

JEDI TRAINING - PREPARATION AND SHIELDING (EPISODE 42)

Welcome back to Jedi Training. The title of this podcast is Shielding and Preparation.

You can never have enough shielding or be prepared enough for what's coming.

And so we're trying to give you the time to accumulate shielding supplies and to prepare for the spiritual battlefield.

This is a very real war and it's the most effective warfare out there because the real enemy is spiritual in nature, demonic, from another world.

And this is an invasion. They don't come from here. They've sent an army here.

And so we have to engage this enemy on their territory, in their plane, wherever they're from, no matter the cost.

It's like Pearl Harbor in a way.

And even though back then Japan was really far away, we were hit by an enemy.

It was a surprise attack.

We weren't prepared.

And we have to go where they're from.

That's basically what this is about.

Ephesians chapter 6 tells us they're not from here.

But they are very real and they definitely come from somewhere.

And telekinetics is the only way to get there.

No spaceship can go there.

Because these things are from a whole different world.

They're like a whole different type of matter altogether.

And so conventional weapons won't get us there.

And conventional transportation won't get us there either.

We have to hack the matrix.

We have to open the door and go there.

But it's ugly warfare.

Because these things basically control millions of people.

These demons control millions, billions of people worldwide.

Individuals that have been body snatched.

That are possessed by demons.

And so as soon as you engage the enemy,

the ripple effect comes down the pipeline into the physical world.

And so everything around you will be against you.

It's like a suicide mission.

It's like a kamikaze mission.

And this is really only

an attractive option

when you feel like

they're coming after you.

And so you may not feel like that

right now.

And chances are

you won't even really see them coming.

Either.

But

eventually they will come for you.

It's like the Tommyknockers.

It's like

a nightmare.

All of a sudden you realize that

the world is much more
strange
than you ever imagined.
When they start coming for you.
And like I said,
most people won't even really see it coming.
It'll be the heart attack,
the stroke,
the cancer.
Christians are murdered all the time
that way.
And
the kingdom of darkness
is a bunch of murderers.
So
perhaps
you're thinking to yourself,
I'm going to pass on this Johnson.
There really isn't a choice.
We've all been conscripted
into spiritual warfare.
Some of us just choose to
look away.
But eventually
they'll come for you.
Or you'll sell your soul

to survive.

And that's what many people do.

It's a very

difficult

situation.

And once you realize

that they're coming after you.

And I know how that sounds,

but

basically

it begins with

chronic fatigue

or

buzzing

or hissing

in your ears

sounds of

crickets.

When you

start hearing that

or feeling that

the

chronic fatigue

they're coming after you.

and

it's just a matter of time

before

it's lights out.

Usually

it's like

one to two years.

Things gradually

get worse

and worse

and

it looks natural.

so

once you've

been acquired

and this will happen

to just about everybody

then

you have a choice to make.

You can also choose to

be preemptive.

It's coming.

And that's what

Jedi Training is all about.

This is

110% real.

Beyond real.

It sounds

incredible.

But this is tried and tested

in many ways.

I lack no confidence

in what I say.

Not because I'm an idiot.

Sometimes I am an idiot.

But

not this time.

So

preparation.

Let me give you some tips.

There's no

getting off the radar.

There's no

getting off the grid.

There's no escaping

the evil that's out there.

They know what you're thinking.

Because

the big part

a big part of

telekinetics is

telepathy.

They know what you're thinking.

The dark side knows what you're thinking.

The demons know what you're thinking.

They can whisper into your thoughts.

And plant thoughts

in your own voice

to make you think that you're

thinking something.

They'll complete your thought

for you.

If you let them.

you're not going to

outsmart this enemy

all you can do

is slug it out.

It's basically like

getting jumped by a gang

you know

in downtown New York

or something.

You're just going to

have to slug it out.

It's not

there's no way

to make it pretty.

It's bad.

It's real bad.

It's that kind of situation.

Have you ever been
jumped by a gang?

Probably not.

But

like a mob
or something.

So

that's what this is like.

It's not

there's

it's not going to be pretty.

all you can do

is slug it out

and defend yourself.

And so

part of the problem

is that

they know everything

that you're up to.

I don't know how that sounds.

But

what you really have to do

is

be as perfect

as you can.

That's all you can do.

As for
other forms of preparation
you know
we've talked about
physical training
spiritual training
and of course
Jedi training.

But
basically
you know
you're going to have to
prepare yourself
physically
mentally
spiritually
and financially
for war.

We can't stress that enough.
and of course
that's
you know
that means that
this isn't going to be
for everyone.

