

JEDI TRAINING - DEMONIC ATTACKS (EPISODE 50)

Welcome back to Jedi Training. The title of this podcast is Demonic Attacks.

You may not think that demons are real or that they can attack, but they certainly can.

They show up in many shapes and sizes. It's like a plague out there, an infestation of evil spirits.

And before they get into a person, they basically attempt to dock like a virus.

A virus basically attaches itself to the cell surface.

And then it begins to speak into your mind.

You'll feel the thought life intrusion.

And it'll try and catch you.

And misdirect you in your thought life.

And if it can convince you of a certain theme, anger, hatred, sadness, jealousy, adultery, things of that nature,

then it can slip in. It'll dock with you.

If it can't dock with you and incubate inside you, then eventually they'll come and attack you.

And these are demonic attacks.

And the only way to see them is by going into the Twilight Zone.

We should probably call it something else.

In Season 2, we'll probably call it something else.

Like the Second Heaven or the Fifth Dimension.

I call it the Twilight Zone because it's an easy way to begin to see and to travel in your mind.

And so all of this brings up many questions, of course.

And the motive here, again, is to hack the Matrix.

To hack the Dark Side.

To get at it and to destroy it.

And so we do unconventional things.

But this isn't like doing a seance or something.

And so night visions are spoken of in Scripture.

Dreams are very important.

All of this hardware that we've been talking about is built in.

And, in my opinion, we're meant to fight.

In any case, this is what I've discovered over the past few years.

And attacking the demons that attack you essentially ends up being the thing that pisses them off the most.

As far as I can tell.

So, this is what we do.

I hope that you've been practicing.

I've been dealing with a lot of incoming fire.

And so we've had to focus on shielding and the like.

And so we're really at the tip of the spear.

Duking it out with the Dark Side.

And what we're talking to you about is basically the high speed train onto the battlefield.

Some of you will want to fight and some of you will not want to fight.

I totally understand.

I certainly don't paint a rosy picture.

I should.

I should just sell it like it's awesome.

It's wonderful.

It's the best thing ever.

Be sure to get some shielding.

You know.

But.

I think for this crowd.

It's better to be honest.

In.

All probability.

You're going to be targeted and attacked by these monsters.

Anyways.

You won't see them.

You won't know why.

For the most part you'll think it's the cell towers.

And to a certain extent it is.

There's ghosts in the machines.

And there's.

Millions and billions of people that have been body snatched.

By the demonic.

And so.

One way or the other.

You will be attacked by.

Demonic entities or proxies.

Of these demons.

Now when they dock.

And incubate.

They basically have.

A 360 degree view.

Of.

What's going on around them.

And.

People that are.

Demonically possessed.

Can attack you.

Through telekinetic warfare.

And essentially it's the demons that are.

Launching.

An attack.

And that gives you all the more reason.

To defend yourself.

Once you can.

See these things.

You realize just how.

Bad it is.

And how important all of these skills.

Become.

It is ugly.

But.

These incubators are.

As much of a threat.

As.

Everything else.

To a certain extent.

They're still human.

But.

In a very real sense.

There's probably no way.

Of getting them back.

And so.

You have to do what it takes.

For humanity.

And for.

Our Christian faith.

To survive.

This is a very real threat.

To our.

Way of life.

It's all but gone now.

And so.

We're basically the last ones.

We're the last.

Jedi.

If you will.

And so.

It's important that we all.

Get onto the battlefield.

And fight.

And we're going to try and recruit more people.

Because.

This is where the action's at.

If you have what it takes.

And if you.

Leave doubt behind.

And you can get into the twilight zone.

And you can.

Enter the battlefield.

You're going to be a force.

To be reckoned with.

But.

It's going to be tough right now.

It's still tough.

I'm hoping it'll get easier.

As time goes on.

I'm not sure.

I make no guarantees.

It seems to be getting worse.

Yet better.

All at the same time.

And so.

It's hard to say.

How this will end.

But I hope for the best.

And expect the worst.

And that's certainly the mindset.

That you need to have.

You need to focus on.

Your survival skills.

You need to focus on.

Being self-sufficient.

Being tough.

This is the toughest thing.

You're ever going to go through.

And.

Undoubtedly.

The future is going to be.

Even more difficult.

We don't know what's waiting for us.

In the future.

But.

It looks pretty.

Bad as well.

Let us hope we can change history.

By hedging.

Against the dark side.

We know it's there.

We might as well.

Knock it out.

If we can.

So that's the goal.

and.

And.

And.

You're going to have to take this.

Ultra seriously.

Because.

This.

Enemy.

Is.

Beyond.

Deceptive.

and it'll have you thinking, you know, you got some chronic disease before you know it
and you're on your way out and that's all you'll be thinking about.

And so you really have to protect yourself.

Any and every pain is either some sort of demonic attack or electronic attack or both.

