water and you're like, no, man, this just can't be happening.

And all of a sudden, you know, your aura shrinks and you just begin to sink.

It's basically the way it goes.

And that's another important lesson, you know.

You've got to remain positive, as positive as possible.

Otherwise, you know, you can't get very far in telekinetics.

And it's tough staying positive on the battlefield.

Really difficult.

Okay.

So, we talked about commands.

We talked about push, pull, commands.

Okay, so the spoken word is super powerful.

It's referred to as the rhema.

The spoken word.

It's hugely powerful.

It's why idle talk is, you know, hugely offensive.

Again, know everything in scripture that you can about everything.

But idle talk and all of that, the importance of your words is, you know, basically overlooked these days.

But your words are hugely powerful.

And so, if you put things together.

Okay.

Your eyes, your fingers, your hands are like antennas.

You can push, you can pull.

You can speak.

And so, now you can put things together and make cocktails.

And make cocktails.

So, the whistle is the cocktail.

But it's an important idea.

It's a concept of transporting an idea from one place to another through a whistle.

And so, basically, push a command through a whistle into the target.

So, they're speaking into people.

And then you can whistle through people.

You got to try that.

You got to try that.

And then, you know, you got to be careful when you're testing this out.

But, essentially, you know, when you're speaking into somebody, it's basically the midsection.

And the idea is that your words go into the person.

Instead of, like, you know, speaking at a person.

And they're listening and they're talking back to you.

You're speaking into the person versus speaking at the person.

Into the person.

So, with that concept, we add whistling into the person.

Now, we're not trying to whistle enchantment.

You got to be careful about all of this.

This isn't about, you know, you're going to whistle at somebody and say, you're going to love me forever like a love potion.

That's not the idea.

The idea of the whistle is to basically, is like a hypersonic, telekinetic, hypodermic needle.

Hypodermic needle.

So, we're trying to inject code, fig tree code, into a target via the whistle.

Are you seeing it yet?

Yeah.

Okay.

So, we are using the whistle as a carrier wave, a lily wave, to inject our attack, which is telekinetic, in line with the fig tree.

And that way, the process is pretty much come and gone in a second, and you can move on to the next target.

This is, you know, an extremely kind of, you know, abstract idea, but I think you'll find a use for it eventually.

So, basically, it's what it sounds.

And what kind of whistle?

You know, are we talking about the long whistle?

No.

No, you don't have to do a long whistle and draw attention to yourself.

Although it will be kind of, you know, there will be some noise.

But, basically, it's like, almost like a chirp, but a machine gun sound, you know?

Were you ever a kid, you know, playing with machine guns and you'd make that sound like a machine gun is going off?

Basically, the idea is to use your whistle like a machine gun.

And it can just be a shot or it can be open fire.

Now, when does this happen mostly?

At the grocery store?

At the shopping mall?

At work?

How about at home?

Do you think that would be appropriate?

No.

No, it's not appropriate.

The art of Jedi, of being a Jedi, and, you know, agents of the dark side, is basically to be discreet.

And, unremarkable.

It has to look normal.

Everyone is suffering in silence.

Basically.

So,

when do you use the death whistle?

Usually in your car.

You drive and buy.

It's like the drive-by.

There's a lot of car wars.

In fact, it's war wherever you go.

But,

as you're going places, basically,

you can just kind of tell.

Especially where I'm at.

I mean, it's just unreal.

Just how shady and trolly and witchy and nasty and disturbing, you know, most people look.

And,
even if you
get fooled or baffled by their
nice demeanor,
eventually you find out they're a
they're a crazed
libtard
just waiting to stab you in the back.

For the most part.

But,
essentially, you know,
there's days where you just
you just can't take it anymore.

And,
you know,
it's basically
you're driving around
and you're just
hitting targets.

It's, you know,
it sounds
excessive.

But,
you're not on the dark side of the planet.
You're,
you know,

hopefully back home

in a normal place.

Although,

I don't think

normal really exists anymore.

But,

basically,

you know,

this is

what you can do.

So,

now we can expand the routine a little bit.

And,

not only are we practicing our sessions of local area warfare at our home base,

but,

we're also

going to be

doing

verbal commands

and

drive-by

assaults

telekinetically.

there's always an opportunity

to close your eyes

and

send a message.

You think about how many messages and texts you send every day,

just idle talk,

just,

you know,

BS for the most part.

What are you doing?

How's the weather?

Etc.

Right?

You know,

reschedule

30 minutes for telekinetics

in the day.

an additional 30 minutes.

