

JEDI TRAINING - WAR STORIES (EPISODE 41)

Welcome back to Jedi Training. The title of this podcast is War Stories.

We'd prepared a long podcast on war stories.

And, in fact, we're not going to release it because we don't want to scare you.

Instead, we want to up your game.

I've got a lot of war stories, encounters with a third kind and beyond.

Things that, you know, are like straight out of X-Files and worse.

But, like I said, I don't want to scare you.

I want to focus on upping your game if you're serious about telekinetics.

It's a real war. It's bad. It's real bad.

And it's all cloak and dagger. Read between the lines.

Shadow Wars.

And so, how deep does the rabbit hole go?

We've encountered aliens, demons, cyborgs, the works.

And so, it's really all of the above.

I know some people want to rule some things out and some people want to group things together.

But, the way that we see it right now, there's the physical alien-like creature from another world.

There's the spiritual alien from another world, which we call demons.

There's the cyborg.

And then there's the nexus, or the merging, of these enemies together.

You'll have ghosts in the machines.

You'll have alien AI.

I've seen things basically emerge out of cell towers and other inanimate objects that basically were from another dimension.

Emerge, like merge out of it and show up in this world.

And so, we're dealing with technologies and concepts that we don't fully understand.

We have some idea.

We can kind of describe it, but we have no idea exactly what we're dealing with.

But, I can tell you that there's a nexus of demonic, alien, and cyborg technologies and enemies that we're up against.

And so, it's basically the works.

It's the buffet.

And, Jedi training and telekinetics is just one angle of the story.

It isn't, you know, your new religion.

It isn't a way of life.

But, when you're in a war, basically, it's all on the table.

And, this is a war against the kingdom of darkness.

It's the pages of the Bible playing out before our very eyes.

And, so, it's all of that for real.

And, spiritual warfare, basically, is another angle of attack.

And, we're going to spend some time on the morals and ethics as well again today.

Because, you know, from the viewpoint of myself 20 years ago, I'd almost say, you know, this is kind of heresy.

This isn't what's being talked about in church or in most other sermons.

And, so, it's conflictual.

It should always be conflictual.

War is a conflict, not just against an enemy, but against oneself.

You're forced to do things that you would never want to do.

So, it changes you.

And, yet, scripture is a lot about war.

There's a lot of wars in scripture.

And, it says, suffer not a witch to live.

Which means, you have to do the dirty work.

You know, sometimes it happens where it's like the hailstorm comes, you know.

But, sometimes you have to do the dirty work.

You have to get wet.

And, that sucks.

That really does.

So, we want to talk about quite a few things.

But, you know, getting into a lot of specific war stories right now, I think is just going to, you know, we're just going to spend a lot of time on it.

And, it's probably going to be more counterproductive at this stage.

What we want to focus on is how do you get better.

We want to up your game in telekinetics.

So, first and foremost, know that you can.

Believe that you can.

It's not going to be instant sparks.

But, you're going to start generating and forming pathways to telekinetics.

It's like flexing your pecs for the first time.

You know, it took a little while.

And, so it's not easy.

And, so, one of the things that you want to activate, obviously, is your awareness of internal energy, like through chi and the like.

You know, it's a good way to warm up.

We warn you, you know, sincerely against all eastern cultural traditions because it basically leads you into the cult of the dragon.

So, what does the dragon represent?

In scripture, you know, who's the dragon out there today?

So, but it's, you know, basically we're hacking the matrix.

We're hacking the dark side and we're attacking through the back door.

So, you have to be familiar with everything that's out there.

It's not your religion.

Be careful of it.

Be aware of it.

But, you should be aware of it to a certain extent.

So, knowing your internal energy.

And, then we talked about, you know, projecting that and pulling that type of energy from yourself and from others and from your surroundings.

So, the push and the pull.

We talked about pushing with your hands.

So, imagine like, you know, you're making a, you're doing a one-handed push-up in the air.

And, then as you're pushing forward, you're projecting.

You feel it.

You're focusing.

And, you're going somewhere.

And, your hands are a very important antenna.

And, you know, usually things require hand-eye coordination.

So, you're basically looking at the target.

