

JEDI TRAINING - HYBRID WARFARE (EPISODE 47)

Welcome back to Jedi Training. The title of this podcast is Hybrid Warfare.

Perhaps you know something about warfare. We hope you do.

Perhaps you know something about hybrid warfare.

You know something about hybrids. You know something about hydras.

Right now it's basically an asymmetric war against good people.

Good people just aren't putting it all together.

And there's a lot to put together.

But again, the central theme here is Ephesians chapter 6.

We wrestle not against flesh and blood but against spiritual wickedness from heavenly places.

In other words, ghosts from outer space.

They look like heads. They're disembodied spirits.

This is what scripture tells us.

They're disembodied spirits. They come from outer space.

That means you get a head, a consciousness.

That's basically telepathic and telekinetic.

That's all it can really do.

It has no fingers in the real world.

That's why it needs to co-op people to have fingers, hands, feet, collaborators in the real world.

And so this is the nature of the hybrid war that we're up against.

And we've talked about this in previous podcasts.

And basically it's like a pyramid scheme.

And on the bottom we have the foot soldiers.

And towards the top we have something more organized that looks like an eye.

And quite literally on the other side in the fifth dimension, the second heaven, the twilight zone, we see a lot of this.

It's nothing but heads and eyes and other things.

But this is part of the battlefield.

And in the last podcast we were talking about the twilight zone.

You know, we're using cute language.

It almost makes it sound ridiculous.

But hopefully it gives you kind of like an idea what you're looking at after you've experienced it.

Because it's really like the twilight zone.

We're just, you know, the world will never be the same after you have these experiences.

You've got to keep trying at it and be confident that you can do it for this to work.

Listen to the previous podcast again.

This is where things get really exciting.

And this is where you really need to practice but also prepare.

Because entering this battlefield is serious.

Nobody wants to enter a battlefield of tele-energetics, telekinetics, energy weapons, space age, you know, kind of stuff.

Aliens and the like.

Demons.

I mean, people, you know, I don't think people usually wake up in the morning thinking to themselves, you know, how can I experience all of these things?

I think I'd rather go get some coffee or, you know, whatever.

This is, you know, X-Men stuff.

And it's mostly for, you know, Gen X.

I'd have to say you'd probably have to be around 40 or above right now to be super proficient.

But you can start getting pretty effective in your 20s.

But it becomes more real to you.

Being a Christian becomes more challenging as time goes on.

It's easy being a Christian when you start out.

It's easy being a Christian without tribulation.

It's easy to have courage when you're not under fire.

And so, you know, it's easy when you're young, but as you get older, it gets much more difficult.

And you start experiencing many more things if you're, you know, doing it right.

And you're supposed to level up with the challenge.

And so, depending on where you are in your life right now, you know, this may or may not be super relevant to you.

And, you know, I watch a lot of, you know, the content from the normal world.

People are just running around doing normal things.

And, you know, this is pretty far removed from that.

But the normal world, as we look at it, is pretty far removed from Scripture as well.

And so, given that the only normal thing that there is out there is Scripture and everything else is abnormal,

then it turns out that what we're doing is normal and what everybody else is doing is just basically on that highway to hell.

And they're on the road to become what we're fighting against now.

Anyways, I've got to make this quick.

So, you know, it'll be about like an hour.

No, but I better get to the point.

So, we're talking about hybrid warfare.

Hybrid warfare basically means mixing, you know, different talents into the recipe.

And it can also mean, you know, different venues and different platforms and different avenues of attack.

And what telekinetics is aiming at here, what Jedi Training is aiming at here, is to help you attack in other ways that isn't just like on the keyboard.

And that isn't necessarily physical that will get you, you know, into the gulag.

So, you know, in this day and age, you kind of have to be careful about physical missions in the real world.

It can be done, but, you know, it is what it is.

And, of course, the first rule of Fight Club is to never talk about that.

But, telekinetics is a way to basically reach out and touch someone without, you know, leaving fingerprints.

