

PROPHECY AND REVELATION (EPISODE X)

Welcome back to Jedi Training, Episode 6, Prophecy and Revelation.

What's the difference between prophecy and divination?

What's the difference between visions, revelation, and strong delusion?

This is a very interesting subject, but the more you walk on the path of faith, the more you're going to see, you're going to see all sorts of things.

If you leave doubt behind, if you begin to engage the enemy.

With that said, this is a very complicated topic, and to begin, I just want to remind you of Daniel, Chapter 10.

And the Daniel fast, when his people were basically in exile, the Bible tells us it took three weeks for the angels to break through, to deliver a message.

Three weeks of fighting.

This is something that should haunt all of us, to say the least, because that was at least 2,500 years ago.

Obviously, things are probably much worse today.

If it took three weeks back then, it could take three months or three years today.

So how do we know that the messages that we're getting are divine in nature, and not misinformation or psyops, or in the worst case, a strong delusion?

How do we know what we're seeing is valid and true, to say the least?

Now, before we get into all of that,

I just want to focus on what you're going to see.

You're going to see things.

You're going to hear things.

You're going to get downloads as a person of faith.

It's going to happen.

If it hasn't happened to you yet, you're not trying very hard.

But it all really depends on the purity of heart.

Jesus tells us that

the pure of heart will see the Almighty.

And obviously, none of us are that pure.

But the closer you get to purity,

the more you're going to see.

Now, the question is,

what are you going to see?

Now, we're not talking about

hallucinations.

We're not talking about cartoons

per se.

Basically, with hallucinations,

for the most part,

it's things that you've seen before.

Maybe it's from a movie.

Maybe it's, you know,

from a cartoon.

Maybe it's pink elephants,

or something like that,

dancing around.

But what I'm talking about here

is like straight-up

augmented reality.

In HD.

Sometimes it's a little window

that appears.

And sometimes

you're living in it.

The reality changes like

something out of the twilight zone.

But there's a big difference

between hallucinations

and visions.

Now, revelation

is anything that ends up

being revealed to you.

The definition of

an apocalypse

is a lifting of the veil.

And then a lot of things

become revealed,

to say the least.

So, we could spend a lot of time

on vocabulary.

But,

the big takeaway here

is that

the Bible warns you

about divination,

spirits of divination,

which essentially

allow people

to see into the future

and to

fortune tell

that information

to

a customer

or to an audience.

And generally speaking,

that's associated

with witchcraft

and dark arts,

which means that

these people

are anchored
into something
on the other side.
And,
whatever it is,
it's communicating
information from the future
or a possible future.
And while,
you know,
I'm sure the vast majority
of all the fortune telling
is just
BS,
some of it
is going to be
based on
information
coming from the future.
That's a very scary concept.
But,
it's something that
we'll probably expand upon
in a future broadcast.
But,
divination
comes from the dark side.
Again,
this is a spiritual war
against two kingdoms,
the kingdom of darkness
and the kingdom of light,
kingdom of heaven.

the kingdom of darkness
is essentially
a rebellion
from the kingdom of heaven.

So,
essentially,
both sides
are dealing with
you know,
a common culture,
if you will.

I mean,
it's really tough
to simplify it like that
as a mere human,
but they all come
from the same place.

And so,
they're privy
to the same type
of technology.

It's kind of like
conservatives and liberals
in a way
in America.

They all got phones,
they all got
the modern tech,
they all speak
the same language,
but there's this
division,
ideologically speaking.

But both sides
are essentially
capable of doing
a lot of things
that are similar
in nature.

The dark side
can appear
as an angel of light.

And so,
in this
context,
it's very difficult
to know
where the information
is coming from
and,
you know,
what it really means.

But if you're
anchored into
the dark side,
then your information
is certainly
coming from
the dark side.

If you're
anchored
into the
kingdom of light,
then some of
your information
is coming

from the
kingdom of
heaven,
but you may
get some
interference,
you may get
some hacking
from the
dark side,
trying to
intimidate you
or trying to
lead you down
a wrong path.

You might be
thinking that
you're getting
a response
from the
almighty,
and in fact,
you're getting
a response
from the devil
instead.

And so,
it's the world
that we live
in.

And that
is a very
difficult

reality.

We'd like

to think

that,

as good

people,

all of our

information is

coming from

the good

guys,

but

it's not

always the

case.

And so,

what's the

difference

between

prophecy

and

divination?

essentially,

you're getting

information

from the

future,

or from

a higher

source,

but what

that source

is can

sometimes be
a mystery.

As far
as revelation
is concerned,
there's a lot
of accounts
of visions
in the
Bible.

Many of the
prophets,
the
transfiguration,
and
so it
happens.

The
transfiguration
is essentially
like an
example of
when reality
just kind
of changes
right before
your eyes.

But it
can be
very intense.