When you think of

all of the different
things that we're
talking about here
this is like
the .01%
of people that are
you know
going to engage
in spiritual warfare.

Seriously.

In a serious way.

So

that means that

99.9%

of the people

out there

aren't going to care

or aren't going to be

willing to

take it seriously

for whatever reason.

And so

you know

I totally understand

if people are going to be

like

objecting to
something here.
but if you're
taking this seriously
and this is the
best crowd
the best audience
for this type
of endeavor
I've tried
real hard
to
educate
and inform
our audience
over the last
10 years
and to weed out
undesirables
and so
you're a very good
selection
of potential candidates
for
advanced
Jedi training.

but before we
get into
the way
more advanced
stuff
because at first
it's going to sound
crazy
and then
when you experience
it
you're going to want
to know
like how deep
does the rabbit hole
go here
and what can we do
and how can we fight
and what's the current
plan
basically.
but
I can't stress
enough
shielding supplies
I mean

go to every
hardware store
you can
get everything
and anything
you can
for
the zombie
apocalypse
but
especially
focus
on
shielding
materials
that work
and we've tried
you know
a lot of
different
experiments
and
we're hunkered
down in a bunker
in a real bad
position

and we're taking
a lot of
incoming fire
from a lot of
exotic weapons
and
the sensations
are
you know
beyond
strange
what I can
tell you
is that
no single
solution
works
when
they've got
you surrounded
and they'll
always get you
surrounded
because you
have to live
somewhere

you always

go home

or back

to your

place

for the

most part

that's

where

they're

going to

surround

you

the most

but

they'll

surround

you

everywhere

and

so

the

worst

is

at

your

residence

because

they can

basically

train

howitzers

on you

hardcore

and so

you're

going to

deal with

more heavy

duty weapons

at your

residence

than you

are for the

most part

you know

out there

in the

wild

or in the

urban jungle

during the

day

but

every

landscape

has its

own

challenges

any

case

if

you're

going to

survive

you can't

rely on

any

single

shielding

solution

for many

reasons

because

of the

way

emf

works

shielding
has to
be
tuned
basically
to the
frequency
that's
hitting
you
or the
desired
frequency
that you
want to
block out
for the
most part
and
other
emf
will go
around
that
sweet spot
in the

shielding
and so
no solution
is perfect
some things
work
better than
others
we're
looking
for
broadband
protection
and
also
looking at
other factors
like
cost
and
weight
and all
of that
because
emf
shielding

is basically
like
faraday
shielding
and
it gets
heavy
and expensive
but
most of
these weapons
will pierce
through
any
single
type
of
shielding
like
a
hot
knife
through
butter
it's
like

it's

almost

not

even

there

it'll

make

some

difference

but

it's

not

enough

to

survive

so

you

need

basically

multiple

layers

of

different

types

of

materials

sheet

metal

stretch

metal

foil

emf

fabrics

magnets

anything

and

everything

that

can

throw

off

an

electromagnetic

wave

so

magnets

work

in a

way

to

kind

of

like

change

the

direction

of

the

emf

beam

or

particle

weapon

so

it'll

deflect

it

in a

much

better

way

than

anything

else

but

magnets

are

you

know

are

kind of

tough

to use

as

personal

armor

you

don't

want

to

wear

that

all

the

time

but

they

can

be

highly

effective

to

supplement

your

armor

and

to

move

around

spots

that

they're

trying

to

soften

up

they

basically

try

to

soften

you

up

like

a

siege

and

eventually

they'll

dig

in

somewhere

and

it

can

be

anywhere

so

you

basically

have

to

protect

yourself

head

to

toe

one

way

or

the

other

either

through

armor

or

through
shielding
and
armor
is
cheaper
easier
but
you
have
to
wear
it
the
luxury
is
having
a
shielded
room
that
actually
works
and
then
you

could

actually

not

have

to

wear

armor

we

recommend

practicing

with

aluminum

foil

which

is

more

effective

than

you

might

think

it's

not

anywhere

near

100%

but

it's

the best

place

to start

and

definitely

know

that

one or

two

layers

is not

going

to

work

how

do

you

make

armor

out

of

foil

I

mean

basically
you
should
be
practicing
yourself
how
would
you
make
how
would
you
protect
yourself
from
a
radiation
attack
using
just
foil
imagine
you have
to go
into