Physical ones.

And a lot of the world right now is basically based on this X-Men type concept, to be quite honest.

There's a lot of mutants out there.

There's a lot of different gifts and talents.

Now, in any case, we've hopefully prepared you to a certain extent to be able to piece it together.

You know, it would be different if it was like in person and we could coach you in person and have you feel and see what you're supposed to be feeling and seeing and controlling your environment and making sure that you're doing every little thing right.

You know, as far as the do not disturb environment, listening to gospel.

Are you really doing it?

Are you, you know, cheating?

You can also listen to other, you know, trance meditation music as well.

But, you're going to need every advantage that you can get.

And there's really nothing more powerful than scripture in the spiritual world.

And so, if you're broadcasting, essentially what you have to imagine is that you're showing up somewhere as an avatar when you go into the twilight zone.

When I get you to close your eyes in a sensory deprived environment, essentially you're showing up there partially.

In like a quantum state.

You're not there, you're not not there.

You're basically there in the sense that you can see what's going on.

And I can't really describe, you know, what your avatar looks like.

It may not look like anything.

It may just be a blob.

Or it may just be like some other form of connection from that point to another.

It could be a wormhole.

So, I don't fully understand how the hardware works, really.

You know, it's kind of like a novice on the computer.

You know, I'm not really sure how the microprocessor and the RAM and, you know, the hard drive and all that really work.

I just hit the keyboard.

So, it's kind of like this.

I can't tell you all the things why it is the way it is.

In this regard.

I can tell you why a computer works, but I can't tell you why or how or anything like that when it comes to what we're seeing in telekinetics and night visions.

Scripture calls it night visions.

New Agers would probably call it remote viewing.

We're hacking the matrix.

This isn't our religion.

We're there to destroy the enemy.

And this is basically how you go about it.

They go there to basically worship the enemy.

We go there to destroy the enemy.

So, you know, there are similarities in the sense of what's happening.

It's just that the intentions are totally different.

It's kind of like, you know, when Moses was throwing down his staff and it turned into a snake and then the wizards were doing the same thing.

You know.

Our snake is going to eat their snake.

So, that's the idea.

When we're looking at places like this, and it does take some practice.

Some people are more talented than others.

Some people have already felt like they're like this.

And that's basically the crowd that, you know, I'm kind of shooting for.

You'll eventually, you know, feel like it's possible as you get older and as you become more aware that this is happening.

But telepathy is a very real thing.

To what precision is another discussion.

It's based on your talents.

But, you know, sometimes you just get a rough idea.

Like a download telepathically.

It's just, it's like that and more.

But, in any case, you know, what you see through the twilight zone, through practice, is hard to explain in terms of how we're getting this image.

We can imagine a lot of things like, you know, when we see the wireless technology that's around us.

But, have no doubt that when you begin going into the twilight zone, what did I tell you to do?

Imagine a place that you've been before.

Imagine a place that you've seen on television.

And, eventually, you will start to see the outline.

If, you know, if you don't, then try harder.

Or, you know, basically detox off the fluoride.

Now, there are certain things that basically help open your third eye.

And, this is basically, you know, what you're looking for.

You know, it takes a certain amount of concentration.

It takes a certain IQ.

You know, to basically visualize something in your mind.

So, I can imagine that some people aren't able to do that.

Okay.

But, most people can basically imagine something in their mind and then begin to see it.

And, it's this process that basically starts the hardware going.

It's like turning the key in the car.

Not everybody understands, you know, how the ignition works.

Right.

You just turn the key and then you put it in drive and, you know, you go.

So, we're like users.

Right.

We're not, you know, called to be programmers and to understand how all of this works.

We're users.

So, don't worry about the software.

Don't worry about the hardware.

It's there.

And, you're already plugged in.

You just basically have to know how to turn it on and use it.

It's like a computer, you know.

If you learn as a kid, it's a lot, you know.

It comes natural to you.

But, the learning curve is different depending on your age.

And, depending on your experience set.