You're thinking about it.

What you want.

What you want it to do.

What you're imagining, really.

And, you know, it's hand-eye coordination.

And, your mind is just kind of like making it happen.

So, you know, at first this sounds kind of fluid.

But, you can feel it.

And, seeing is believing.

Experiencing is believing.

And, this is all hardwired.

So, you just get beyond doubt.

You start practicing like, you know, trying to ride a bike for the first time.

And, it takes a little time.

But, you'll get to it.

Then, the next thing that I want to talk about, again, is the eyes.

It's a huge array of antennas.

So, if you know the biology of the eye, you know, way in the back in the retina is a bunch of like little antennas.

Cones and rods.

And, basically, it's an array.

So, you know, you're basically downloading a visible stream of light.

It's streaming into your eyes.

It's streaming into your consciousness.

And, so, you know, we're like supercomputers in the matrix.

Now, the eyes can receive and they can project.

And, what I want you to do is, imagine you're trying to unfocus or refocus your eyes.

Have you ever tried to do that?

It's, you know, have you ever done that before?

So, basically, you know, I want you to practice a little bit.

Don't, you know, overdo it.

Don't spend five minutes doing it.

Don't even spend like ten seconds doing it.

Just flex, you know, the muscles of your iris so that you're focusing in and out, giving yourself a little blurry vision.

I want you to work on those muscles a little bit.

Like, you know, once every, you know, two days or something.

And, again, don't overdo it.

Just a quick kind of flexing of the iris.

And, then what I want you to do is, I want you to take a pen or a pencil.

And, I want you to put it up close to your nose and then move it out a little bit.

Move it back to your nose as you're focusing on the tip of the pencil.

Kind of like an eye exam or something.

I want you to work those muscles a little bit, too.

And, essentially, what I'm going to have you do next is kind of like, you know, training.

And, so, then what I want you to do is imagine a little ball like three feet in front of you.

And, I want you to, you know, kind of squint at it.

So, I want you squinting a little bit.

Not like hardcore, but just a little bit.

Like a little squinting.

And, then, so you're kind of focusing.

And, then I want you to think about this ball moving forward ten feet.

And, then back again.

And, you know, for starters, like imagine the tip of the pen moving back and forth.

I want you to imagine this little ball moving back and forth.

So, really imagine the ball.

And, have it move back and forth as you're squinting a little bit.

And, then think about the push and the pull.

As you're feeling yourself move this ball forward, you're feeling the push.

And, as you're pulling the ball backwards, you're feeling the pull.

And, I want you, when you're pulling and you're moving it backwards, squinting a little bit.

I want you to, you know, breathe in through your nose.

As you pull through your eyes, you're moving it.

You're focusing.

You're squinting a little bit.

And, you know, you're using all of these muscles.

And, then, what I want you to do is, you know, bring it back to yourself.

And, then, make it go faster.

And, even, like, imagine your hand, you know, kind of like, like in the pinch position.

You know, like you're just going to push it and make it go faster.

See if you can do that.

Think about that.

Think about how you would put all of that together.

And, practice that.

Practice it, you know, whenever you can.

But, these are going to be really good constructive elements to move you up real quick.

You'll be dangerous before you know it.

But, again, it all comes with, you know, the very real risk factor of your entering the war of telekinetics.

Which is really kind of like the unspoken yet dominant thing that's going on on earth right now.

And, so, the dark side uses it all the time to basically let others know that, you know, they're in the cult, if you will.

But, you know, at this stage, this is about preparing for intergalactic, interstellar, interdimensional telekinetic warfare.

So, the skills that you're using on the field against, you know, real life cult members is just getting you prepared for what's coming next.

And, you know, this is about hacking the matrix, if you will.

And, so, you know, a lot of this is going to be controversial.

And, it should be controversial.

What are we doing exactly with telekinetics?

Should we be doing something like this?

You know, it's really hard to say, to be honest with you.

All of this is basically on the premise of that scene with Jesus and the fig tree.

He says to the fig tree, let no fruit grow on you henceforth.

And, it was over for the tree.

Boom.

Boom.

And, then, the disciples come back and say, wow, did you see how quickly that happened?