Chernobyl

you have

to go

and the

only thing

you can

use

is foil

how

much

foil

are you

going

to

use

you

know

clear

out

the

grocery

store

if you

have

to go

into

Chernobyl

basically

but

we

generally

recommend

about

seven

to ten

layers

alternating

the

patterns

so that

you make

these

sandwiches

that

are

shiny

sides

facing

each

other

to

kind

of
like
make
this
mirror
effect
a
layer
of
mirrors
where
the
beams
can
just
kind
of
like
bounce
back
and
forth
and
basically
wear
themselves

out

and

cancel

themselves

out

we

call

that

auto

jamming

armor

it

works

pretty

good

and

so

you

basically

start

with

an

inner

core

that's

facing

each

other

and

then

start

alternating

on

your

way

out

like

layers

in

an

onion

and

usually

we

use

like

a

cardboard

kind

of

center

piece

core

to wrap

it

around

kind

of

like

how

people

would

coil

copper

around

you

know

something

basically

wrapping

around

some

kind

of

cardboard

about

two

feet

long

a

foot

wide

or

a

foot

and

a

half

long

so

that

you

make

you

know

these

rectangles

and

you

practice

with

that

and

you

make

you

know

as

many

of

those

as

you

can

and

you

seal

it

up

with

tape

you

know

like

the

clear

boxing

tape

or

packaging

tape

and

you

know

four

of

these

aluminum

tiles

will

give

you

a

flak

jacket

two

in

the

front

two

in

the

sides

you

can

make

straps

out

of

whatever

shoulder

straps

hold

it

on

put

it

on

and

then

you

can

start

adding

things

to

it

it

makes

a

nice

little

skeleton

if you

will

and

essentially

heavy duty

tape

works

pretty

well

I

knew

a

guy

in

the

airline

industry

as

a

mechanic

and

they

would

just

basically

fix

planes

with

tape

and

glue

you

know

these

are

major

airlines

I'm

like

are

you

serious

like

yup

so

you

can

put

a lot

together

with

tape

and

glue

but

you're

going to

want

head to

toe

protection

and

reinforce

that

with

stretch

metal

or

sheet

metal

foil

that's

and

you can

stretch

that

around

and bend

it real

easy

it's

light

it's

basically

like wire

mesh

but

obviously

more steel

like

and

that

stuff

makes

a good

addition

to

the

foil

lightweight

but

can be

uncomfortable

and
can be
as sharp
as a
razor
blade
so
you're
going to
want to
tape
that up
heavy duty
style
cut it
with
you know
steel
scissors
you know
scissors
that are
made to
cut
through
metal

and the
like
wire
and
you know
you can
basically
stamp
out
your own
designs
it's like
you're the
3D printer
and
essentially
you can
make armor
from head
to toe
boots
included
you'll
look like
an astronaut
but this

is an
intergalactic
war
technically
so
it's only
fitting
that we
look like
astronauts
but you
can
you know
put it
under
clothing
which is
easy in
the winter
time
much more
difficult
in the
summer
time
that's why

we're also
looking at
other
solutions
like
EMF
fabrics
and what
we've
discovered
is that
it takes
basically
7 to
10 layers
to offer
you some
sort of
fairly good
protection
but it's
not going
to save
you from
the sniper
attacks

and that's
essentially
what they
are
and they'll
target
you know
specific
areas or
organs
and
unless you
block it
out
it's
basically
the beginning
of the
end
so
copper
fabric
works
to a
certain
extent

but
it's
not
100%
for the
sniper
attacks
and
so
you
basically
need to
reinforce
that
with
some
kind
of
sheet
metal
for
at home
out in
the wilderness
or out
in the

city
and the
like
EMF
fabric
is pretty
good
but
they're now
coming after
people with
attacks that
are coming
from overhead
that are like
sniper attacks
as well
death rain
we call it
and
that'll
penetrate
the cloth
fabric
you can
do

an

aluminum

foil

rectangle

overlay

so it's

both

copper

fabric

and

aluminum

foil

and

that

seems

to

work

pretty

good

overall

but

they

will

target

everything

above the

knees
and
below
the
waist
they
will
target
everything
above
the
shoulders
they
will
target
everything
in
your
midsection
like a
butcher
so
shielding
is always
is basically
your primary

concern
23 hours
a day
and
you know
if you can
find other
things like
lead
and the
like
as a
supplement
to make
an additional
breastplate
or
helmet
and we've
got all
sorts of
helmets
you know
the last
time
we had

to put
on an
additional
helmet
but we
always
kind of
wear like
a skull
cap under
a baseball
cap
that's
reinforced
and
to avoid
overhead
attacks
that cause
strokes
it's quick
too
so
so
sometimes
you need