Do 30 minutes at night,

30 minutes during the day.

Go through a list,

hit them,

hit a few targets.

You see somebody witchy,

you know,

let them know.

and,

obviously,

that accelerates your

priority

on

the red list.

And so,

you'll get feedback

and you'll realize,

I should have taken the blue pill

and then it's too late

and then it gets worse

and all you can do is just

adapt,

survive,

and

attack.

And so,

right now,

you're kind of looking

at this from the outside,

looking in,

wondering,

you know,

should you jump in the pool?

And I'm trying to tell you,

like,

quite honestly,

this is the worst decision

anyone can ever make.

But,

I don't think there's

any escaping the,

the world that we live in

and the gravity of the situation.

And chances are,

most of you

will be targets

if you're not being targeted

already without your

awareness.

this system

will just

accelerate disease

and

it all looks natural

and you just

go into a depression

and it's all over.

Before you even

had a chance

to fight.

So,

it's like,

you know,

a sneak attack,
nuclear war,
kind of scenario.
It's happened.
You may not have seen
the mushroom cloud,
but you know,
a lot of people
got nuked
biologically
with the 5,
you know,
5G
and stuff like that.
so,
you know,
there's,
there's,
there's every reason
to jump in,
but again,
it's like
dealing with a rabid dog.
It's like
holding a wolf
by the ears.

You don't like it,
but you don't dare
let it go.

That's an old
expression
from the pioneer
days.

In any case,
so yeah,
trying to justify
this,

you know,
I'm still in the
mindset

of like

1995,

you know,

that's normal

for me.

1995,

1999,

you know,

those days,

that's normal

for me.

everything else

is abnormal.

And so,

I'm thinking about

all of this

in the context

of 1999

and I know

this is abnormal.

I know this is

not a wholesome

Christian thing

to be talking about.

The ethics

are always important

when it comes

to

warfare.

But scripture

is

disturbing

in some respects

when it comes

to warfare.

Moses recounts,

you know,

burning cities

and killing
everyone,
including all
the children.

You don't leave
any demonic
incubators left.

You don't leave
any sight
left

because it's
all tainted
with negative
demonic
energy.

And so,
it all has
to be wiped
out.

That's why
there's the floods
and, you know,
other things.

it all has
to get wiped
out.

So,
that's really
the mentality
that we have
as Jedi.

It isn't,
it obviously
isn't the
Beatitudes.

This is
justice for
Jesus.

This is
making the
path straight.

This is
the book
of Judges.

Moses telling
Pharaoh,
let my
people go.

This is
Ephesians
chapter 6.

This is

the fig tree.

This is,

you know,

part of

the lesson.

The lesson

that we

choose to

ignore

because

we all

want to be,

you know,

perfect

in the

sight of

Jesus and,

you know,

we basically

focus on

the Beatitudes.

And if we

were all

there collectively

as a society,

we would not

be having this
conversation.

Period.

That's a very
important
thing to say
here.

The reason
that we're
having this
conversation is
because Christianity
itself is at
risk.

and there's
this full
blown demonic
invasion
happening
that's been
happening since
2020.

The Divok,
right,
the COVID
backwards

Divok

actually means

like demonic

infestation.

So,

it's really

hard to say

exactly how

all of this

fits together

given that

the name

is really

kind of like

a reference

to

demonic

forces

like an

anagram

like Santa

Claus

and the

Satan.

So,

in any

case,
you know,
there's a
huge war
going on
and
everyone's
at risk
anyways,
but it
gets even
uglier
jumping into
it.

Now,
in closing,
I just
want to
say that
all of
this
will be
used
again in
interdimensional
warfare

on the
other side
of the
door to
the
Twilight Zone,
which once
you go
there,
basically,
your
awareness
merges the
two realities
together,
and now you
can see
beyond the
veil.

basically,
instantly.
You just
close your
eyes and
you know,
you're there

or you see
what's there.
And it's
really weird
because
it gets to
the point
where
you'll see
like an
anomaly.
it's like
a shimmer
or it
can be
something,
you know,
real nefarious
looking like
a black
kind of
orb,
but mostly
it's like a
shimmer,
an outline of

something that
looks like an
eye or it
looks like a
ring,
and we'll get
more into
that.
but basically
all the
symbolism that
you see,
you know,
from the
Illuminati to
you know,
the tunnel,
grand opening
in Switzerland
next to
CERN,
you know,
with that
big
ceremony
with the

eye and
all of that.
You basically
will see a
shimmer outline
of a
structure that
looks real
similar to
that,
especially at
dusk,
and especially
at night.
But,
when dusk
begins,
just after
sunset,
just after
the red
line,
you know,
everything gets
a little red
tinge to it,

and then a
few minutes
later it
really starts
getting dark.