And, Jesus basically replies, you can do this and so much more.

Now, you know, this scene is repeated in the Gospels and, you know, it's a fairly long passage.

It's meant for us to think about.

And, that's what we should always do, is think about things related to Scripture.

And, this is one of the things that we should be thinking about.

Everything is important.

Everything is trying to teach you something.

And, the more you know, the better it is.

And, the worse it is.

Everything is important.

Everything is important.

Everything is important.

Everything is important.

Everything is important.

And, everything there is, you know, obviously very important.

So, we can't overlook this.

We can't, you know, ignore it.

But, a lot of people try to because it doesn't really fit in with who they want to be or, you know, what their congregation is like.

And, you know, obviously you can understand that.

How does that fit, you know?

And, a lot of, you know, a lot of denominations really try to ignore the demonic part of what's going on.

But, this was a main part of the ministry of Jesus.

You know, casting out demons and devils and unclean spirits.

He basically did it wherever he went.

And, he sent out his disciples to go and do that.

And, he gave us, you know, authority over these things to do just that.

And, so, you know, this is a whole big concept that people just want to ignore.

And, I was basically forced to explore because of the nature of, you know, what I've been doing for the last 20 years.

For some reason or another, I felt, you know, called to fight a spiritual war.

And, against evil and against, you know, the lies and the tyranny and everything that we're basically forced to endure in this new world.

And, so, I'm not sure it's the best thing.

I would rather be doing something else.

I wish I was doing something else.

But, after, you know, diving into the deep end, I've come to appreciate something which is that this is, you know, a huge, nasty fight of, you know,

global importance, to say the least.

Whatever I'm fighting here is obviously, you know, holding the world hostage.

And, I'm not sure how many people can do what I do, but I know that I can't be all alone.

I see a lot of activity.

So, there is a resistance by, you know, given the nature of what's going on, the more anonymous, the better.

Really.

Because in telekinetics, you know, mistakes happen real fast and it gets pretty bad.

Because, and this is something that we'll have to talk about, is basically, you know, good discipline and defensive postures.

You know, demons and the like, especially when you enter the battlefield, are always going to try and plant suggestions, unclean suggestions, anything to draw you away from the fight or from scripture or, you know, anything that's relevant.

And, you know, you'll get basically mind bombed with like either an unclean image or an unclean thought or something that's totally inappropriate.

And, you know, this, you know, this may happen to you at times when you're trying to say your prayers.

You feel like this resistance.

And, you know, what you'll discover is that it's worse than you can imagine.

But, you know, if you ever experience distractions while you're trying to say your prayers, like unclean thoughts, unclean images, shopping list, you know, the phone rings.

You know, it's basically the matrix calling and everything, excuse me, and, you know, everything that's connected to it will be used to try and distract you away from things that are really important.

So, you know, when you get to telekinetics, when it's simple and it's direct and it's like, you know, you're thinking of a picture, you're thinking of a video, you're thinking of a person or something like that.

You know, when it's real direct, then, you know, it's kind of like being in the shooting range.

You know, you've got your target and it's, you know, there's nothing between you and it and it's just you're practicing.

But sometimes, you know, oftentimes telekinetic battles go real fast, real far.

You're just like going up the rabbit trail and anything connected to the enemy.

I mean, you just want to take it out.

And so you're going to travel, you know, eventually real far, real fast.

And, you know, the magnitudes will be much bigger.

But you have to be careful because it's like, you know, dropping nukes everywhere.

I mean, you don't really know.

So the wicked will never be justified.

You have to always think about the innocent the best that you can.

And there's always, you know, this question that you should be asking yourself, am I doing the right thing?

Always.

Always.

And so, especially in war, because it's lying.

You know.

It's like jumping out of a plane, basically.

You don't know what's going to happen.

And, anyways.

You know, is it scriptural to fight in a war?

Is it a necessity?

Is it the thing to do?

You know, it's...

You have to think about the time of the transfiguration.

And it was like Peter and Jesus and then comes Moses and Elijah, Elias.

And so you have to, you know, not separate the beginning of Scripture from the end of Scripture.

From Moses to, you know, Jesus and beyond.

You have to keep it all together.