you know

two or

three

helmets

some

that are

a little

more heavy

duty

some

that are

a little

lighter

weight

I've got

a vast

array of

all sorts

of things

now

that I've

never had

before

like

helmets

flak

jackets

boots

girdles

you know

aprons

skirts

for you

know

EMF

attacks

it's a

good

idea

easy

more like

a robe

you know

and I'm

not a

cross dresser

I promise

but this

is

an easy

kind of

solution

and you
can you
know
use
suspenders
to hold
it up
it's
pretty
far out
there
but
I'm
telling you
because if
you get
that
far
they don't
take you
out
something
stupid
beforehand
this is
basically

what you're

resorting

to

to survive

EMF

clothing

homemade

EMF

clothing

and the

heavier

the duty

you know

the heavier

duty it

is

the better

we're also

looking at

other exotic

materials

like

graphite

graphene

polyethylene

and the

like
but still
in its
development
phase
haven't found
anything
well I did
my first
test
today
with it
and it was
basically a
miserable
failure
there was an
interesting discovery
in that it
basically has a
big impact
on electric
fields
and that's
you know
one of the

hardest things

to block

out

so you

know

if you

have a

meter

and you're

measuring

you know

electric

fields

and

you know

radio

frequencies

basically

you know

you can

block out

EMF

but

blocking out

an electric

field that's

coming from
like you
know home
wiring or
something or
an electronic
device that's
plugged in
that's almost
impossible to
block out
none of the
EMF shielding
blocks it out
but
some reason
the graphene
and the
polyethylene
did pretty
good
so
it's supposedly
more interesting
for high energy
particles but

right now it's
not very reactive
to the weapons
that are being
used at my
location so
not useful
yet
but
we're
planning to
experiment
with different
composites
different
fillers and
epoxies and
and apply it
and that takes
time but
we're always
researching new
strategies
to survive
so that we
can launch

attacks
on their
enemy
homeworlds
and
their
infrastructure
and so
that's
what you'll
discover beyond
the veil
that's where we
go that's what
we do
it's almost
like the
last star
fighter
in a way
not sure if
anybody remembers
that movie
but
we basically
have to take

the fight to
the enemy
and
that's what
makes
the most
impact
not everybody
can do
it
but
if you're
willing to
train then
hopefully you'll
get there
so
yesterday we
were talking
about
some
interesting
techniques
we'll be
expanding upon
that

but right
now I mean
you just gotta
prepare for the
basics the best
you can
position yourself
if you're
interested
to get
onto that
freeway
basically
so
it's not
for everybody
it's kind of
like being
Batman in a
way
and it's
you know
it's
it's not
easy
so

keep preparing

out there

we'll be back

with

more updates

tomorrow

and the

day after

and we'll

try and

talk about

new ideas

to get you

ready for

what's coming

so

keep

preparing

keep

listening to

scripture

refine

you know

basically

your way

of thinking

and
your perspective
on life
and all
of that
start
evangelizing
do all
the things
that we've
talked about
up till now
we've unloaded
a lot of
information
and
as soon as
you're ready
to
go beyond
the veil
then
that's where
the action
is
that's where

it really
begins
so
make sure
you've got
everything
on the
checklist
maybe we'll
you know
print one out
or something
and pass it
around
but
physical
training
spiritual
training
prepare
yourself
emotionally
for war
in a
sense
get

shielding
materials
everything
you can
and
then
start
with the
local area
warfare
and things
will pick up
real quick
and you'll
realize why
you need
the shielding
and then
you'll want
to know
what else
can you do
and that's
how you know
when you start
applying these

techniques and you
start feeling the
attacks coming
back at you
and you don't even
know what's going
on really
I just got hit
with something
where did that
come from
and
then you get
more interested
in you know
hitting back
because it's a
war it's a
fight
so
eventually you'll
realize you're
getting hit
with telekinetics
and energy
weapons

and the like
and then you'll
want to know
you know
what you can
do
and at
first you
think it's
just the
cell towers
maybe it's
something else
but you have
no idea
just how deep
the rabbit hole
goes
and that's
what
that's where
we're going
that's where
I'm taking you
and at first
you know

you might think

a lot of

things

and then when

you see it

and you feel

it

after

trying it

out

you'll make

a decision

to run

away

and put

your skirt

on

or

you're going

to put

your big

boy pants

on

and you're

going to

fight it

out

and

it's ugly

this is the

real war

everything else

is fractional

leave it there

for this podcast

appreciate everybody

tuning in

until the next

time

if you're

listening to

this you

are

the resistance