And, like I was saying, you know, there are certain things that basically improve your reception based on research.

And, I'm not saying that I approve, you know, the methods.

But, what I will say is that, you know, it is what it is.

And, so, there are certain things that open up your third eye.

The best advice that I can give is everything is best in moderation.

So, you know, a lot of people will experiment with a lot of different things.

To have, you know, a different type of experience.

And, you know, they're often referred to as psychedelics and the like.

And, people go places.

They go on trips.

I know how that sounds.

But, they go places in their mind.

And, they connect a lot of dots.

And, synapses begin to form in different directions.

It's kind of like the old telephone switching stations.

All of a sudden, now you can make long distance phone calls.

Again, everything is best in moderation.

And, I certainly wouldn't recommend any of the harder stuff that you see out there.

That's eventually turning people into zombies or something like that.

But, you know, this is one of the things that I certainly stumbled upon when I was younger.

Experimenting in the college days.

And, you know, some of that knowledge just kind of carried on.

But, you know, the THC basically opens up the third eye real well.

The key to all of this, again, is moderation.

You know, a lot of people will just get totally blazed.

And, you know, all they're good for is playing video games.

And, the trick here is to basically microdose super teeny tiny just a little bit.

I'm talking like just a little bit like, you know, like a little teeny, you know, pile of dust.

I don't want to say like a speck of dust.

But, I would say like, you know, just a puff.

Enough for just a puff.

Just one puff.

Not puff, puff, pass.

And, then it comes around again and again.

I'm talking one puff.

And, that's it.

Just one puff.

Nobody does one puff.

See, that's the problem too.

But, essentially doing one puff.

And, you know, the system just lights up pretty good.

Now, you can think about it in a lot of different ways.

And, you know, I wouldn't disagree with any skeptic out there.

Until you try and then you see the aliens basically in real life.

And, they're definitely trying to kill you.

And, I know how that sounds.

And, all I got to say is, you know, seeing is believing.

I wouldn't waste your time.

I got better things to do.

So, basically opening your third eye.

I hope that sounds logical to you.

And, you can get over the skepticism and, you know, stop rolling your eyes and chuckling.

It's certainly not a very Christian thing to do.

Like I said, you know, a lot of this is basically, you know, a little out of the ordinary.

But, it's, you know, it's not so different than drinking some wine.

Having a glass of wine.

And, in many states, you know, it's totally normal.

But, I understand, you know, the negative connotations.

I'm not trying to be a pusher.

But, basically opening your third eye is key here.

So, you can't really get into the twilight zone and really, you know, be effective.

Until you have experience flexing your third eye.

And, putting it all together.

But, up until now, you know, we've basically been giving you the basics.

So, that you can put it all together.

Connect the dots.

And, then, you know, be like Rambo out there.

So, we're going to be talking about hybrid warfare.

And, once you start seeing the enemy through your hardware with your eyes closed.

When you can see the enemy in the world of the unseen.

Then, basically, you can apply that to the world that you can see.

And, it becomes like augmented reality.

And, you'll see, you know, all sorts of strange things.

You know, what's important is to hold your ground and to find a solution.

But, you're going to see a lot of strange, dangerous, terrible things.

And, you're going to see, you know, tons of things from another world.

And, the idea is to hit these things.

So, in the last broadcast, we were saying, okay, now start visiting places.

And, then, eventually, something is going to come and confront you.

If it doesn't confront you.

And, you want to, you know, you need some practice.

Some serious target practice.

And, you've got all your prep work done.

So, don't go and do this unless you have your prep work.

Because, otherwise, you're just going to be jumping off a building.

Get all your prep work done.

Know scripture.

Be a decent person.

Get your shielding.

Get your sword of the spirit.

Get your covenant going.

Become an official member.

And, you get all of your prep work done.

You go into the twilight zone.

Maybe you've had some paranormal experiences.

You know.

You've been target practicing with the sword of the spirit.

Or, an instrument.

And, you've been using the windows of time.