Now,
the reason
that we

talk about
this as
part of
the Jedi
training is
because this
can be
rather
useful.
It can
and it
can't be.
It can
be as
dangerous
as it
is useful,
but it
is something
that you'll
begin,
it's a
skill that
you'll
begin to
acquire.
Kind of
like reading
the code
in the
matrix.
things.
Now,

there's a
lot to
be said
about
interpreting
omens
and
being
superstitious
and all
of that.
Essentially,
we're not
called to
do that.
And so,
you know,
it's something
that we should
be avoiding,
but
essentially,
when you're
out in the
wilderness
and you hear
a noise,
I mean,
you just
tend to
look that
way,
you know,

and you
try to
have to
kind of
figure out,
you know,
what it
is,
what it
means,
and what
should be
done about
it.

But,
essentially,
that's how
it first
starts.

You first
start kind
of picking
up like
there might
be a
way to
read this
matrix,
this
constructed
reality or
whatever's
going on

out here,
in a way
that's kind
of like
reading between
the lines.

And we'll
talk about
that perhaps
in more
in a
future
podcast.

We're not
going to
spend a
whole lot
of time
on that
right now,
but essentially
your intuition
will start
picking up
on things
and you'll
start getting
ideas and
you'll start
getting downloads.

That's probably
the best way
that I can

describe it.

And you
really have
to judge
for yourself
what it
means and
maybe where
it comes
from.

But don't
automatically
assume that
it's from
the good
guys.

Because it
seems like
there's some
kind of
embargo,
the planet
is kind
of
sandboxed.

And I
suppose we'll
talk about
that more
in a future
podcast as
well.

But it

really kind
of goes
back to
Daniel
chapter 10.

But things
evolve from
intuition,
reading the
matrix,
getting
downloads,
that things
are going
to happen
before they
happen.

And then it
kind of,
you know,
goes from
there to
the point
where,
you know,
you will get
information from
the future
somehow.

somehow.

And sometimes
you can
apply that

for survival,
sometimes you
can apply
that
in other
ways.

And, you
know, if
you're in
the occupation
of evangelism,
then it tends
to be a handy
tool to a
certain extent.
but essentially
this will get
even worse
to the
point where,
like I said,
it ends up
being like
augmented reality.

And I don't
think anybody's
ever trying to
describe it
like that.

And I know
that, you
know, two
or three

thousand years
ago, that
concept just,
you know,
didn't exist.

The best you
could describe it
would be a
vision or a
revelation.

But,
augmented
reality probably
describes it
best.

And,
sometimes it
can be
your room
that becomes
like a
holodeck.

It's usually
night.

I mean,
the Bible
refers to it
as night
visions.

Not like
night vision
goggles, but
night visions.

When the
backdrop is
basically dark
enough,
this augmented
reality can
come through.
through.

It can
happen in
the broad
daylight,
but then
the entire
reality of
the world
changes.

It's like
your own
little episode
of the
twilight zone.

You're
stepping into
a future
or into
a parallel
universe,
and you
can experience
things almost
like a
dream.

And it's
usually a
bad dream.

And as
far as I
can tell,
the main
purpose is
basically to
transmit
information,
but in
some cases,
it seems
like you
can interact
with this
augmented
reality in
a metaphysical
way.

It just
really depends
on what
level you're
at.

It's almost
like playing
a video game.

That's probably
a real bad
way to
describe it.

But the
more you
level up,
the more
things you're
going to be
able to see
and do.

And we're
trying to
get you
there as
Jedi.

But Jedi
training isn't
exactly like
the movie
where you're
trying to
move things
with your
hands.

You might
think that's
what telekinetics
is really
about.

It's not
so much
moving things
with your
hands as
much as

it is
having an
impact at
a location
at a
remote
location.

time.
But these
visions or
this augmented
reality is
essentially
your first
step in
that direction.

and we're
getting ahead
of ourselves
but
you know
this augmented
reality could
be

like a
type of
wormhole
or something
into another
universe or
another section
of the
universe or

depending on
what you're
looking at it
can be
you know
another
place
on the
planet
but
it's in
generally it's
in high
definition.

It can be in
color.

Sometimes it's
in black and
white but
it's not
black and
white.

it's black
and gold.

That tends
to be
how you see
a lot of
things.

You'll see
the outlines
in black
and gold.

But it
can go into
full color
HD style
and I really
do mean
HD like
you know
you're watching
some kind
of IMAX
and I've
really seen
some incredible
things thinking
about all
of the
all of
these
experiences
and we've
talked about
you know
basically how
to get
there
and
again
there's a
reason why
they call it
night visions.
but what you

see is kind

of like a

real lucid

dream in a

sense.

It's things

that you've

never seen

before.

It's in

many cases

it's things

that you'd

never even

imagine.

You couldn't

even imagine

what's out

there really.

And we'll

be talking

about that

in future

podcasts in

more detail

because it's

a major

component of

our built

in weapon

system.

Essentially it

feels like

you're being
trained on
how to use
a new
kind of
computer
program.
the experience
basically
baby steps
you to
be able
to
use
some kind
of
infrastructure
that's
already in
place.
we'll have
to leave
some of
the more
we'll have
to leave
some of
these ideas
for a
future
broadcast
when we
get into

more advanced

ideas

because

right now

if we jump

ahead it'll

just seem

like

you know

like it's

unattainable.