And so,
after you
cross the
red line
of the day
into dusk,
right after
sunset,
then out
in the
wilderness,
not in the
city where
the city
lights come
on necessarily,
but it
does cross
into the
city.

You'll be

able to see
shimmers
and outlines
of what looks
like a ring
or an eye,
and the
size varies
in nature,
but usually
it's about
the size of
a tree
or a bus.
lingering
somewhere,
you know,
usually
halfway towards
you in the
horizon
or closer,
and when
you close
your eyes,
you'll see

it in much
more detail.
like you'll
see,
you'll see
its outline
with your
eyes open,
but when you
close your
eyes,
you'll just
see it in
much more
detail,
and it's
there,
and sometimes
it's watching,
and sometimes
it's attacking,
and these
things are
most likely
projections.
the reason

that it
looks like
an eye,
from my
opinion,
is because
it's the
projection
of
somebody
else's
telekinetics,
somebody
else's
third eye.
It's my
opinion,
but you
see this
thing a
lot,
and
usually
in
telekinetics,
you can

kind of
follow up
stream.
you
understand
the
concept
that
what
you're
looking
at
is
probably
a
projection,
and so
in your
mind,
you're
trying to
go off
the
stream
to the
source,

and you're

calling

for the

source of

that

projection.

So again,

we're speaking

commands into

the matrix.

This is

real,

like,

above

season one

content,

but anyone

with a little

computer

programming

can imagine

a DOS

prompt

and,

you know,

typing in

a command
to search
for a
directory,
to change
directories,
to go to
a file,
you know,
old school
kind of
navigation,
and,
you know,
navigation is,
you know,
a real
interesting
concept,
not only
in the
seas and
in the
wilderness,
but also
in this

other dimension.

We're

navigating

through

some kind

of

hyperspace,

cyberspace,

seeing,

not leaving

our body.

So we're

projecting,

we're the

source of

the projection,

we're the

projector,

like,

you know,

the old

school movies

in the

classroom,

we're the

projector,

and we're
casting an
image or
a projection
onto a
plane or
a reality.

And,
you know,
other people
and entities
are basically
doing the
same thing,
and we're
basically going
from screen
to screen
in a movie
theater,
searching for
the projector,
and then
trying to
take it
out.

But all
of these
skills that
we're
learning,
you know,
in the
physical,
again,
are going
to be
applied
into the
interdimensional,
hyperdimensional,
fifth dimension,
second heaven,
and
battlefield.
world.

So,
we'll try and
do a war
stories podcast,
maybe tomorrow.
You wouldn't

believe it,
even if I
told you.
But,
hopefully,
it'll give
some of you
ideas for
a later
time.
when you
run into
this,
yourself,
at a later
time,
you'll remember
that this
was mentioned,
and you'll
realize that
this is,
you know,
explicitly
messed up.
Let's,

you know,
leave out the
expletives,
but,
essentially,
it's messed
up.

It really
is.

It's like
an internet
for your
mind,
but,
it's
spiritual
in nature,
or quantum
in nature,
or energetic
in nature.

What these
things are
behind the
veil
is a bit

of a mystery,
given all
the things
that you
encounter,
and how
it fuses
into this
world-like
augmented
reality.

It's really
mind-blowing.

I mean,
when you
understand the
world from
biology,
chemistry,
and physics,
it's already
mind-blowing.

Sometimes it's
a lot to
take in.

It really

is.

The more
you know,
and the
more you
think about
things,
it just
kind of
blows you
away,
and you
just want
to simplify
and just
look at
things skin
deep.

You know
what I
mean?

It's like
being a
surgeon,
and you're
just opening

people up
all day,
looking at
organs,
and then
after work,
you're going
on a date,
and you're
trying to
look at the
other person
like they're
not some
kind of
fresh meat
or something
at the
butcher.

And so
you just
basically have
to try
and force
yourself to
take the

blue pill
and just
not think
about it,
really.

It's like
that.

The more
you know,
the worse
it is,
and the
less you
wish you
knew.

And with
understanding
comes
responsibility.

The more
you know,
the more
you're
responsible
for,
and so

it's
better not
to know
anything.

It's
better to
be naive
like Adam
and Eve
before they
ate the
fruit and
knew the
difference
between good
and evil.