And it seems like shielding helps for both, which is a real strange kind of observation.

You could conclude that these demons operate in the EMF spectrum somehow.

Or you can conclude that it's all artificial in nature.

And it's very difficult to say what exactly is going on.

But one of the war stories that I've told and I'll tell again is that

when I was waking up at 6.13

and it seemed like there were some kind of artificial stars in the sky, red stars.

I pointed the sword of the spirit to it and just about instantaneously
it started to react.

It started to outgas, almost fizzle.

Eventually I saw some escape pods ejecting from it.

It made me think of a lot of things.

And I wish I could say it was my imagination.

But I saw it plain as day.

And I'll never forget it.

It was like putting a match to paper.

The effect was instantaneous.

I started thinking about what else can be done.

And so it very much is like Star Wars.

The morning star.

The fallen stars.

There's something to that.

And so much more.

So.

You really can't rule anything out.

But.

At this stage it really seems like this is the hottest.

Weapon.

On the market.

But you have to know how to be able to use it.

And it's reserved for Christians.

Incorporated.

So.

It's kind of like being.

Arthur or whatever.

Can you pull the sword out of the stone?

Can you wield the sword of the spirit?

And.

Fight this enemy.

It's a big challenge.

It's a big responsibility.

And.

It's a very big.

Project.

To say the least.

It's almost being a little over ambitious.

But.

Fighting this enemy is a full time occupation.

Finding time to do anything else is very difficult.

Because you end up spending your time.

Shielding.

I suppose once.

I find the right shielding.

Combinations.

Things will be much easier.

But.

Two years into this.

Traveling at nearly warp speed.

I'm still not there.

And so.

All I can say is that.

Accumulating.

Supplies.

Finding the time.

Protecting yourself.

To do all of that.

Is very difficult.

That's why I say prepare now.

Keep preparing.

And never stop preparing.

For microwave warfare.

And.

The like.

And eventually.

When everything.

When everything lines up for you.

You'll enter this battle.

But you'll see these demons.

In people.

You'll see the demons.

Around people.

You'll see the demons.

Around you.

You'll start seeing all sorts of.

Creepy things.

Around nightfall.

Especially out in the boonies.

In the city.

It tends to stay a little more.

Semi-secular.

Because of the street lines.

But.

You'll catch first impressions.

Of.

The demons within people.

They'll look red.

They'll look black.

They'll morph.

Phase.

Out of the person.

Sometimes you'll see them.

Spin around.

Looking at you.

From the back.

Of the person's head.

Basically kind of.

Emerging.

From.

The hair.

You'll.

You'll see these things.

Emerging.

From all sorts of objects.

It's kind of spooky.

It's like the whole world.

Is a graveyard.

A haunted graveyard.

But again.

From the look of these things.

And from what scripture tells us.

These things are not from planet earth.

This is some kind of.

Cosmic virus.

That landed here.

And we explained this in previous.

Broadcasts.

Seems to be.

A disease.

A disease.

That spreads from.

Dead planet.

To living planet.

Consumes the planet.

Basically turns it into.

A graveyard.

And the whole thing.

Becomes like a collective.

Of evil.

Like a hydra.

With many heads.

And.

Many different sizes.

You'll have to see it.

To understand.

We're talking about this.

In a real.

Vague kind of way.

Because.

Giving it more detail.

Is.

Difficult.

For those.

That haven't seen it.

What I will tell you.

Is that.

Demons.

Demons.

Demons.

Are thought of.

As disembodied spirits.

Unclean spirits.

And.

They're basically.

Like a giant head.

Without a body.

And they can.

Telecommunicate.

With you.

Telepathically.

From.

Basically.

The other side.

Of the universe.

But sometimes.

These things.

Will get close.

Real close.

And you can see them.

Trying to enter.

Basically.

Have to.

Stab them.

Without stabbing yourself.

Gets close.

Sometimes.

Especially as a beginner.

You're like.

What is this?

This thing is right in my face.

They're telling you.

You know.

We're coming in through the eyes.

As they get into.

You know.

Right there.

In your face.

And so you're basically.

Trying to hit this thing.

Inches from your eyes.

And.

You know.

That's beginner's luck for you.

But eventually.

You understand that.

It's not really necessary.

To bring the knife.

To the demon.

You project.

Through it.

To destroy it.

And so.

So much of that.

Is all laid out.

In scripture.

It's.

It's kind of a wonder.

Why.

More wasn't said.

But I think it's.

Because.

The main focus.

Isn't.

To hunt demons.

The main focus.

Is to be a good person.

And scripture.

Is all about.

Teaching you.

How to act.

How to talk.

How to think.

And there's a.

There's a style to it.

There's a theme to it.

And.

You have to have that.

Before you can really.

Do anything else.

But certainly.

The groundwork.

Is laid.

For.

Spiritual warfare.