And so, is it scriptural to go to war?

Yes.

How ugly is it?

Real bad.

In Scripture.

So.

There's, you know, there's a call to fight.

And there's a call to love.

And if we can ever get back to the time when we're basically living in the Leave it to Beaver days.

Or like, you know, when everybody's going to church.

Everybody's going to the temple.

Everybody is, you know, basically Christian or...

And the like.

And then, I mean, you know, we're basically living in the times of Jesus.

And everybody can be, you know, cool and relaxed.

And, you know, let's just try and do better.

And, you know, help everybody out and all that stuff.

But, it wasn't a war zone.

It's not even a consideration.

It's like, you know, basically the best of conditions.

Ideal conditions.

And.

So, I mean, you have to imagine what, you know, Jesus would do all the time.

What would it be like, you know, during World War II?

Because, man, we should never forget or try to separate ourselves from the aspect of loving.

And.

Helping.

You know, everybody out.

And.

All of the good things.

That we grew up with.

so we should try to be there as much as possible

and never forget where we came from

because it's pretty easy to

lose yourself in all of this

and it takes a certain mindset

to get into spiritual warfare

because this is going to get worse than anything you've ever experienced

and so you have to be

ready to basically

go through the worst of the worst

like special ops or something

so go watch a video on

what those training programs are like

but hopefully you've gone through

your fair share

and it's prepared you for

what comes next

but you definitely have to be like

a mega survivor

this is worse than any game show

but

you know everything in scripture is

you know super important

and you know being good and a decent person

and all that is just a real
kind of you know
general description of
what's required
and
so you basically have to become
a legal expert
and
the closer
you know you adhere
the more virtuous of a person
you are
nobody can
BS through that
you either are or you're not
and
it's real difficult
to get it all right
you know you can be 80% right
or 90% right
when it comes to
the way you're living
compared to all of the
statutes and the laws
and
the closer you are

the better you are
not only
you know as a person
but also in
everything
that has to do with telekinetics
and you know I guess we should really talk about
blessings and
healing people
and you know the good that you can do
for people as well
because that's a very positive aspect to
what we can do
I'm focusing on
spiritual warfare
but eventually you know
we'll do a podcast
on what are the nice things that you can do
you know as a Jedi
if you will
or as a priest
as a disciple
as
a follower
of Jesus
but yeah we should never forget

where we came from
and
yet
it is a war out there
a mega war
and we need
you know
as many people as
as we can get
and in a war
you know there are no
expectations
of course
everybody wants to come home
but
there is no guarantee
in that
and that is why I think
it is important that
you know I share
what I have
experienced
over the last
20 years
so that
some of this

will hopefully
you know carry on
as for
is it the right thing
to do
you know that's really
another debate
I'm not
I'm not convinced
again it's kind of like
the old expression
it's like
holding a wolf
by the ears
you don't like it
but you don't dare
let it go
in my
opinion
things have gotten
a lot better
worldwide
over the last
two years
and
you know

a lot of people
could attribute that
to a lot of
different things
but
I feel like
the campaign
and spiritual war
has had
some impact
on that
and
if we tap
on the brakes
and
you know
if I go on
vacation
or something
or
basically decide
to not engage
the enemy
and focus on
other things
I can definitely

feel

things getting worse

not only that

I can also see

things getting worse

worldwide

and

to me

this is where

the action

is

this is where

you can do

the most damage

and

if people

aren't

basically

defending the

planet

on a

spiritual level

in spiritual

warfare

we're basically

overrun

and
taken out
by the
dark side
so
there's a real
need for
spiritual warfare
and a real
need for
people to
learn how
to defend
themselves
it used to be
that
this was
much more
common knowledge
than today
there's a lot
of evidence
of
UFOs
and the like
in antiquity

and
we'll show you
examples of
that
I've had to
put a helmet
on because
you can feel
some incoming
fire
I kid you
not
we're broadcasting
from the bunker
right now
sounds horrible
but
looks like
we're going
to have to
cut this
short
any case
keep
practicing
out there

and don't
forget to
practice
making armor
this is
Johnson
from the
front lines
and if
you're
listening to
this
you are
the resistance