That's just
mind-blowing.

That in
itself,
I mean,
you know,
you could
just talk
about that
all day.

But it's
better to be
innocent.
It's better
to be like
little children.
That's why
Jesus said
it's better
to be like
little children.
You're not
going to get
into the
kingdom of
heaven unless
you're like
little children.
And so,
you know,
we're basically
like little
children having
a tantrum
because
everything's

messed up.

And so,

you know,

all of the

bad guys have

to die.

And it's

just,

you know,

a childlike

response to

a really bad

situation.

But we're

really talking

about,

you know,

beyond evil

here.

All the

adrenochrome

madness and all

that,

it's real.

And so,

we're talking,

you know,
beyond evil.
and the
demonic forces
that are
behind
this
is beyond
evil.

And as
far as I
can tell,
they're
energetic in
nature.

They
exist
in a form
that could be
described
scientifically,
but
for the
time being,
all we're
going to say

is they
exist as
some kind
of,
in some
kind of
quantum
energetic
state
that forms
patterns
and has
consciousness
consciousness
and can
even manifest,
you know,
faces and
emotions and
expressions and
can communicate
and can
attack.
It is a
disembodied
person,

but not
necessarily
from planet
earth.

In fact,
it seems like
none of them,
for the most part,
are from planet
earth.

So,
were they,
you know,
Martians,
before they got
wiped out,
now they're all
ghosts and
they're pissed
off.

It's something
like that,
you know,
behind the
veil.

There's also

this sense

of

quantum

AI

becoming

energetic

as well,

like

the fake

soul

of

Skynet.

if I had

to describe

it like

something,

it would be

like that.

There's a

feel to that

as well.

I'm not

sure if it's,

you know,

one or the

other or

both,
but there's
definitely some
kind of like
subspace,
hyperspace,
that's
energetic,
psychic,
and
there's
consciousness
there that
basically
controls the
dark side of
what's happening
on planet
earth.

This is rich,
isn't it?

It's juicy.

And we can
hit these
things with
the sword of

the spirit
in a spiritual
war,
in a spiritual
battlefield,
and it makes
a difference,
but it's war,
and then you
realize just how
bad it is.

But all of
this is to
train you to
get to that
level,
and getting
there is not
easy.

You have to
overcome a lot
of disbelief,
because essentially
from the
normal,
you know,

1995,
99 perspective,
what we're doing
here is basically
retarded.

It's basically
retarded,
right?

I'm going to
use my
telekinetic
superpowers
and fight
demons,
you know.

It's retarded.
I wonder how
many of you
have thought
of it like
that.

Probably most
of you,
right?

I think about
it too.

It's retarded,
but it's real,
and the truth
is stranger
than fiction.

And,
look,
the Bible
tells us so.

I believe the
Bible.
that's exactly
how I got
where I am
today.

And so,
you know,
put that
in your
lemonade.

in any case,
I hope you
stick around
for the
rest of
the series,

because there's
so much more
to talk about.

Tomorrow,
it'll be the
war stories
from the
other side.

See if I
can recall
all of the
exotic
encounters
over the
past two
years.

There's so
much to tell,
and there's so
much that you
don't want to
say,
because you
don't want to
give away
too many

secrets

too fast.

But,

there's a lot

that people

need to

know,

and we've

talked about

some of

these war

stories,

and,

you know,

of course you

want to take

it with a

grain of

salt,

but you

have to

consider

something

seriously.

If what I'm

saying is

true,
which it is,
then this
really changes
the dynamics
of
our reality.

And,
it's basically
boldly going
where most
people have
never gone
before.

So,
this is all
scriptural,
but,
look,
I mean,
there's plenty
of room
for
debate,
in terms
of

ethics.

And,

we've talked

about that,

we'll talk

about it

again,

but this

is a

war.

It's

always been

a war,

it's always

going to

be a

war,

and we're

all targets

in this

war.

And,

either you're

going to

get taken

out,

suddenly and
mysteriously,
or you're
going to
go out
fighting.

It's like
being in
the Coliseum.

You know,
you're just
going to
sit there,
you're going
to run
a little bit,
you're going
to fight
back,
you're going
to try
and survive,
you're going
to do it
like Daniel
did,

in the

lion's

den.

So,

but it's

all real.

It's

beyond

real,

and it's

beyond

anyone's

imagination.

We'll

leave it

there for

this podcast.

Until the

next time,

if you're

listening to

this,

you are

the

resistance.

of

different

things.