Now, we're trying to use that principle of hitting targets through the window of time.

And, it takes practice.

You're never going to get feedback.

You know.

Bill Gates is never going to send you a text message saying, stop.

They'll do something different.

But, you know.

If you've been practicing now, it's time to practice in the twilight zone.

In the fifth dimension.

In the second heaven.

When you close your eyes.

Basically, you're seeing somewhere else.

And, where that is.

You know.

Depends.

And, why you're seeing it.

Isn't fully understood.

I don't look at it as an out of body experience.

You know.

Paul basically says the same thing.

In the body or out of the body.

He didn't know.

From my perspective.

You're still in your body.

You're just seeing somewhere.

Why you're seeing it.

Is another question.

Is it a wormhole?

Is it a drone?

Is it an avatar?

You know.

Is it something.

Is there some kind of anomaly that's happening.

You know.

From that perspective.

You know.

I'm sure you've played a video game.

Or, you know.

Done a 3D kind of movie experience.

And, you can change the perspective.

Or, maybe even change the angle.

So, where's the camera?

What's the camera like?

And, it looks more like we're getting a feed from somewhere.

And so, normally there's something there that's broadcasting the feed.

And, we're receiving it.

And, the reason that all of this works is because time and space is interconnected in telekinetics in a way that's much different than in the physical world.

And, I can only, you know.

And, I can only, you know.

You know.

You know.

You know.

You know.

What's actually happening.

But, at some point in time.

At some point in space and time.

There's basically an incursion.

That originates from you.

And, then enters into that local area.

Kind of like piercing a needle through fabric.

At some point, the needle is coming through.

The fabric.

Now, what that fabric represents is basically.

To the best of my knowledge.

The other side of the wormhole.

At one.

You know.

At some point in time.

Something is coming out.

Through the fabric on the other end.

And.

You know.

Maybe it just looks like a needle.

Maybe it looks like something else.

But, these are the kind of questions you ask yourself when you go on a lot of missions.

What are these things firing at?

And so.

That's something that we'll examine more in depth.

You know.

Future.

Broadcast.

But.

The idea of hybrid warfare is basically to enter into.

An environment.

A remote environment.

And attack through telekinetics and teleenergetics.

And at first.

You know.

You're going to be.

Trying to visualize the target.

Either.

On a picture.

In a video.

On a computer screen.

You're going to visualize at first the target like that.

And try to hit it through the computer screen.

Imagine that.

That screen is like the fabric.

And you're piercing through.

Into their area.

Wherever they are and hitting them.

So it must.

You know.

It must look like something.

To those that have eyes to see.

And have a third eye to see.

Again.

We'll get.

Into more of that.

In a future podcast.

In a future podcast.

So.

We're going from.

Windows of time.

Into the twilight zone.

Trying to see what's there.

There.

And then eventually.

What's going to happen to you.

Is that.

You're going to see some kind of.

Weird.

Anomalous overlay.

In your reality.

It might be like.

You know.

Some kind of blob.

Or some kind of.

Fuzz.

But it's going to look like a cloud of something.

A cloud of energy.

Big or small.

You're going to close your eyes.

You're going to see.

That there's something there.

With a much more defined look.

Now.

How this works.

I'm not entirely sure either.

Because.

Now this thing.

You can see it quite clearly.

In your.

In.

In your world.

Where you're at.

But.

When you close your eyes.

You can almost see.

Like.

What it looks like.

In their world.

Where they're at.

But you don't get a whole lot more context.

Necessarily.

Sometimes you get a lot of.

Specifics in the background.

Sometimes you're just.
Seeing this disembodied spirit.
It's like.
Either it is there.
Or it isn't there.
In this world.
It's definitely there.
In that world.
But you're seeing.
You know.
Some kind of anomaly.
In this world.
And.
Like I said.
When you close your eyes.
You actually get.
More definition.
So there's.
You know.
Then it's when it really.
Kind of blows you away.
That.
You know.
It's not your imagination.
Like you'll see some kind of.
You know.