For most

people

the main

problem is

fighting off

doubt.

most people

are still

on

level

one

where

sometimes

they believe

and sometimes

they don't.

And that

tends to be

the big tug

of war

that follows

you wherever

you go.

You'll always
be challenged
on your
faith.

But faith
is a big
idea.

I mean
when you
talk about
having
faith
you know
where does
that
end for
most people?

It basically
ends at
I believe
in Jesus
and
Jesus
loves me
and I'm
saved.

That's
basically
where
the action
stops
for most

people.

If you

look in

the book

of Mark

the gospel

according to

Mark

somebody

asked Jesus

you know

what is the

greatest

commandment?

And

Jesus

responds

O

Israel

know that

there is

but one

God

and that

you should

love him

with all

of your

heart

and your

mind

and your

soul.

all your
strength.
I'm
paraphrasing
but I'm
sure you've
heard that
before
but somehow
you're
programmed
not to
accept it.
What Jesus
is telling us
there is
that there
is one
God
and it's
not Jesus.
He says
that over
and over
again in the
gospels.
People don't
pay attention.
so you
have to
think about
this.
Jesus

tells us
that there
is one
God
and the
church
tells us
there are
three
and they
kind of
roll it
into
something
real
confusing.
Woe to
those that
sow
confusion.
so
essentially
people are
there
in their
journey
and they
never get
off the
ground floor.
They never
lift off.
They never

really
get to
where they
need to
be
and they're
just not
paying attention.

And I
think that's
going to be
the downfall
of a lot
of people
in the
next life.

Now I'm
not saying
that what
I'm proposing
is a whole
lot better
because it's
dangerous
territory.

Engaging the
enemy the
way that I've
been engaging
the enemy
is not
anything I've
ever seen

or read

before.

I don't

hear anybody

else talking

about it.

I feel like

a pioneer

in a place

where maybe

we shouldn't

go.

But like

I've said

and I'll

get into

more details

in the

future,

I've seen

a lot of

response

demons

from what

I've been

doing

from this

matrix

and from

demons

and devils

and the

dark side

and fallen

angels.

I've seen

what they

look like.

I've seen

the stare

of a

fallen

immortal

looking at

me.

And you

could tell

that the

consciousness

behind its

eyes was

something

beyond

the rest

in terms

of what

you'll

encounter

on the

dark

side.

But I've

seen these

demons

basically

jump out

of the
bushes,
no doubt
about it,
taking human
form as
well,
responding to
these attacks
that I
would launch
in real
time.

And the
counter-attacks
that I've
received are
I think way
beyond what
most other
targeted
individuals have
experienced.

so I
feel real
confident
that
whatever
I'm into
albeit
it might
be
not where

you want
to go,
it seems
like
it's
effective.
It seems
like it's
having an
impact.
and we'll
have to
talk about
that more
in a future
podcast
in a lot
of detail
but this
will get
there when
we start
talking about
the mechanics
of a
session,
having a
session
in spiritual
warfare.
We've kind
of talked
about it

in some
previous
shows.
It's kind
of like
where you
want to
get to.
but getting
there requires
a lot of
different
skills
stacked up
one on
top of
another.
It's like
when you
build a
skyscraper
you've got
to have
plumbers,
you've got
to have
engineers,
you've got
to have
architects,
you've got
to have
basic

labor
skills,
you've
got to
have all
sorts of
specialties.

coming
together
to make
that thing
work.

And,
you know,
one person
generally
just can't
do it all
by themselves.

But it
can happen.

More or
less.

But for
the most
part,
it takes
a lot of
different
skill sets
to be able
to do
what I've

been into.

I think

there's other

people who

have tried.

And perhaps

there's some

people that

have excelled

better than

me.

I've seen

some pretty

intense

attacks coming

from other

directions on

some of the

same targets

that I've

seen.

Which makes

me think

that I'm

not alone

in this

fear of

thinking.

But

if we

were able

to count

how many

people are
actually doing
this on
planet Earth
right now,
it's probably
a handful.

And so
the aim
here is to
get more
people
trained in
to do
that.

But
seeing is
believing.
Getting you
there is
part of
the
challenge.

I've never
tried training
in somebody
like this
before,
especially
at a
distance.
but a
lot of

it kind
of comes
naturally
as soon
as you
can break
free,
as soon
as you
can escape
the gravity
of doubt
and disbelief
and temptation
and worldly
things.
but like
everything
else,
knowing the
end product
or knowing
the destination
makes it
easier to
get there.
You know,
some people
might just
stop at a
vision and
be like,
whoa,

you know,
what was
that?
And not
pursue it
any further.
It's kind
of like when
people first,
you know,
discovered
electricity or
whatever.

Like,
ooh,
you know,
what is
that?

I don't
know if
we should
be playing
with that.

But,
you know,
if people
from the
future could
talk to
people in
the past,
they would
be like,

oh,
well,
you know,
you're going
to be able
to make
computers one
day.

Just,
this is how
you do it.

We'll leave
it there for
this broadcast.

Appreciate
everybody tuning
in.

Until the
next time,
if you're
listening to
this,
you are
the resistance.