And.

It would be nice.

To have.

A gospel.

Just dedicated to that.

Tell us more.

You basically have to string it together like.

Like pearls.

Throughout scripture to.

To understand.

But.

It's all true.

It's all very true.

And of course.

You know.

Our first obligation.

Is to be good servants.

Worshipful.

Servants.

And so.

That is at the core.

Of our vocation.

I don't talk about that enough.

I really don't.

I'm assuming a lot.

With these conversations.

And in this day and age.

You know.

I'm probably.

Hopefully.

Not.

But.

Probably assuming.

Too much.

And.

So.

We'll really have to.

Get back to the basics.

You know.

But I'm hoping that.

For some of you out there.

That.

Got lucky.

And were brought up the right way.

Been lifelong Christians.

You know.

Living.

The small town life.

Etc.

Etc.

Watching the world.

Decay.

Like you're a time traveler.

And.

You've had enough.

And you know.

That.

Something must be done.

This is.

By far.

The most effective thing.

That I've seen.

But.

It's.

Like we've said.

In a previous podcast.

There's a definite need.

For evangelism.

And all of us.

Should be evangelizing.

As much as possible.

So.

That's something.

To look forward to.

Ministry work.

We'll have to leave it there.

For this podcast.

Keep.

Training.

Keep.

Training.

Out there.

We need you on the front lines.

And.

Just leave doubt behind.

There's no point in doubting what I'm telling you here.

There's no point in.

Holding back.

Second guessing.

The only thing that should hold you back.

If you're a lifelong Christian.

Is it.

You got little kids.

Or you really can't afford.

To shield like.

Fort Knox.

Basically.

So.

And I'm not talking like a million dollars.

Worth of shielding.

But.

If your budget's real tight.

And you're struggling to get by.

This is.

You know.

This is not going to.

Work out.

Because.

It takes.

Basically.

All of your time.

And.

It takes a healthy budget.

To survive.

I've had to spend like.

Definitely a couple thousand dollars.

On shielding materials.

And.

I'm constantly.

You know.

Trying to.

Get more.

Make more.

Put it together.

You know.

I did another batch today.

And.

You know.

This new space age.

Polyethylene.

HDPE.

High density.

Polyethylene based.

Armor is.

Hard to.

It takes time to make.

And so.

We've been meaning.

We've been meaning to talk more about that.

Give you some more details.

Like.

You know.

Which polyethylene.

Where do you find it.

And.

You know.

I would say.

The thicker the better.

But.

You know.

The thicker it is.

The less flexible it is.

And.

You may or may not be able to.

Order that in.

I've had to.

Basically order through.

Drop off locations.

And so.

I can't really order.

You know.

Everything that I would.

That I would want.

But.

I just need.

Bush.

This much morerä.

Fair.

Is.

Ashville.

Assistant.

This much.

Army.

out but it's got to be the high-density kind of it almost looks like you know Batman armor it's probably not as rubbery it's more plastic but flexible you know around one or two millimeters after that then you're basically talking about plastic sheet metal so I haven't tried anything beyond like one or two millimeters but even one or two millimeters is very effective on top of the graphite powder basically like hand drying powder graphite for pencils it's used in nuclear reactors cake that on with a spatula coat it with epoxy iron powder mix or you could basically use paint as well the idea is iron ball paint from the cell fighter eats radar EMF and turns it into heat it's a good combination the polyethylene graphite iron ball paint light and fairly inexpensive you should be able to produce it at around ten dollars a tile approximately two feet long one foot wide that you can basically make a flag jacket out of for starters two in the front two in this very one in the front one in the back one on each side two horizontal two vertical and you make a basic flag jacket make some straps shoulder straps out of tape or whatever and start from there you can cover it with some kind of conductive skin copper aluminum foil or something else and then add a load to it like resistors or capacitors or something like that and you can do that with copper tape or you know with solder and you've got yourself some pretty decent high-grade space-aged

ermf armor if you haven't snip your armor just on your armor zops and echo awAnd you can see how that works on your wall

cake everywhere but this issue is that way but what you say changes in your hair and color of it's cool and it might not look at any minus

So, that's that.

And we recommend adding loads to all of your shielding as well.

But, sheet metal around the bed, make a sliding door, under the bed, whatever is attacking from underground, it might as well be hell itself.

And so, it's real bad news.

That's the big struggle, essentially, is being able to sleep.

So that's where they get you the worst.

They'll turn your bed into a deathbed, if you let them.

So, be vigilant and be tough.

Don't give an inch.

It's always them and never you.

So, you have to protect yourself.

But, if you can secure your position and attack, then you're a battle station.

Otherwise, you just crash and burn.

So, that's the idea.

Become a battle station.

Wherever you're at, we'll leave it there.

I appreciate everybody tuning in.

Until the next time, if you're listening to this, you are the resistance.