Weird anomalous.

Kind of thing.

Overlaid.

In the reality.

That we see.

With our eyes open.

And then when you close your eyes.

You see it.

In much more detail.

So it's like.

It's right there.

In front of you.

And sometimes.

It's there.

Attacking you.

And when you close your eyes.

You can see like.

Beams coming out of its eyes.

Why it's beams.

Coming out of its eyes.

Is hard to say.

But that's basically all it has.

These are disembodied spirits.

For the most part.

And so they attack.

With their eyes.

Mostly.

And so.

The idea.

In the twilight zone.

Is basically to find.

As many of these things.

That you can.

And basically destroy them.

Like.

You're in a video game.

And.

The way you destroy them.

Is by projecting weapons.

Into the twilight zone.

Into the second heaven.

Into the.

Fifth dimension.

Into.

The target.

That looks.

Ultra nefarious.

That you'll see.

And.

At first.

You don't really know.

You know.

How to start.

You know.

What do you do.

How does this computer work.

Exactly.

And.

We start with.

The basics.

We start with.

The sword of the spirit.

We start with.

The lightsaber effect.

You have to imagine.

That.

You can project.

A beam.

Like a laser beam.

To wherever.

This target is.

And to penetrate it.

And to slice with it.

You know.

If you had a laser.

That cut through.

Like.

You know.

An object.

It would basically.

Slice it in two.

And so.

The objective.

Here.

Is to project a beam.

Through.

Your sword of the spirit.

Into the location.

And to.

Hit this thing.

You know.

In between the eyes.

Up the eyeballs.

Into its brain.

Basically.

Whatever it is.

To erase it.

And.

Look.

It's not.

Hugely effective.

But it's a place to start.

At least.

You know.

You may injure it.

And do.

You know.

And score some points.

On the spiritual battlefield.

Field.

But eventually.

These things.

Will start.

Like.

Haunting you.

In the daylight.

And at night.

And.

You know.

Right now.

It seems like.

There's a.

New peak.

In.

Paranormal activity.

It's like.

2020.

All over again.

So.

Yeah.

It's.

The action's.

Real hot.

Right now.

And so.

Look.

When you're hitting these things.

With your lightsaber.

That's just basically.

You know.

Learning how to shoot.

With a .22.

You know.

Next we'll.

Talk about a bazooka.

And missiles.

And all of that.

But basically.

You got to practice.

Trying to hit these things.

With your sword of the spirit.

And that's probably.

You know.

Way beyond.

Where most people.

Will ever.

Go.

Anyways.

But.

To get from.

You know.

Basically.

Physical science.

To.

Hitting demons.

With.

The sword of the spirit.

I mean.

That could take people.

Like.

You know.

A hundred years.

To discover.

So.

If we put you into that arena.

Right away.

You know.

You'll have.

A lot more time.

To learn other things.

But.

It helps.

If you already have.

Some kind of experience.

With.

You know.

Third eye.

Activities.

Now.

Another thing.

That we wanted to discuss.

Is that.

Going back to the idea.

Of windows of time.

And we're going to.

Close with this.

And make it quick.

Going back to the idea.

Of windows of time.

So.

An image.

You know.

We're told.

Not to make images.

Of anything.

Basically.

Image making.

Is like.

The worst thing.

You can do.

Is like.

Basically.

Like.

Being a witch doctor.

Taking pictures.

You know.

Drawings.

Paintings.

All of that.

You're making a scene.

You're making a figure.

You're making an image.

And.

It ends up being.

Like.

A voodoo doll.

And.

What you project.

Onto that image.

Basically.

Hits that target.

Like.

Dialing.

You know.

Their phone number.

Why this works.

Is another story.

Again.

It's.

You know.

It's the mysteries.

Of the hardware.

And this.

Constructed reality.

But.

Image making.

Is hugely forbidden.

But.

Look.

We're using it.

To.

Hit targets.

We're not telling you.

To make images.

And we're.

We're in fact.

Telling you.

Don't make images.

Don't take pictures.

Don't take video.

Don't share it.

Don't stream it.

Don't participate in that.

Image making.

Is the worst thing.

You can do.

Unless it's for educational purposes.

But still.

You know.

At this stage.

You should really be trying to.

Gain virtue.

And purify yourselves.

As much as possible.

You're going to need it.

Any case.

Getting back to.

The windows of time.

So we look at an image.

To find a target.

Make it real easy.

We don't have to imagine.

We don't have to use our brain too hard.

There it is.

Now we just.

You know.

Trying to hit.

Hit the target.

With a laser beam.

Same idea.

Right.

That we were just talking about.

In the twilight zone.

But this.

Was something that you should have practiced.

Before the twilight zone.

And.

We're going back to this idea of.

Okay.

Windows of time.

Images.

We're basically dialing into a location.

Into a target.

Telekinetically.

Through an image.

Because it makes it easy for our brain.

To picture.

What we're trying to hit.

So.

You know.

Before you can ride your bike.

You got the training wheels.

Before you can run.

You got to walk.

But.

This idea.

Can be expanded.

In many different ways.

If an image.

Will bring us to a location.

In our mind.

I mean.

You know.

Think about.

You see.

Like.

A picture of New York.

I mean.

All of a sudden.

You know.

You recognize it.

But you.

Simply look at it.

As a picture.

But it's an actual.

You know.

Representation.

Of.

That reality.

Those buildings.

Look.

That way.

Because they're there.

Somewhere.

In New York.

And so.

There's basically.

Like a quantum connection.

There's like a quantum entanglement.

Between the form.

And.

The thing itself.

And that's why.

You have this voodoo.

Doll effect.

But you can basically.

Start imagining.

You know.

Bigger things.

Happening in.

You know.

Bigger environments.

And you know.

With places like.

New York.

Or.

California.

For the most part.

Is just basically.

You know.

Demons.

Running around.

Out there.

So you.

You can.

Let loose.

A little bit more.

You know.

Unleash the plagues.

Or.

You know.

Imagine.

Some.

Massive.

Kind of.

Catastrophes.

Sparing the innocent.

Of course.

And the poor little animals.

You know.

The wicked will not be justified.

So you basically.

Have to.

Always.

Think about that.

If you're unleashing.

Something bigger.

In an environment.

Protect the innocent.

Or don't do it at all.

Very important.

Because things will get real ugly.

Real fast.

For you.

Um.

Um.

And if you make a mistake.

Raise.

The dead.

There's.

You know.

Bad side effects to that.

But.

Imagine you brought him back.

We're getting way ahead of ourselves.

But.

What I want to talk about.
Is something a little bit bigger.
Than local area warfare.
It's hybrid warfare.
Which means that.
We can use telekinetics.
On larger targets.
Than just a person.
Or a disembodied spirit.
We can basically affect an area.
Of.
Negative energy.
And again.
Ephesians chapter 6.
Tells us that.
We're dealing with rulerships.
And principalities.
And.
Basically.
It's like area codes.
You know.
Counties.
States.
Regions.
Tri-state areas.
Congressional districts.

All the way up to.

You know.

Federal.

You know.

And so on.

And so.

Every area.

Basically.

Has.

Rulerships.

And demons.

I mean.

Every area is infested.

And there are.

Tons of enemies.

You know.

In.

An area.

And what makes it real easy.

To view an area.

Well.

Google Maps.

You know.

So.

And what's nice about Google Maps.

Is that in theory.

It's an accurate representation.

Of.

What's happening in the real world.

So there's a quantum entanglement there.

And that means that.

If you open up Google Maps.

And you like.

You know.

Basically.

Focus on the state of.

Let's just say.

Oklahoma.

Or.

You know.

Nebraska.

Or.

You know.

Pick your state.

New York.

You bring up this.

You bring it up on Google Maps.

It's an accurate representation.

We have a quantum entanglement.

And now.

Basically.

You're taking the sword of the spirit.

And you're imagining.

You know.

For a scalpel.

Practice with a scalpel first.

You know.

Imagine you got the scalpel.

And practice also like.

You know.

Cutting with a scalpel.

You know.

Basically.

Carefully.

So you don't hurt yourself.

Wear gloves if you need to.

But learn how a scalpel works in the physical world.

What you can do with it.

Try opening boxes.

Try.

You know.

Tougher things.

Use it like a can opener.

Not to open up cans.

But.

You know.

Real difficult things.

And see all the things.

You know.

Basically.

Practice being a surgeon.

But not on real people.

See what you can do with a scalpel.

Now.

You bring it to.

You bring it with you to.

Google Maps.

You open up like New York.

And then you imagine that.

Instead of a laser beam.

That you're basically now.

Scrubbing the surface.

Of this map.

Which is quantumly entangled.

With the real world.

A real representation of the physical.

And you're just scrubbing it.

With a spiritual beam.

To just eliminate.

All evil.

In that area.

Squint your eyes a little bit.

While you're doing it.

You don't have to flex your eye muscles.

You know.

You'll have to.

Basically gain some instincts on that.

Practice a little bit.

When you're trying to hit targets.

And make it a little deeper.

With a little push from the eyes.

But.

You know.

This is with the coordination.

With your hand.

Hand eye coordination.

In telekinetics.

Is really important.

And.

You know.

Going there.

In three dimensional.

Going into a three dimensional world.

Through a two dimensional image.

You know.

Requires kind of like.

Spatial awareness.

You can have to.

You know.

Be able to imagine that in your mind.

But.

Basically.

You know.

Instead of cutting through.

A target like.

The new world order.

Here.

We're basically trying to scrub the surface.

With.

Like.

A scalpel.

And.

We're just trying to cut through the surface.

Everything that's there.

In the atmosphere.

You know.

From thirty thousand feet.

To.

You know.

A hundred feet below ground.

Why not.

Imagine that you're just like.

Basically.

Cutting through that.

With.

A spiritual beam.

Destroying all evil.

You put all.

You wrap all of that together.

Hand eye coordination.

That's your idea.

That's your intent.

You're cutting through it.

You squint your eyes a little bit.

And.

You know.

Lo and behold.

You're going to start seeing targets.

Show up and move around.

And.

At first.

You know.

You might think it's your imagination.

But.

Always trust your instincts.

It's.

It's usually what it looks like.

That's all I can tell you.

I can't really.

You know.

Go into detail beyond that.

But the general rule.

In telekinetics.

And spiritual warfare.

Is when you get a flash of something.

When somebody shows you who they are.

Remember that.

Pay attention to that.

And.

It's usually how it is.

So.

You're basically going to get.

Views.

Quick views.

Flashes of something happening.

In a specific area.

You know.

You might be going.

Upstate.

New York.

Or something.

All of a sudden.

You.

You're going through there.

With your beam.

And you see something move.

Like.

Oh.

You know.

Maybe my eyes are.

You know.

Playing tricks on me.

And then.

You know.

You keep going.

And then.

You see something.

Just basically like.

You know.

Fly.

West.

Or do north.

Or something.

What was that?

You know.

Was that your.

Your imagination.

It probably was something.

And.

Eventually.

You know.

You can use this as like a.

Kind of like a windshield wiper.

And.

You can use this technique as.

Kind of like radar too.

As you're scrubbing an area.

And you're looking for anomalies.

Eventually.

You're going to come to a place.

Where it feels like there's some tension there.

And you also have to pay attention to how you're.

You know.

Your finger feels.

And how the instrument feels.

As you're scrubbing an area.

And you can scrub the sky.

You can scrub your.

Your neighborhood.

You know.

If you've got a good viewpoint.

You can scrub the valley.

Etc.

And then.

You can get a feel for like.

You know.

If there's something wrong in that area.

It's kind of like looking for water.

You know.

With.

Sticks or something.

Magnetic forces.

Or.

What have you.

You're going to get this sensation.

Like.

When you go over a certain area.

Like.

There's something there.

Yeah.

Like.

There's like a bubble.

There.

Something.

There's something that.

You know.

Didn't want to get scrubbed.

Or.

Something that.

Warrants further investigation.

And so.

You know.

You try to like.

Poke through there.

Poke through that bubble.

Bubble.

Open it up.

Or something.

You know.

Get in there.

And.

You know.

Move.

Move it around.

Rotate the.

The scalpel.

And.

Then.

Kind of close your eyes.

And see.

If.

You know.

You get any more.

Definition.

There.

And usually.

You'll see.

Something there.

And then you can kind of like.

Zoom in on it.

And.

With your eyes closed.

Now you're there.

And you can actually.

You know.

Hit it a little harder.

Why it's there.

What's the relationship.

You'll see the cause and effect.

You'll see the feedback.

For yourself.

But.

This is the thing that.

You know.

Just drives the dark side wild.

Because you can scrub an entire area.

You could scrub the entire country.

And you'll have like.

Some kind of impact on.

What's happening.

In that area.

And demonic forces basically.

You know.

Rely on.

A mesh.

Network.

Ideology.

To function properly.

And so.

Any kind of.

You know.

Messing with their.

Environment.

Basically.

Slows them down.

You know.

Breaks some connections.

It.

It's basically disrupting their operations.

On a.

On a whole different level.

And.

The idea is.

You know.

To attack everywhere.

And every.

You know.

Every which way you can.

That way.

And you can scrub.

You know.

You can go.

You know.

Into the city.

You can go out.

Usually it's better to be like.

You know.

Where you can see.

About four or five states.

And you start scrubbing.

And then you start looking for something.

And then you can kind of zoom in a little bit.

And see what's there.

And pay attention to.

Rough outlines.

Of what looks like.

A face.

These are people without bodies.

It's just a head.

Basically.

You're going to see.

And you know.

We should do a video on this.

But you're going to see a lot of.

Permanent.

Structures.

That resemble.

Faces.

And the like.

It could be mountains.

It could be trees.

It could be rivers.

It could be lakes.

But eventually.

As you're scrubbing areas.

You're going to see.

Things that look like.

It's a head without a body.

That's.

The disembodied spirit.

And.

That's what you want to hit.

So.

Keep scrubbing areas.

But maps.

Google maps.

Is a.

Is a nice little tool.

With a scalpel.

On top of going through your list.

Of you know.

Bad guys.

But.

This way you can have more of an impact.

On the general area.

And.

You know.

Practice makes perfect.

But just leave doubt behind.

Know that you can do it.

And.

You know.

You're going to be.

You know.

A serious.

I mean.

All of a sudden.

Now you've got some serious skills.

But keep practicing.

These concepts are.

You know.

Tried and.

Tried and tested.

It.

Tried and tested.

Tried and tested.

Tried and tested.

Tried and tested.

Tried and tested.

So I'll keep practicing.

And.

Make it happen.

And we'll.

Expand on this.

In future podcasts.

It's tough right now.

Also.

You know.

Accumulate a lot of.

HDPE.

Polyethylene.

We're going to be using it to make.

The world's best armor.

But.

All by itself.

It's not enough.

It's got to be augmented with.

Iron.

Filings.

Or iron dust.

So.

Try to find a lot of that.

Graphite.

Powder.

Try to find.

Some of that.

For like.

Hand drawings.

And.

We're going to be making some.

Exceptional armor.

But you want to start accumulating that.

It's.

It's pretty cheap and light.

And.

Do it yourself.

Kind of stuff.

But.

It's the most effective.

Also get some of that.

Copper EMF fabric.

You're going to need it.

But together.

It works really well.

We're definitely dealing with.

You know.

Particle beam weapons.

And.

Many other things.

Till the next time.

If you're listening to this.

You are.

The resistance.
